Interpretation
State codes

Locational
State code 1: Development in a state-controlled road environment
State code 2: Development in a railway environment
State code 3: Development in a busway environment
State code 4: Development in a light rail environment
State code 5: Development in a state-controlled transport tunnel environment
State code 6: Protection of state transport networks
State code 7: Maritime safety
State code 8: Coastal development and tidal works
State code 9: Great Barrier Reef wetland protection areas
State code 10: Taking or interfering with water
State code 11: Removal, destruction or damage of marine plants
State code 12: Development in a declared fish habitat area
State code 13: Unexploded ordnance
State code 14: Queensland heritage

Use-based
State code 15: Removal of quarry material from a watercourse or lake
State code 16: Native vegetation clearing
State code 17: Aquaculture
State code 18: Constructing or raising waterway barrier works in fish habitats
State code 19: Category 3 levees
State code 20: Referable dams
State code 21: Hazardous chemical facilities
State code 22: Environmentally relevant activities
State code 23: Wind farm development

Advice only
State code 24: Urban design outcomes for significant projects

Appendices
Appendix 1: Development requiring assessment under the Planning Regulation 2017
Appendix 2: FastTrack5 qualifying criteria
Policy context

1.1 Introduction

The State Development Assessment Provisions (SDAP) provide assessment benchmarks for the assessment of development applications where the chief executive is the assessment manager or a referral agency.

The chief executive administering the Planning Act 2016 through the State Assessment and Referral Agency (SARA) uses the SDAP to deliver a coordinated, whole-of-government approach to the state’s assessment of development applications.

1.2 The role of the State Assessment and Referral Agency

Through SARA, the chief executive of the Act (the Director-General of the Department of State Development, Manufacturing, Infrastructure and Planning) is the assessment manager or referral agency for development applications where there is a matter of interest to the state. The Planning Regulation 2017 (the regulation) states when the chief executive is an assessment manager or a referral agency for particular development applications.

DSDMIP is the single point of lodgement for all development applications which are assessed through SARA. In assessing development applications through SARA, DSDMIP will seek technical advice from other relevant state agencies with expertise in the particular matters covered by the SDAP provisions. Following assessment by SARA, a single decision notice (as assessment manager) or referral agency response (as referral agency) is issued which addresses all relevant matters of state interest.

Relationship with the Planning Act 2016 and the Planning Regulation 2017

Queensland’s planning legislation establishes a performance-based approach to planning. Performance-based planning seeks to regulate development to achieve a performance outcome, rather than regulating development through prescription.

In assessing and deciding a development application, the chief executive is bound by the decision-making rules outlined in the Act, including the matters the chief executive must assess a development application against and the matters the chief executive may have regard to when undertaking the assessment.

Section 43(1) of the Act provides that the assessment manager must assess development against assessment benchmarks. The regulation sets out the specific assessment benchmarks that an assessment manager must assess development against, including the SDAP. Section 45 of the Act sets out the categories of assessment for assessable development (code assessment and impact assessment) and the matters the assessment must, or may be, carried out against. Each of the triggers in schedules 9 and 10 of the regulation specify the assessment benchmarks for that trigger. For every trigger the chief executive is the assessment manager for, the SDAP is specified as the assessment benchmark.

Section 55(2) of the Act states that a regulation may prescribe the matters that a referral agency may, must or must only have regard to in its assessment. Each of the referral triggers in schedules 9 and 10 of the regulation specify the matters the referral agency’s assessment must be against. For every trigger the chief executive is the referral agency for, the SDAP is specified as the matter the referral agency’s assessment must be against. Additionally, section 23 of the regulation specifies other matters a referral agency must have regard to when assessing a development application.
1.3 Development not assessed by SARA, or not assessed against SDAP

Under schedules 9 and 10 of the regulation, certain matters require referral to entities other than the chief executive. Referrals to entities other than the chief executive are not administered by SARA and do not require assessment against the SDAP. For further information on these referrals visit DSDMIP’s website.

Where referral to the chief executive is triggered in the regulation for the South East Queensland Regional Plan, SARA will assess these applications against the criteria in the regulation. The SDAP does not contain provisions relevant to this trigger.

Where a development application made to the chief executive is triggered in the regulation for material change of use on contaminated land, SARA will assess these applications against the criteria in the regulation. The SDAP does not contain provisions relevant to this trigger.
2.0 Using the state codes

Matters of state interest which are considered by the SDAP may broadly be categorised as:
1. interests that have the potential to impact on development (e.g. unexploded ordnance); and
2. interests that must be protected from the impacts of development (e.g. marine plants).

2.1 Use of state codes – applicants

The SDAP is structured in a performance-based code format, whereby applicants can address performance criteria to demonstrate that a development appropriately manages any impacts on a matter of state interest, and/or protects a development from impacts of matters of state interest.

In making a development application to SARA, applicants should respond to each of the relevant provisions of the applicable state codes in the SDAP. This will assist in minimising requests for further information and speed up the assessment process.

2.2 Use of state codes – SARA

SARA delegates will assess a development application against the relevant provisions of the applicable state codes. In assessing development applications, DSDMIP will seek technical advice from other relevant state agencies with expertise in the particular matters covered by the relevant SDAP provisions. DSDMIP officers are responsible for issuing SARA decisions on behalf of the chief executive.

2.3 How the state codes are used in assessment

Each state code in the SDAP will typically contain the following assessment criteria:
1. a purpose statement;
2. performance outcomes; and
3. acceptable outcomes (the only non-essential assessment criteria).

In simple terms:
1. if a development application complies with all of the relevant performance outcomes of a code, it complies with the purpose statement of the code, and therefore with the code itself
2. if a development application complies with some, but not all, relevant performance outcomes of a code, SARA will determine whether it complies with the purpose statement and therefore the code itself
3. if SARA determines that the purpose statement of the code is complied with, the code itself is considered to be complied with and an approval (with or without relevant conditions) will be issued
4. if a development application does not comply with the purpose statement of the code, it does not comply with the code itself and will be refused.

Each aspect of the state codes, and how they are applied, are discussed in further detail in the following sections.

2.4 Purpose statement

The purpose statement of a state code is the highest order test within the SDAP that a development application can be assessed against. Unlike a local government planning scheme, the SDAP does not rely on overarching strategic outcomes. Instead, development will comply with a particular state code if it can be shown to meet the code’s purpose statement. The purpose provides the overall context for the code and holistically defines what the code seeks to manage and/or protect.
2.5 Performance outcomes

Performance outcomes serve as the primary tests for development being assessed against a code, and identify the aspects or features of a relevant matter of state interest.

Performance outcomes define what may constitute an acceptable or tolerable impact on a matter of state interest, or the minimum standards required to manage the impacts a matter of state interest on a development.

If a development application does not comply with one or more particular performance outcomes then SARA will determine, on balance, whether the purpose statement is complied with or not.

2.6 Acceptable outcomes

Acceptable outcomes are provided for some, but not all, performance outcomes, and identify ways in which performance outcomes can be met. An application that complies with all applicable acceptable outcomes is considered to satisfy the corresponding performance outcome. If an application does not comply with one or more of the applicable acceptable outcomes, compliance with the performance outcome should be demonstrated.

Where multiple acceptable outcomes are provided as a means of achieving compliance with a performance outcome, they are to be read in the following way:

1. if there is an ‘AND’ provided between each acceptable outcome, this means all of the acceptable outcomes apply if they are relevant to the application

2. if there is an ‘OR’ between each acceptable outcome and there are only two acceptable outcomes, this means one or the other apply if they are relevant to the application

3. if there are three or more acceptable outcomes provided and there is an ‘AND’ provided between the first two or more acceptable outcomes, then an ‘OR’ provided between the last two acceptable outcomes, this means that all of the acceptable outcomes apply and one-or-the-other of the last two acceptable outcomes apply (for example, the code lists AO7.1 AND AO7.2 AND AO7.3 OR AO7.4 – this means either AO7.1, AO7.2 and AO7.3 apply, or AO7.1, AO7.2 and AO7.4 apply)

4. if there are three or more acceptable outcomes provided and the words – ‘OR all of the following acceptable outcomes apply’ or ‘OR both of the following acceptable outcomes apply’; this means that either the first acceptable outcome applies, or all other acceptable outcomes apply (for example, the code lists AO2.1, OR both of the following acceptable outcomes apply, AO2.2 AND AO2.3 – this means either AO2.1 applies, or AO2.2 and AO2.3 apply).

The codes can also contain reference tables or figures (information required to apply the code).

2.7 Managing multiple state codes or matters of state interest

Development applications assessed against the SDAP will sometimes involve multiple matters of state interest and trigger assessment against a number of different state codes. Where this occurs, applicants should consider and address each relevant state code independently. It is not necessary to attempt to balance or justify outcomes with reference to other state codes.

In assessing the development application, SARA officers will consider the compliance or otherwise of the application with each applicable state code. In cases where multiple state codes are triggered and the purpose statement of one or more of the codes is not considered to be achieved by the development proposal, SARA will make a decision that best achieves and advances the purpose of the Act.
3.0 Interpretation

3.1 Statutory and non-statutory parts of the SDAP

All information in a state code is statutory, other than notes (except where indicated to be statutory notes) and the list of reference documents, which are intended to assist applicants in preparing a development application. Each code contains the following information:

1. purpose statement
2. performance outcomes and acceptable outcomes
3. reference documents which may support the interpretation and assessment of a development application against a particular matter
4. figures and/or reference tables (where applicable) which outline information required to apply the code
5. glossary of terms
6. abbreviations (where applicable) specific to that state code.

All information included in the sections of the SDAP titled ‘Policy context’, ‘Using the state codes’ and ‘Interpretation’, as well as the appendices, form non-statutory components of the document.

3.2 Numbered and bulleted lists

Numbered and bulleted lists throughout this document are to be interpreted as ‘and’ statements unless the word ‘or’ is included.

3.3 Notes and statutory notes

Statutory notes are identified by the title ‘statutory note:’ and constitute statutory information. Notes are identified by the title ‘note’, are extrinsic material, meaning they are non-statutory.

3.4 Glossary of terms

A glossary is included within each state code which defines terms as they relate to that individual state code. All defined terms within the state code are bold for ease of reference. When a term is not defined it has the meaning given in the Act or the regulation or where not defined in one of those documents, its ordinary meaning.

3.5 Hyperlinks

Where a hyperlink is available, the text appears in the following style: hyperlink.

3.6 Mapping

Where relevant, reference may be made to the development assessment (DA) mapping system (as amended from time to time), which contains mapping layers relevant to SARA. The DA mapping system is publicly available.

The DA mapping system aims to provide a central repository for all available mapping layers that may assist users in identifying relevant assessment or referral triggers under the regulation and/or responding to provisions contained within the SDAP. The DA mapping system also contains information in relation to other state government planning mechanisms not related to SARA. In determining the ‘point of truth’ of a trigger, this must always be the legislation or regulation that gives effect to the matter. If there is an inconsistency between the DA mapping system and the legislation, the legislation takes precedence.
For example, if land meets the definition of ‘railway corridor’ under the Planning Regulation 2017 but is not mapped a such in the DA mapping system, the definition would prevail and the trigger would apply.
4.0 Appendices

4.1 Appendix 1: Development requiring assessment under the regulation

Appendix 1 is intended to assist applicants in determining which of the state codes apply to a development application.

Table 1 outlines where the chief executive is the assessment manager for a development application under the provisions of the regulation and the relevant state codes for the type of development.

Table 2 outlines where the chief executive is a referral agency for a development application under the provisions of the regulation and the relevant state codes for the type of development.

4.2 Appendix 2: FastTrack5 framework

Where the chief executive is the assessment manager or referral agency for a development application, aspects of that application may qualify for a streamlined assessment. The FastTrack5 framework is a referral and assessment process that allows certain aspects of development to be assessed and decided quickly by SARA. A reduced fee applies to eligible aspects of development.

4.2.1 Qualifying for FastTrack5 assessment

Having confirmed the triggers relevant to a development application, applicants can use the tables in appendix 1 of the SDAP to determine whether the FastTrack5 assessment pathway is available prior to lodgement or referral of the application to SARA. It is up to the applicant as to whether they seek to qualify for FastTrack5 assessment for any or all of the eligible aspects of development.

To qualify for FastTrack5 assessment, development applications must demonstrate that all of the qualifying criteria in the relevant checklist for each relevant aspect of development are met. The reduced SARA development application fee will be applied for each qualifying FastTrack5 trigger at the time of lodgement or referral of the application. If the application does not meet all of the relevant FastTrack5 qualifying criteria, the standard SARA assessment pathway applies, requiring full assessment against the SDAP state codes and subject to standard statutory timeframes and fees.

Upon receipt of an application seeking assessment via the FastTrack5 pathway, SARA will review the documentation provided and confirm that a triggered aspect of development qualifies for FastTrack5 assessment.

If after lodgement or referral an aspect of the development application is proven not to meet the relevant FastTrack5 qualifying criteria, the applicant will be asked to provide a supplementary fee to ensure that the application is properly made or properly referred to SARA for the relevant trigger(s) in accordance with the regulation. The application will then follow the standard SARA assessment pathway and the usual statutory timeframes, as per the Act and the Development Assessment Rules.

4.2.2 Assessment via the FastTrack5 assessment pathway

Having confirmed that the relevant aspect(s) of the development meet the FastTrack5 qualifying criteria, SARA can quickly assess and provide a referral response or decision for a FastTrack5 eligible aspect of the development. Applications that qualify for FastTrack5 assessment will not be subject to an information request and standard conditions will generally be applied.
4.2.3 Assessment of FastTrack5 triggers via the standard assessment pathway

In circumstances where an application has more than one SARA trigger, but not all triggers are FastTrack5 eligible triggers or aspects of development, the application will follow the standard SARA assessment pathway and be subject to the associated timeframes. Nevertheless, FastTrack5 eligible aspects of development will still benefit from a reduced fee, will not be subject to an information request and will generally have standard conditions applied. For applications assessed through the standard assessment pathway which also have FastTrack5 eligible triggers, a single decision notice will be issued covering all aspects of development.
State code 1: Development in a state-controlled road environment

1.1 Purpose statement

The purpose of this code is to protect state-controlled roads, future state-controlled roads and other infrastructure in state-controlled roads from adverse impacts of development. The purpose of this code is also to protect the safety of people using, and living and working near, state-controlled roads.

Specifically, this code seeks to ensure:

1. development does not create a safety hazard for users of a state-controlled road, by increasing the likelihood or frequency of fatality or serious injury
2. development does not compromise the structural integrity of state-controlled roads, road transport infrastructure or road works
3. development does not result in a worsening of the physical condition or operating performance of state-controlled roads and the surrounding road network
4. development does not compromise the state’s ability to construct state-controlled roads and future state-controlled roads, or significantly increase the cost to construct state-controlled roads and future state-controlled roads
5. development does not compromise the state’s ability to maintain and operate state-controlled roads, or significantly increase the cost to maintain and operate state-controlled roads
6. development does not compromise the structural integrity of public passenger transport infrastructure located on state-controlled roads or compromise the operating performance of public passenger transport services on state-controlled roads
7. the community is protected from significant adverse impacts resulting from environmental emissions generated by vehicles using state-controlled roads.

1.2 Performance outcomes and acceptable outcomes

### Filling, excavation and retaining structures

**Note:** Information on the location of services and public utility plants in a state-controlled road can be obtained from the Dial Before You Dig service.

Where development will impact on an existing or future service or public utility plant in a state-controlled road such that the service or public utility plant will need to be relocated, the alternative alignment must comply with the standards and design specifications of the relevant service or public utility provider, and any costs of relocation are to be borne by the developer.

Refer to the SDAP Supporting Information: Filling, excavation and retaining structures in a state-controlled road environment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

**Note:** To demonstrate compliance with this performance outcome, it is recommended an RPEQ certified geotechnical assessment, prepared in accordance with the Road Planning and Design Manual 2nd Edition: Volume 3, Department of Transport and Main Roads, 2016, is provided.

Refer to the SDAP Supporting Information: Filling, excavation and retaining structures in a state-controlled road environment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome and prepare a geotechnical assessment.

<tr>
<td>----------------------</td>
</tr>
<tr>
<td>AND AO16.4 Use of any existing vehicular access to the development is consistent with a decision under section 62 of the <em>Transport Infrastructure Act 1994</em>. Note: The development which is the subject of the application must be of an equivalent use and intensity for which the section 62 approval was issued and the section 62 approval must have been granted no more than 5 years prior to the lodgement of the application. AND AO16.5 On-site vehicle circulation is designed to give priority to entering vehicles at all times so vehicles do not queue in a road intersection or on the state-controlled road.</td>
</tr>
</tbody>
</table>

**Vehicular access to local roads within 100 metres of an intersection with a state-controlled road**

PO17 The location and design of vehicular access to a local road within 100 metres of an intersection with a state-controlled road does not create a safety hazard for users of a state-controlled road.

Note: Refer to the SDAP Supporting Information: Vehicular access to a state-controlled road, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

AO17.1 Vehicular access is located as far as possible from the state-controlled road intersection.

AND AO17.2 Vehicular access is in accordance with parts, 3, 4 and 4A of the Road Planning and Design Manual, 2nd Edition: Volume 3, Department of Transport and Main Roads, 2016.

AND AO17.3 On-site vehicle circulation is designed to give priority to entering vehicles at all times so vehicles do not queue in the intersection or on the state-controlled road.

**Public passenger transport infrastructure on state-controlled roads**

PO18 Development does not damage or interfere with public passenger transport infrastructure, public passenger services or pedestrian or cycle access to public passenger transport infrastructure and public passenger services.

Note: Refer to the SDAP Supporting Information: Vehicular access to a state-controlled road, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

AO18.1 Vehicular access and associated road access works are not located within 5 metres of existing public passenger transport infrastructure.

AND AO18.2 Development does not necessitate the relocation of existing public passenger transport infrastructure.

AND AO18.3 On-site vehicle circulation is designed to give priority to entering vehicles at all times so vehicles using a vehicular access do not obstruct public passenger transport infrastructure and public passenger services or obstruct pedestrian access.

<tbody>
<tr>
<td><strong>PO20</strong> Development does not result in a worsening of operating conditions on the state-controlled road network.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

Note: To demonstrate compliance with this performance outcome, it is recommended that an RPEQ certified traffic impact assessment is provided. Please refer to the Guide to Traffic Impact Assessment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

| **PO21** Development does not impose traffic loadings on a state-controlled road which could be accommodated on the local road network. | **AO21.1** The layout and design of the development directs traffic generated by the development to the local road network. |

| **PO22** Upgrade works on, or associated with, a state-controlled road are built in accordance with Queensland road design standards. | **AO22.1** Upgrade works required as a result of the development are designed and constructed in accordance with the Road Planning and Design Manual, 2nd edition, Department of Transport and Main Roads, 2016. |

Note: Road works in a state-controlled road require approval under section 33 of the Transport Infrastructure Act 1994 before the works commence.

### Table 1.2.2: Environmental emissions

Statutory note: Where a state-controlled road is co-located in the same transport corridor as a railway, the development should instead comply with table 2.2.2: Environmental emissions in State code 2: Development in a railway environment.

Refer to the SDAP Supporting Information: Environmental emissions in a state-controlled road environment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with the performance outcomes in Table 1.2.2.

### Noise

Note: Noise levels from a state-controlled road or type 1 multi-modal corridor are to be measured in accordance with AS1055.1 – 1997 Acoustics – Description and measurement of environmental noise.
To demonstrate compliance with the acceptable outcome, it is recommended that a RPEQ certified noise assessment report is provided, prepared in accordance with the SDAP Supporting Information: Environmental emissions in a state-controlled road environment, Department of Transport and Main Roads 2017.

### Vibration

#### Hospitals

**PO28** Development involving a hospital minimises vibration impacts from vehicles using a state-controlled road or type 1 multi-modal corridor in patient care areas.

**AO28.1** Hospitals are designed and constructed to ensure vibration in the treatment area of a patient care area does not exceed a vibration dose value of $0.1\text{m/s}^{1.75}$.

**AO28.2** Hospitals are designed and constructed to ensure vibration in the ward area of a patient care area does not exceed a vibration dose value of $0.4\text{m/s}^{1.75}$.

Note: To demonstrate compliance with the acceptable outcome, it is recommended that a RPEQ certified vibration assessment report is provided.

### Air and light

#### PO29 Development involving an accommodation activity minimises air quality impacts from a state-controlled road or type 1 multi-modal corridor in outdoor spaces for passive recreation.

**AO29.1** Each dwelling has access to an outdoor space for passive recreation which is shielded from a state-controlled road or type 1 multi-modal corridor by a building, solid gap-free fence, or other solid gap-free structure.

#### PO30 Development involving a:
1. childcare centre; or
2. educational establishment
minimises air quality impacts from a state-controlled road or type 1 multi-modal corridor in outdoor education areas and outdoor play areas.

**AO30.1** Each outdoor education area and outdoor play area is shielded from a state-controlled road or type 1 multi-modal corridor by a building, solid gap-free fence, or other solid gap-free structure.

#### PO31 Development involving an accommodation activity or hospital minimises lighting impacts from a state-controlled road or type 1 multi-modal corridor.

**AO31.1** Buildings for an accommodation activity or hospital are designed to minimise the number of windows or transparent/translucent panels facing a state-controlled road or type 1 multi-modal corridor.

**AO31.2** Windows facing a state-controlled road or type 1 multi-modal corridor include treatments to block light from a state-controlled road or type 1 multi-modal corridor.

</tr>
</tbody>
</table>
### Performance outcomes

**PO35 Fill material from a development site does not result in contamination of land for a future state-controlled road.**

Note: Refer to the SDAP Supporting Information: Filling, excavation and retaining structures in a state-controlled road environment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

**PO36 Development does not result in an actionable nuisance, or worsening of, stormwater, flooding or drainage impacts in a future state-controlled road.**

Note: Refer to the SDAP Supporting Information: Stormwater and drainage in a state-controlled road environment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

**PO37 Run-off from the development site is not unlawfully discharged to a future state-controlled road.**

Note: Refer to the SDAP Supporting Information: Stormwater and drainage in a state-controlled road environment, Department of Transport and Main Roads, 2017, for further guidance on how to comply with this performance outcome.

### Acceptable outcomes

**AO35.1 Fill material is free of contaminants including acid sulfate content.**

Note: Soil and rocks should be tested in accordance with AS1289 – Methods of testing soils for engineering purposes and AS4133 2005 – Methods of testing rocks for engineering purposes.

**AO35.2 Compaction of fill is carried out in accordance with the requirements of AS1289.0 2000 – Methods of testing soils for engineering purposes.**

**AO37.1 Development does not create any new points of discharge to a future state-controlled road.**

**AO37.2 Stormwater run-off is discharged to a lawful point of discharge.**

Note: Section 3.9 of the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth Edition, 2016, provides further information on lawful points of discharge.

**AO37.3 Development does not worsen the condition of an existing lawful point of discharge to the future state-controlled road.**

---

1.4 Glossary of terms

**Accommodation activity** means any of the following:
1. caretaker’s accommodation
2. community residence
3. dual occupancy
4. dwelling house
5. dwelling unit
6. multiple dwelling
7. relocatable home park
8. residential care facility
9. resort complex
10. retirement facility
11. rooming accommodation
12. short-term accommodation
13. tourist park
14. a development with a combination of uses 1 to 13.
Actionable nuisance means where stormwater or surface water drainage to a downstream property causes a loss of enjoyment of property or physical damage to property (termed ‘nuisance’) such that the nuisance is actionable in law.

Note: See the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth edition, 2016, for further information.

Childcare centre see schedule 24 of the Planning Regulation 2017.

Note: Childcare centre means the premises used for care, education and minding, but not residence, of children.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The DA mapping system is available on the department’s website.

Educational establishment see schedule 24 of the Planning Regulation 2017.

Note: Educational establishment means the use of premises for:
1. training and instruction to impart knowledge and develop skills; or
2. student accommodation, before or after school care, or vacation care, if the use is ancillary to the use in paragraph 1.

Future state-controlled road see schedule 6 of the Transport Infrastructure Act 1994.

Note: Future state-controlled road means a road or land that the chief executive administering the Transport Infrastructure Act 1994 has, by written notice given to a local government and published in the gazette, indicated is intended to become a state-controlled road under section 42 of that Act.

See the DA mapping system.

Habitable room see the Building Code of Australia.

Note: Habitable room means a room used for normal domestic activities, and includes a bedroom, living room, lounge room, music room, television room, kitchen, dining room, sewing room, study, playroom, family room, home theatre and sunroom but excludes a bathroom, laundry, water closet, pantry, walk-in wardrobe, corridor, hallway, lobby, photographic darkroom, clothes-drying room, and other spaces of a specialised nature occupied neither frequently nor for extended periods.

Hospital see schedule 24 of the Planning Regulation 2017.

Note: Hospital means the use of premises for:
1. the medical or surgical care or treatment of patients, whether or not the care or treatment requires overnight accommodation; or
2. providing accommodation for patients; or
3. providing accommodation for employees, or any other use, if the use is ancillary to the use in paragraphs 1 or 2.

Indoor education area means an enclosed area within a childcare centre or educational establishment intended for use for the training or teaching of people including a classroom, lecture hall/theatre and library.

Indoor play area means an enclosed area within a childcare centre or educational establishment intended for use for children’s play. This term excludes functional areas such as bathrooms, food preparation areas, washing facilities and other spaces of a specialised nature.

Lawful point of discharge see the Queensland Urban Drainage Manual 2016.

Note: Lawful point of discharge means a point of discharge of stormwater from an allotment that is considered to satisfy the requirements specifically outlined within the Queensland Urban Drainage Manual, 2016. (See section 3.9 of the Queensland Urban Drainage Manual, 2016, for further information).

Limited access road see the Transport Infrastructure Act 1994.

Note: Limited access road means a state-controlled road, or part of a state-controlled road, declared to be a limited access road under section 54 of the Transport Infrastructure Act 1994.

See DA mapping system.

Limited access policy see the Transport Infrastructure Act 1994.

Note: Limited access policy means a policy for a limited access road prepared under section 54(4) of the Transport Infrastructure Act 1994. A limited access policy can be obtained by contacting the appropriate Department of Transport and Main Roads regional office.

Local planning instrument see section 8 of the Planning Act 2016.

Note: Local planning instrument means a planning scheme, temporary local planning instrument or planning scheme policy.

Local road means a road controlled by a local government authority.
New or changed access see schedule 24 of the Planning Regulation 2017.

Note: New or changed access between premises and a road or state transport corridor means:
1. the use of a new location as a relevant vehicular access between the premises and the road or corridor; or
2. the construction of a new relevant vehicular access between the premises and the road or corridor; or
3. the extension of an existing relevant vehicular access between the premises and the road or corridor; or
4. an increase in the number of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor; or
5. a change in the type of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor.

Outdoor education area means outdoor areas intended for use for the training or teaching of persons. This term does not include playgrounds or outdoor sport and recreational areas.

Outdoor play area see the Queensland Development Code.

Note: Outdoor play area means an unenclosed area located outside the external walls of the building. This term only includes playgrounds/play areas in a childcare centre or educational establishment.

Outdoor space for passive recreation means private open space, communal open space or public open space.

Patient care area see the Building Code of Australia.

Note: Patient care area means a part of a health-care building normally used for the treatment, care, accommodation, recreation, dining and holding of patients including a ward area and treatment area. A ward area means that part of a patient care area for resident patients and may contain areas for accommodation, sleeping, associated living and nursing facilities. A treatment area means an area within a patient care area such as an operating theatre and rooms used for recovery, minor procedures, resuscitation, intensive care and coronary care from which a patient may not be readily moved.

Planned upgrade means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified
1. in a publicly available government document; or
2. in written advice to affected land owners.

Note: Government documents are Commonwealth, state or local government documents that include a statement of intent for, or a commitment to, a planning outcome or infrastructure provision.

See the DA mapping system.

Private open space means an outdoor space for the exclusive use of occupants of a building.

Note: Public passenger service means a service for the carriage of passengers if:
1. the service is provided for fare or other consideration; or
2. the service is provided in the course of a trade or business (but not if it is provided by an employer solely for employees); or
3. the service is a courtesy or community transport service; and
4. includes a driver service and a service for the administration of taxi services, but does not include a service excluded from the Transport Operations (Passenger Transport) Act 1994 by a regulation.

Public passenger transport infrastructure see section 3 of the Transport Planning and Coordination Act 1994.

Note: Public passenger transport infrastructure means infrastructure for, or associated with, the provision of public passenger transport, including, but not limited to:
1. a transit terminal for public passenger services (for example, an airport terminal, a coach terminal, a cruise ship terminal); or
2. a ferry terminal, jetty, pontoon or landing for ferry services; or
3. a bus stop, bus shelter, bus station or bus lay-by; or
4. a busway station; or
5. a light rail station; or
6. a taxi rank, limousine rank or limousine standing area; or
7. a railway station; or
8. vehicle parking and set-down facilities; or
9. pedestrian and bicycle paths and bicycle facilities; or
10. a road on which a public passenger transport service operates.

Relevant residential building see section 6 of the Queensland Development Code Mandatory Part 4.4: Buildings in a Transport Noise Corridor.

Note: A building is a relevant residential building if:
1. a building development application for the construction of the building is made after 31 August 2010; and
2. the building:
   a. is a class 1, 2, 3 or building
   b. is located in a transport noise corridor
c. is not a relocated building

3. the building development approval for the construction of the building was not given under the building assessment provisions in force immediately before 1 September 2010, under section 37 of the Building Act 1975.

**Relocated building** see section 7 of Queensland Development Code Mandatory Part 4.4: Buildings in a Transport Noise Corridor.

Note: A building is a relocated building if the building:
1. is a class 1, 2, 3 or 4 building
2. was constructed on an allotment (the first allotment) where it was used as a residence
3. is relocated from:
   a. the first allotment to another allotment; or
   b. a site on the first allotment to another site on the first allotment.

**Retaining structures** means retention structures and systems such as walls, batters, anchors, bolts, soil nails, shoring, piles, piers, beams and similar structures.

**Road transport infrastructure** see schedule 6 of the Transport Infrastructure Act 1994.

Note: Road transport infrastructure means transport infrastructure relating to roads.

**Road works** see schedule 6 of the Transport Infrastructure Act 1994.

Note: Road works means:
1. works done for:
   a. establishing or constructing roads or things associated with roads; or
   b. maintaining roads or things associated with roads (other than public utility plant); or
   c. facilitating the operation or safety of road transport infrastructure; or
   d. establishing, constructing or maintaining road transport infrastructure, other than road transport infrastructure if the works are:
      i. directly related to an activity mentioned in subparagraph a, b and c
      ii. necessary for the safety, efficiency, operation or structural integrity of transport infrastructure, or
2. road access works; or
3. works declared under a regulation to be road works.

**State-controlled road** means:
1. a state-controlled road within the meaning of the Transport Infrastructure Act 1994, schedule 6; or
2. state toll road corridor land.

Note: See the DA mapping system.

**Structure** means any built structure as well as retaining structures.

**Transport noise corridor** see chapter 8B the Building Act 1975.

Note: Transport noise corridor means land designated under chapter 8B of the Building Act 1975 as a transport noise corridor.

**Type 1 multi-modal corridor** means a transport corridor that includes a state-controlled road and at least one of the following:
1. a busway; or
2. light rail; or
3. a railway with 15 or fewer passing trains per day.

# 1.5 Abbreviations

**dB(A)** – decibels measured on the ‘A’ frequency weighting network

**RPEQ** – Registered Professional Engineer of Queensland
State code 2: Development in a railway environment

2.1 Purpose statement

The purpose of the code is to protect railways, future railways and other infrastructure in a railway corridor from adverse impacts of development. The purpose of this code is also to protect the safety of people using, and living and working near, railways.

Specifically, this code seeks to ensure:

1. development does not create a safety hazard for users of a railway, by increasing the likelihood or frequency of loss of life or serious injury
2. development does not compromise the structural integrity of railways, rail transport infrastructure, other rail infrastructure or railway works
3. development does not result in a worsening of the physical condition or operating performance of railways and the rail network
4. development does not compromise the state’s ability to construct railways and future railways, or significantly increase the cost to construct railways and future railways
5. development does not compromise the state’s ability to maintain and operate railways, or significantly increase the cost to maintain and operate railways
6. the community is protected from significant adverse impacts resulting from environmental emissions generated by a railway.

2.2 Performance outcomes and acceptable outcomes

Development that is in a railway environment should demonstrate compliance with the relevant provisions of table 2.2.1 and table 2.2.2.

Development that is in a future railway environment should demonstrate compliance with the relevant provisions of table 2.2.3.

Table 2.2.1: Development in a railway environment

### Network safety

**PO23** Development involving dangerous goods adjacent to a railway corridor does not adversely impact on the safety or operations of a railway.

Note: Development involving dangerous goods, or hazardous chemicals above the threshold quantities listed in table 5.2 of the Model Planning Scheme Development Code for Hazardous Industries and Chemicals, Office of Industrial Relations, Department of Justice and Attorney-General, 2016, should demonstrate that impacts on a railway from a fire, explosion, spill, gas emission or dangerous goods incident can be appropriately mitigated.

Section 2.6 – Dangerous goods and fire safety of the Guide to Development in a Transport Environment: Rail, Department of Transport and Main Roads, 2015, provides guidance on how to comply with this performance outcome.

**PO24** Development does not adversely impact on the safety of a railway crossing.

Note: It is recommended a traffic impact assessment be prepared to demonstrate compliance with this performance outcome. An impact on a level crossing may require an Australian Level Crossing Assessment Model (ALCAM) assessment to be undertaken. Section 2.2 – Railway crossing safety of the Guide to Development in a Transport Environment: Rail, Department of Transport and Main Roads, 2015, provides guidance on how to comply with this performance outcome.

**AO23.1** Development does not involve handling or storage of hazardous chemicals above the threshold quantities listed in table 5.2 of the Model Planning Scheme Development Code for Hazardous Industries and Chemicals, Office of Industrial Relations, Department of Justice and Attorney-General, 2016.

**AO24.1** Upgrades to a level crossing are designed and constructed in accordance with AS1742.7 – Manual of uniform traffic control devices, Part 7: Railway crossings and applicable railway manager’s standard drawings.

Note: It is recommended a traffic impact assessment be prepared to demonstrate compliance with this acceptable outcome. An impact on a level crossing may require an Australian Level Crossing Assessment Model (ALCAM) assessment to be undertaken. Section 2.2 – Railway crossing safety of the Guide to Development in a Transport Environment: Rail, Department of Transport and Main Roads, 2015, provides guidance on how to comply with this acceptable outcome.

**AO24.2** Vehicle access points achieve sufficient clearance from a level crossing in accordance with AS1742.7 – Manual of uniform traffic control devices, Part 7: Railway crossings by providing a minimum clearance of 5 metres from the edge running rail (outer rail) plus the length of the largest vehicle anticipated on-site.

**AO24.3** On-site vehicle circulation is designed to give priority to entering vehicles at all times to ensure vehicles do not queue in a railway crossing.
Table 2.2.2: Environmental emissions

Statutory note: Where development is adjacent to a railway with fewer than 15 passing trains per day, compliance with table 2.2.2 is not required.

**Hospitals**

**PO29** Development involving a hospital minimises noise intrusion from a railway or a type 2 multi-modal corridor in patient care areas.

**AO29.1** Hospitals are designed and constructed using materials which ensure ward areas meet the following internal noise criteria:

1. \( \leq 45 \text{ dB(A)} \) single event maximum sound pressure level.

AND

**AO29.2** Hospitals are designed and constructed using materials which ensure patient care areas (other than ward areas) meet the following internal noise criteria:

1. \( \leq 50 \text{ dB(A)} \) single event maximum sound pressure level.

Note: Noise levels from railways or type 2 multi-modal corridors are measured in accordance with AS1055.1–1997 Acoustics – Description and measurement of environmental noise.

To demonstrate compliance with the acceptable outcome, it is recommended that a RPEQ certified noise assessment report be provided.

**Vibration**

**Hospitals**

**PO30** Development involving a hospital located within 25 metres of the centreline of the nearest railway track minimises vibration impacts from a railway or type 2 multi-modal corridor in patient care areas.

**AO30.1** Hospitals are designed and constructed to ensure vibration in the treatment area of a patient care area does not exceed a vibration dose value of 0.1\( m/s^{1.75} \).

AND

**AO30.2** Hospitals are designed and constructed to ensure vibration in the ward area of a patient care area does not exceed a vibration dose value of 0.4\( m/s^{1.75} \).

Note: To demonstrate compliance with the acceptable outcome, it is recommended that a RPEQ certified vibration assessment report be provided.

**Air and light**

**PO31** Development involving an accommodation activity minimises air quality impacts from a railway in outdoor spaces for passive recreation.

**AO31.1** Each dwelling has access to an outdoor space for passive recreation that is shielded from...

<td><strong>PO32</strong> Development involving a: 1. childcare centre; or 2. educational establishment minimises air quality impacts from a railway in outdoor education areas and outdoor play areas.</td>
<td>AO32.1 Each outdoor education area and outdoor play area is shielded from a railway by a building, a solid gap-free fence, or other solid gap-free structure.</td>
</tr>
<tr>
<td><strong>PO33</strong> Development involving an accommodation activity or hospital minimises lighting impacts from a railway.</td>
<td>AO33.1 Buildings for an accommodation activity or hospital are designed to minimise the number of windows or transparent/translucent panels facing a railway. OR AO33.2 Windows facing a railway include treatments to block light from a railway.</td>
</tr>
<tr>
<td><strong>PO34</strong> Development does not impede delivery of rail transport infrastructure in a future railway corridor.</td>
<td>AO34.1 Development is not located in a future railway corridor. OR AO34.2 Development is sited and designed so that permanent buildings, structures, infrastructure, services or utilities are not located in a future railway corridor. OR all of the following acceptable outcomes apply: AO34.3 Structures and infrastructure located in a future railway corridor are able to be readily relocated or removed without materially affecting the viability or functionality of the development. AND AO34.4 Development does not involve filling and excavation of, or material changes to, a future railway corridor. AND AO34.5 Land is able to be reinstated to the pre-development condition at the completion of the use.</td>
</tr>
<tr>
<td><strong>PO35</strong> Filling and excavation, building foundations and retaining structures do not undermine or cause subsidence of, a future railway corridor.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

Note: To demonstrate compliance with this performance outcome, it is recommended that a RPEQ certified geotechnical assessment is provided, prepared in accordance with section 2.7 of the Guide to Development in a Transport Environment: Rail, Department of Transport and Main Roads, 2015.
Performance outcomes | Acceptable outcomes
---|---
PO36 Fill material from a development site does not result in contamination of land for a future railway corridor. | AO36.1 Fill material is free of contaminants including acid sulfate content. Note: Soil and rocks should be tested in accordance with AS1289 – Methods of testing soils for engineering purposes and AS4133 2005 – Methods of testing rocks for engineering purposes.

AND

AO36.2 Compaction of fill is carried out in accordance with the requirements of AS1289.0 2000 – Methods of testing soils for engineering purposes.

PO37 Development does not result in an actionable nuisance or worsening of stormwater, flooding or drainage impacts in a future railway corridor. | No acceptable outcome is prescribed.

2.4 Glossary of terms

**Accommodation activity** means any of the following:
1. caretaker’s accommodation
2. community residence
3. dual occupancy
4. dwelling house
5. dwelling unit
6. multiple dwelling
7. relocatable home park
8. residential care facility
9. resort complex
10. retirement facility
11. rooming accommodation
12. short-term accommodation
13. tourist park
14. a development with a combination of uses 1 to 13.

**Actionable nuisance** means where stormwater or surface water drainage to a downstream property causes a loss of enjoyment of property or physical damage to property (termed ‘nuisance’) such that the nuisance is actionable in law.

Note: See the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth edition, 2016, for further information.

**ADG Code** see schedule 1 of the Work Health and Safety Act 2011.

Note: ADG Code means the Australian Code for the Transport of Dangerous Goods by Road and Rail approved by the Australian Transport Council, as updated from time to time.
Childcare centre see schedule 24 of the Planning Regulation 2017.  
Note: Childcare centre means the use of premises for the care, education and minding, but not residence, of children.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.  
Note: The DA mapping system is available on the department’s website.

Dangerous goods see schedule 1 of the Work Health and Safety Act 2011.  
Note: Dangerous goods means:
1. asbestos, or
2. anything defined under the ADG Code as:
   a. dangerous goods; or
   b. goods too dangerous to be transported.

Educational establishment see schedule 24 of the Planning Regulation 2017.  
Note: Educational establishment means the use of premises for:
1. training and instruction to impart knowledge and develop skills; or
2. student accommodation, before or after school care, or vacation care, if the use is ancillary to the use in paragraph 1.

Future railway corridor see schedule 24 of the Planning Regulation 2017.  
Note: Future railway corridor means:
1. land identified in a guideline made under the Transport Planning Act, section 8E as a future transport corridor for:
   a. rail transport infrastructure; or
   b. other rail infrastructure; or
   c. railway works; or
2. future railway land.  
See the DA mapping system.

Future railway land see section 242 of the Transport Infrastructure Act 1994.  
Note: Land becomes future railway land when the chief executive [TIA], by written notice to the relevant local government and in the gazette, indicates that the land is intended to be used for a railway. Future railway land ceases to be future railway land when it is subleased to a railway manager under section 240(4) of the Transport Infrastructure Act 1994. If the chief executive [TIA] decides that future railway land is no longer to be used for the railway, the chief executive [TIA] must give written notice of that fact to the relevant local government and in the gazette.

Habitable room see the Building Code of Australia.  
Note: Habitable room means a room used for normal domestic activities, and includes a bedroom, living room, lounge room, music room, television room, kitchen, dining room, sewing room, study, playroom, family room, home theatre and sunroom but excludes a bathroom, laundry, water closet, pantry, walk-in wardrobe, corridor, hallway, lobby, photographic darkroom, clothes-drying room, and other spaces of a specialised nature occupied neither frequently nor for extended periods.

High risk location means properties adjacent to the railway corridor where the risk of train derailment warrants a risk assessment and consideration of possible structural responses incorporated into adjacent development.  
Note: See the DA mapping system.

Hospital see schedule 24 of the Planning Regulation 2017.  
Note: Hospital means the use of premises for:
1. the medical or surgical care or treatment of patients, whether or not the care or treatment requires overnight accommodation; or
2. providing accommodation for patients; or
3. providing accommodation for employees, or any other use, if the use is ancillary to the use in paragraphs 1 or 2.

Indoor education area means an enclosed area within a childcare centre or educational establishment intended for use for the training or teaching of people including a classroom, lecture hall/theatre and library.

Indoor play area means an enclosed area within a childcare centre or educational establishment intended for use for children’s play. This term excludes functional areas such as bathrooms, food preparation areas, washing facilities and other spaces of a specialised nature.

Loading means pressure or force exerted on land or infrastructure.

Other rail infrastructure see schedule 6 of the Transport Infrastructure Act 1994.
Note: **Other rail infrastructure** means:
1. freight centres or depots
2. maintenance depots
3. office buildings or housing
4. rolling stock or other vehicles that operate on a railway
5. workshops
6. any railway track, works or other thing that is part of anything mentioned in paragraphs 1 to 5.

**Outdoor education area** means outdoor areas intended for use for the training or teaching of persons. This term does not include playgrounds or outdoor sport and recreational areas.

**Outdoor play area** see the Queensland Development Code.
Note: **Outdoor play area** means an unenclosed area located outside the external walls of the building. This term only includes playgrounds/play areas in a childcare centre or educational establishment.

**Outdoor space for passive recreation** means private open space, communal open space or public open space.

**Overhead line equipment** means overhead lines, cabling and associated structures used to provide power to electric trains.

**Patient care area** see the Building Code of Australia.
Note: **Patient care area** means a part of a health-care building normally used for the treatment, care, accommodation, recreation, dining and holding of patients including a ward area and treatment area. A ward area means that part of a patient care area for resident patients and may contain areas for accommodation, sleeping, associated living and nursing facilities. A treatment area means an area within a patient care area such as an operating theatre and rooms used for recovery, minor procedures, resuscitation, intensive care and coronary care from which a patient may not be readily moved.

**Planned upgrade** means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified:
1. in a publicly available government document; or
2. in written advice to affected land owners.
Note: Government documents are Commonwealth, state or local government documents that include a statement of intent for, or a commitment to, a planning outcome or infrastructure provision. See the DA mapping system.

**Private open space** means an outdoor space for the exclusive use of occupants of a building.

**Public passenger service** see the *Transport Operations (Passenger Transport) Act 1994*.
Note: **Public passenger service** means a service for the carriage of passengers if:
1. the service is provided for fare or other consideration; or
2. the service is provided in the course of a trade or business (but not if it is provided by an employer solely for employees); or
3. the service is a courtesy or community transport service; and
4. includes a driver service and a service for the administration of taxi services, but does not include a service excluded from the *Transport Operations (Passenger Transport) Act 1994* by a regulation.

**Public passenger transport infrastructure** see the *Transport Planning and Coordination Act 1994*.
Note: **Public passenger transport infrastructure** means infrastructure for, or associated with, the provision of public passenger transport, including, but not limited to:
1. a transit terminal for public passenger services (for example, an airport terminal, a coach terminal, a cruise ship terminal), or
2. a ferry terminal, jetty, pontoon or landing for ferry services; or
3. a bus stop, bus shelter, bus station or bus lay-by; or
4. a busway station; or
5. a light rail station; or
6. a railway station; or
7. a railway; or
8. vehicle parking and set-down facilities; or
9. pedestrian and bicycle paths and bicycle facilities; or
10. a road on which a public passenger transport service operates.

**Rail transport infrastructure** see schedule 6 of the *Transport Infrastructure Act 1994*.
Note: **Rail transport infrastructure** means facilities necessary for operating a railway, including:
1. railway track and works built for the railway, including for example:
   a. cuttings; or
   b. drainage works; or
   c. excavations; or
   d. land fill; or
e. track support earthworks any of the following things that are associated with the railway’s operation:
   i. bridges; or
   ii. communication systems; or
   iii. machinery and other equipment; or
   iv. marshalling yards; or
   v. noticeboards, notice markers and signs; or
   vi. overhead electrical power supply systems; or
   vii. over-track structures; or
   viii. platforms; or
   ix. power and communication cables; or
   x. service roads; or
   xi. signalling facilities and equipment; or
   xii. stations; or
   xiii. survey stations, pegs and marks; or
   xiv. train operation control facilities; or
   xv. tunnels; or
   xvi. under-track structures vehicle parking and set down facilities for intending passengers for a railway that are controlled or owned by a railway manager or the chief executive [TIA]; or
   xvii. pedestrian facilities, including footpath paving, for the railway that are controlled or owned by a railway manager or the chief executive [TIA], but does not include other rail infrastructure.

Railway see schedule 6 of the Transport Infrastructure Act 1994.
Note: Railway means a guided system, or proposed guided system, designed for the movement of rolling stock that is capable of transporting passengers or freight, or both, on a railway track and:
1. includes:
   a. rail transport infrastructure
   b. a railway being or proposed to be built on future railway land
2. but does not include:
   a. rolling stock
   b. a railway mentioned in section 107(2) of the Transport Infrastructure Act 1994.

Railway bridge means a structure which crosses a watercourse, land, road or other obstacle, on which rail transport infrastructure or other rail infrastructure is located.

Railway corridor see schedule 24 of the Planning Regulation 2017.
Note: Railway corridor means:
1. land on which rail transport infrastructure or other rail infrastructure is situated; or
2. land on which railway works are carried out if the works relate to rail transport infrastructure or other rail infrastructure; or
3. land on which services for the maintenance or operation of rail transport infrastructure or other rail infrastructure are situated.
See the DA mapping system.

Railway crossing see schedule 6 of the Transport Infrastructure Act 1994.
Note: Railway crossing means a level crossing, bridge or another structure used to cross over or under a railway.

Railway manager see schedule 6 of the Transport Infrastructure Act 1994.
Note: Railway manager means:
1. for a railway – the person who is an accredited rail infrastructure manager in relation to railway operations relating to the railway; or
2. for rail corridor land – the person who is an accredited rail infrastructure manager in relation to railway operations relating to the railway or proposed railway on or proposed to be on the rail corridor land.

Railway works see schedule 6 of the Transport Infrastructure Act 1994.
Note: Railway works means:
1. works for constructing, maintaining, altering or operating a railway or rolling stock; or
2. works for establishing, constructing or maintaining transport infrastructure, other than rail transport infrastructure, that are:
   a. directly related to paragraph 1; and
   b. necessary for the safety, efficiency and operational integrity of transport infrastructure; or
3. other works declared under a regulation to be railway works.

Relevant residential building see section 6 of the Queensland Development Code Mandatory Part 4.4: Buildings in a Transport Noise Corridor.
Note: A building is a relevant residential building if:
1. a building development application for the construction of the building is made after 31 August 2010
2. the building:
   a. is a class 1, 2, 3 or building
   b. is located in a transport noise corridor
   c. is not a relocated building
3. the building development approval for the construction of the building was not given under the building assessment provisions in force immediately before 1 September 2010, under section 37 of the Building Act 1975.

**Relocated building** see section 7 of Queensland Development Code Mandatory Part 4.4: Buildings in a Transport Noise Corridor.

Note: A building is a relocated building if the building:

1. is a class 1, 2, 3 or 4 building
2. was constructed on an allotment (the first allotment) where it was used as a residence
3. is relocated from:
   a. the first allotment to another allotment; or
   b. a site on the first allotment to another site on the first allotment.

**Retaining structures** means retention structures and systems such as walls, batters, anchors, bolts, soil nails, shoring, piles, piers, beams and similar structures.

**Structure** means any built structure as well as retaining structures.

**Transport noise corridor** means land designated under chapter 8B of the Building Act 1975 as a transport noise corridor.

**Type 2 multi-modal corridor** means a transport corridor that includes a railway (with 15 or more passing trains per day) and at least one of the following:

1. a state-controlled road; or
2. a busway; or
3. light rail.

### 2.5 Abbreviations

RPEQ – Registered Professional Engineer of Queensland
State code 3: Development in a busway environment

3.1 Purpose statement

The purpose of this code is to protect busways, future busways and other infrastructure in a busway corridor from adverse impacts of development. The purpose of this code is also to protect the safety of people using, and living and working near, busways.

Specifically, this code seeks to ensure:

1. development does not create a safety hazard for users of a busway, by increasing the likelihood or frequency of fatality or serious injury
2. development does not compromise the structural integrity of a busway, busway transport infrastructure or busway transport infrastructure works
3. development does not compromise the state’s ability to construct busways and future busways, or significantly increase the cost to construct busways and future busways
4. development does not compromise the state’s ability to maintain and operate busways, or significantly increase the cost to maintain and operate busways
5. the community is protected from significant adverse impacts resulting from environmental emissions generated by busways.

3.2 Performance outcomes and acceptable outcomes

Development in a busway environment should demonstrate compliance with the relevant provisions of table 3.2.1 and table 3.2.2.

Development in a future busway environment should demonstrate compliance with the relevant provisions of table 3.2.3.

Table 3.2.1: Development in a busway environment

<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and structures</td>
<td>AO1.1 Buildings, structures, infrastructure, services and utilities are not located in a busway corridor. AND AO1.2 Buildings, structures, infrastructure, services and utilities can be maintained without requiring access to a busway corridor.</td>
</tr>
<tr>
<td>PO1 The location of buildings, structures, infrastructure, services and utilities does not create a safety hazard in a busway corridor or cause damage to, or obstruct busway transport infrastructure.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>
### Performance outcomes

| PO3 Road, pedestrian and bikeway bridges over a **busway corridor** are designed and constructed to prevent projectiles from being thrown onto a **busway**. |
| AO3.1 Road, pedestrian and bikeway bridges include throw protection screens in accordance with section 4.9.3 of the Design Criteria for Bridges and Other Structures Manual, Department of Transport and Main Roads, 2018. |

Note: To demonstrate compliance with this performance outcome, it is recommended a RPEQ certified geotechnical assessment is provided. Section 3.1 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

### Acceptable outcomes

| PO4 Construction activities do not cause ground movement or vibration impacts in a **busway corridor**. |
| No acceptable outcome is prescribed. |

Note: To demonstrate compliance with this performance outcome, it is recommended a RPEQ certified geotechnical assessment is provided. Section 3.2 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

Filling, excavation and retaining structures

| PO5 Filling, excavation and **retaining structures** do not interfere with, or result in damage to, infrastructure or services in a **busway corridor**. |
| No acceptable outcome is prescribed. |

Note: Information on the location of services and public utilities in a **busway** can be obtained from the ‘Dial Before You Dig’ service. Where development will impact on a service or public utility plant in a **busway corridor**, such that the service or public utility plant will need to be relocated, an applicant should contact the relevant service or public utility plant provider for standards and design specifications for the alternative alignment. Any costs of relocation are to be borne by the developer. Section 3.2 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

| PO6 Filling, excavation, building foundations and **retaining structures** do not undermine or cause subsidence of, a **busway corridor**. |
| No acceptable outcome is prescribed. |

Note: To demonstrate compliance with this performance outcome, it is recommended a RPEQ certified geotechnical assessment is provided. Section 3.2 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

</table>

**PO7** Filling, excavation, building foundations and *retaining structures* do not cause ground water disturbance in a **busway corridor**.

Note: To demonstrate compliance with this performance outcome, it is recommended an RPEQ certified geotechnical assessment is provided.

Section 3.2 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

**PO8** Excavation, boring, piling, blasting or fill compaction during construction of a development does not result in ground movement or vibration impacts that would cause damage or nuisance to **busway transport infrastructure** or **busway transport infrastructure works**.

Note: To demonstrate compliance with this performance outcome, it is recommended a RPEQ certified geotechnical assessment is provided.

Section 3.2 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

**PO9** Filling and excavation material does not cause an obstruction or nuisance in a **busway corridor**.

Note: Section 3.2 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads 2017, provides further guidance on how to comply with this performance outcome.

**PO10** Filling and excavation does not cause wind-blown dust nuisance in a **busway corridor**.

AO10.1 Compaction of fill is carried out in accordance with the requirements of AS1289.0 2000 – Methods of testing soils for engineering purposes.

AND

AO10.2 Dust suppression measures are used during filling and excavation activities such as wind breaks or barriers and dampening of ground surfaces.

### Stormwater and drainage

**PO11** Development does not result in an **actionable nuisance** or worsening of stormwater, flooding or drainage impacts in a **busway corridor**.

Note: Section 3.3 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, provides further guidance on how to comply with this performance outcome.

No acceptable outcome is prescribed.
<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
</table>
| **PO12** Run-off from the development site during construction of development does not cause siltation of stormwater infrastructure affecting a **busway**.  
Note: Section 3.3 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, provides further guidance on how to comply with this performance outcome. | **AO12.1** Run-off from the development site during construction of development is not discharged to stormwater infrastructure for a **busway**.  
| **Access** |  |
| **PO13** Development prevents unauthorised access to a **busway corridor**.  
Note: Section 3.4 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, provides further guidance on how to comply with this performance outcome. | **AO13.1** Where development is abutting a **busway corridor**, a fence is provided along the property boundary in accordance with clause 4.1.6 of the Guide to Road Design Part 6B, Austroads 2015 and Part 6B of the Road Planning and Design Manual, 2nd edition, Department of Transport and Main Roads, 2016.  |
| **PO14** Vehicular access for a development does not create a safety hazard or result in worsening of operating conditions on **busways**.  
Note: Section 3.4 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, provides further guidance on how to comply with this performance outcome. | No acceptable outcome is prescribed.  |
| **PO15** Development does not damage or interfere with **public passenger transport infrastructure**, **public passenger services** or pedestrian and cycle access to **public passenger transport infrastructure** and **public passenger services**.  
Note: Section 3.5 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, provides further guidance on how to comply with this performance outcome. | **AO15.1** Vehicular access and associated road access works are not located within 5 metres of **public passenger transport infrastructure**.  
**AND**  
**AO15.2** Development does not necessitate the relocation of existing **public passenger transport infrastructure**.  
**AND**  
**AO15.3** On-site vehicle circulation is designed to give priority to entering vehicles at all times so vehicles using a vehicular access do not obstruct **public passenger transport infrastructure** and **public passenger services** or obstruct pedestrian or cycle access to **public passenger transport infrastructure** and **public passenger services**.  
**AND**  
**AO15.4** The normal operation of **public passenger transport infrastructure** or **public passenger services** is not interrupted during construction of the development.  |

<td><strong>Planned upgrades</strong></td>
<td><strong>AO16.1</strong> Development is not located on land identified by Department of Transport and Main Roads as land required for the planned upgrade of busway transport infrastructure. Note: Land required for the planned upgrade of busway transport infrastructure is identified in the DA mapping system. OR <strong>AO16.2</strong> Development is sited and designed so that permanent buildings, structures, infrastructure, services or utilities are not located on land identified by the Department of Transport and Main Roads as land required for the planned upgrade of busway transport infrastructure. OR all of the following acceptable outcomes apply: <strong>AO16.3</strong> Structures and infrastructure located on land identified by the Department of Transport and Main Roads as land required for the planned upgrade of a busway transport infrastructure are able to be readily relocated or removed without materially affecting the viability or functionality of the development. AND <strong>AO16.4</strong> Development does not involve filling and excavation of, or material changes to, land required for a planned upgrade to busway transport infrastructure. AND <strong>AO16.5</strong> Land is able to be reinstated to the pre-development condition at the completion of the use.</td>
</tr>
<tr>
<td>PO16 Development does not impede delivery of planned upgrades of busway transport infrastructure. Note: Section 3.6 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, provides further guidance on how to comply with this performance outcome.</td>
<td></td>
</tr>
</tbody>
</table>
Table 3.2.2: Environmental emissions

Note: Where a busway is co-located in the same transport corridor as a state-controlled road, development should instead comply with table 1.2.2 Environmental emissions of State code 1: Development in a state-controlled road environment.

Where a busway is co-located in the same transport corridor as a railway, development should instead comply with table 2.2.2 Environmental emissions of State code 2: Development in a railway environment.

Refer to sections 3.7, 3.8 and 3.9 of the Interim Guide to Development in a Transport Environment: Busway, Department of Transport and Main Roads, 2017, for further guidance on how to comply with the performance outcomes in table 3.2.2.

3.4 Glossary of terms

**Accommodation activity** means any of the following:
1. caretaker’s accommodation
2. community residence
3. dual occupancy
4. dwelling house
5. dwelling unit
6. multiple dwelling
7. relocatable home park
8. residential care facility
9. resort complex
10. retirement facility
11. rooming accommodation
12. short-term accommodation
13. tourist park
14. a development with a combination of uses 1 to 13.

**Actionable nuisance** means where stormwater or surface water drainage to a downstream property causes a loss of enjoyment of property or physical damage to property (termed ‘nuisance’) such that the nuisance is actionable in law.

Note: See the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth edition, 2016, for further information.

**Busway** see schedule 6 of the Transport Infrastructure Act 1994.

Note: **Busway** means:
1. a route especially designed and constructed for, and dedicated to, the priority movement of buses for passenger transport purposes
2. places for the taking on and letting off of bus passengers using the route.
Busway corridor means land on which:
1. busway transport infrastructure is situated; or
2. busway transport infrastructure works are being done; or
3. other services are provided for the maintenance or operation of busway transport infrastructure.

Busway transport infrastructure see schedule 6 of the Transport Infrastructure Act 1994.

Note: Busway transport infrastructure means each of the following:
1. the pavement on which buses run for a busway
2. the stations for operating a busway
3. other facilities necessary for managing or operating a busway, including for example:
   a. infrastructure put in place for the busway, including the following:
      i. support earthworks
      ii. cuttings
      iii. drainage works
      iv. excavations
      v. land fill
   b. the following things, if associated with the operation of the busway:
      i. access or service lanes
      ii. bridges, including bridges over water
      iii. busway operation control facilities
      iv. communication systems
      v. depots
      vi. machinery and other equipment
      vii. monitoring and security systems
      viii. noise barriers
      ix. notice boards, notice markers and signs
      x. office buildings
      xi. passenger interchange facilities between the busway and other modes of transport
      xii. platforms
      xiii. positioning systems
      xiv. power and communication cables
      xv. signalling facilities and equipment
      xvi. survey stations, pegs and marks
      xvii. ticketing equipment and systems
      xviii. timetabling systems
      xix. tunnels
      xx. under-busway structures
      xxi. workshops.

4. vehicle parking vehicle parking and set down facilities for intending passengers for a busway
5. pedestrian facilities, including paving of footpaths, for a busway
6. other facilities, or commercial or retail outlets or works, for the convenience of passengers and others who may use a busway, including, for example, automatic teller machines, lockers or showers for cyclists and others, newsagents and wheelchair hire or exchange centres
7. landscaping or associated works for a busway.

Busway transport infrastructure works see schedule 6 of the Transport Infrastructure Act 1994.

Note: Busway transport infrastructure works means works done for:
1. constructing busway transport infrastructure or things associated with busway transport infrastructure; or
2. the maintenance of busway transport infrastructure or of things associated with busway transport infrastructure; or
3. facilitating the operation of busway transport infrastructure or things associated with busway transport infrastructure; or
4. establishing, constructing or maintaining transport infrastructure, other than busway transport infrastructure, if the works are:
   a. directly related to an activity mentioned in paragraph 1, 2 or 3; and
   b. necessary for the safety, efficiency and operational integrity of transport infrastructure; or
5. other works declared under a regulation to be busway transport infrastructure works.

Childcare centre see schedule 24 of the Planning Regulation 2017.

Note: Childcare centre means the premises used for care, education and minding, but not residence, of children.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The DA mapping system is available on the department’s website.

Educational establishment see schedule 24 of the Planning Regulation 2017.

Note: Educational establishment means the use of premises for:
1. training and instruction to impart knowledge and develop skills; or
2. student accommodation, before or after school care, or vacation care, if the use is ancillary to the use in paragraph 1.
Future busway corridor means land identified in a guideline made under section 8E of the Transport Planning and Coordination Act 1994, for busway transport infrastructure or busway transport infrastructure works.

Habitable room see the Building Code of Australia.

Hospital see schedule 24 the Planning Regulation 2017.

Indoor education area means an enclosed area within a childcare centre or educational establishment intended for use for the training or teaching of people including a classroom, lecture hall/theatre and library.

Indoor play area means an enclosed area within a childcare centre or educational establishment intended for use for children’s play. This term excludes functional areas such as bathrooms, food preparation areas, washing facilities and other spaces of a specialised nature.

Loading means pressure or force exerted on land of infrastructure.

Outdoor education area means outdoor areas intended for use for the training or teaching of persons. This term does not include playgrounds or outdoor sport and recreational areas.

Outdoor play area see the Queensland Development Code.

Outdoor space for passive recreation means private open space, communal open space or public open space.

Patient care area see the Building Code of Australia.

Planned upgrade means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified:
1. in a publicly available government document; or
2. in written advice to affected land owners.

Public passenger transport infrastructure see schedule 1 of the Transport Planning and Coordination Act 1994.

Hospital means the use of premises for:
1. providing accommodation for patients; or
2. providing accommodation for employees, or any other use, if the use is ancillary to the use in paragraphs 1 or 2.

Public passenger service means a service for the carriage of passengers if:
1. the service is provided for fare or other consideration; or
2. the service is provided in the course of a trade or business (but not if it is provided by an employer solely for employees); or
3. the service is a courtesy or community transport service; and
4. includes a driver service and a service for the administration of taxi services but does not include a service excluded from the Transport Operations (Passenger Transport) Act 1994 by a regulation.

Public passenger transport infrastructure means infrastructure for, or associated with, the provision of public passenger transport, including, but not limited to:
1. a transit terminal for public passenger services (for example, an airport terminal, a coach terminal, a cruise ship terminal)
2. a ferry terminal, jetty, pontoon or landing for ferry services
3. a bus stop, bus shelter, bus station or bus lay-by
4. a busway station
5. a light rail station
6. a taxi rank, limousine rank or limousine standing area
7. a railway station
8. vehicle parking and set-down facilities
9. pedestrian and bicycle paths and bicycle facilities
10. a road on which a public passenger transport service operates.

Private open space means an outdoor space for the exclusive use of occupants of a building.

Retaining structures means retention structures and systems such as walls, anchors, bolts, soil nails, shoring, piles, piers, beams.

Structure means any built structure as well as retaining structures.

### 3.5 Abbreviations

- **dB(A)** – decibels measured on the ‘A’ frequency weighting network
- **RPEQ** – Registered Professional Engineer of Queensland
State code 4: Development in a light rail environment

4.1 Purpose statement

The purpose of this code is to protect light rail, future light rail and other infrastructure in a light rail corridor, from adverse impacts of development. The purpose of this code is also to protect the safety of people using, and living and working near, light rail.

Specifically, this code seeks to ensure:

1. development does not create a safety hazard for users of a light rail by increasing the likelihood or frequency of fatality or serious injury
2. development does not compromise the structural integrity of light rail, light rail transport infrastructure or light rail transport infrastructure works
3. development does not result in a worsening of the physical condition or operating performance of light rail
4. development does not compromise the state’s ability to construct light rail and future light rail, or significantly increase the cost to construct light rail and future light rail
5. development does not compromise the state’s ability to maintain and operate light rail, or significantly increase the cost to maintain and operate light rail
6. the community is protected from significant adverse impacts resulting from environmental emissions generated by a light rail.

4.2 Performance outcomes and acceptable outcomes

Development that is within in a light rail environment should demonstrate compliance with the relevant provisions of table 4.2.1 and table 4.2.2.

Development that is within a future light rail environment should demonstrate compliance with the relevant provisions of table 4.2.3.

Table 4.2.1: All development in a light rail environment

4.4 Glossary of terms

Accommodation activity means any of the following:
1. caretaker’s accommodation
2. community residence
3. dual occupancy
4. dwelling house
5. dwelling unit
6. multiple dwelling
7. relocatable home park
8. residential care facility
9. resort complex
10. retirement facility
11. rooming accommodation
12. short-term accommodation
13. tourist park
14. a development with a combination of uses 1 to 13.

Actionable nuisance means where stormwater or surface water drainage to a downstream property causes a loss of enjoyment of property or physical damage to property (termed ‘nuisance’) such that the nuisance is actionable in law.

Note: See the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth edition, 2016, for further information.
Childcare centre see schedule 24 of the Planning Regulation 2017.
Note: Childcare centre means the premises used for care, education and minding, but not residence, of children.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.
Note: The DA mapping system is available on the department’s website.

Educational establishment see schedule 24 of the Planning Regulation 2017.
Note: Educational establishment means the use of premises for:
1. training and instruction to impart knowledge and develop skills; or
2. student accommodation, before or after school care, or vacation care, if the use is ancillary to the use in paragraph 1.

Future light rail corridor means land identified in a guideline made under section 8E of the Transport Planning and Coordination Act 1994, for light rail transport infrastructure or light rail transport infrastructure works.

Habitable room see the Building Code of Australia.
Note: Habitable room means a room used for normal domestic activities, and includes a bedroom, living room, lounge room, music room, television room, kitchen, dining room, sewing room, study, playroom, family room, home theatre and sunroom but excludes a bathroom, laundry, water closet, pantry, walk-in wardrobe, corridor, hallway, lobby, photographic darkroom, clothes-drying room, and other spaces of a specialised nature occupied neither frequently nor for extended periods.

Hospital see schedule 24 of the Planning Regulation 2017.
Note: Hospital means the use of premises for:
1. the medical or surgical care or treatment of patients, whether or not the care or treatment requires overnight accommodation; or
2. providing accommodation for patients; or
3. providing accommodation for employees, or any other use, if the use is ancillary to the use in paragraphs 1 or 2.

Indoor education area means an enclosed area within a childcare centre or educational establishment intended for use for the training or teaching of people including a classroom, lecture hall/theatre and library.

Indoor play area means an enclosed area within a childcare centre or educational establishment intended for use for children’s play. This term excludes functional areas such as bathrooms, food preparation areas, washing facilities and other spaces of a specialised nature.

Light rail see schedule 6 of the Transport Infrastructure Act 1994.
Note: Light rail means:
1. a route wholly or partly dedicated to the priority movement of light rail vehicles for passenger transport purposes, whether or not the route was designed and constructed for those purposes as well as other purposes; and
2. places for the taking on and letting off of light rail vehicle passengers using the route.

Light rail corridor see schedule 24 of the Planning Regulation 2017.
Note: Light rail corridor means:
1. land on which light rail transport infrastructure is situated; or
2. land on which light rail transport infrastructure works are carried out; or
3. land on which services are provided for the maintenance or operation of light rail transport infrastructure are situated.

Light rail hazard zone means the area extending:
1. 1.75 metres either side of the nearest rail below ground and up to 3 metres above ground
2. 3 metres either side of the nearest rail higher than 3 metres above ground.
Note: Refer to the Guide to Development in a Transport Environment: Light rail, Department of Transport and Main Roads, 2017 for a visual representation of the light rail hazard zone.

Light rail transport infrastructure see schedule 6 of the Transport Infrastructure Act 1994.
Note: Light rail transport infrastructure means each of the following:
1. the rails on which light rail vehicles run for a light rail and pavement incorporating the rails
2. the stations for operating a light rail
3. other facilities necessary for managing or operating a light rail, including, for example:
   a. works built for the light rail, including the following:
      i. cuttings
      ii. drainage works
      iii. excavations
      iv. land fill
b. **light rail vehicles** that operate on a **light rail**; and

c. the following things if they are associated with the **light rail**’s operation:
   i. access or service lanes
   ii. bridges, including bridges over water
   iii. communication systems
   iv. **light rail** operation control facilities
   v. machinery and other equipment
   vi. maintenance depots
   vii. marshalling yards
   viii. monitoring and security systems
   ix. noise barriers
   x. notice boards, notice markers and signs
   xi. office buildings
   xii. overhead wiring
   xiii. **over-track structures**
   xiv. passenger interchange facilities between **light rail** and other modes of transport
   xv. platforms
   xvi. positioning systems
   xvii. power and communication cables
   xviii. power supply substations and equipment
   xix. signalling facilities and equipment
   xx. survey stations, pegs and marks
   xxi. ticketing equipment and systems
   xxii. timetabling systems
   xxiii. tunnels
   xxiv. under-track structures
   xxv. workshops

4. vehicle parking and set down facilities for intending passengers for a **light rail**
5. pedestrian facilities, including paving of footpaths, for a **light rail**
6. other facilities, or commercial or retail outlets or works, for the convenience of passengers and others who may use a **light rail**, including, for example, automatic teller machines, lockers or showers for cyclists and others, newsagents and wheelchair hire or exchange centres
7. landscaping or associated works for a **light rail**.

**Light rail transport infrastructure works** see schedule 6 of the **Transport Infrastructure Act 1994**.

Note: **Light rail transport infrastructure works** means works done for:
1. constructing **light rail transport infrastructure** or things associated with **light rail transport infrastructure**
2. the maintenance of **light rail transport infrastructure** or of things associated with **light rail transport infrastructure**
3. facilitating the operation of **light rail transport infrastructure** or things associated with **light rail transport infrastructure**
4. establishing, constructing or maintaining transport infrastructure, other than **light rail transport infrastructure**, if the works are:
   a. directly related to an activity mentioned in paragraph 1, 2 or 3; and
   b. necessary for the safety, efficiency and operational integrity of transport infrastructure
5. other works declared under a regulation to be **light rail transport infrastructure works**.

**Light rail vehicle** see schedule 6 of the **Transport Infrastructure Act 1994**.

Note: **Light rail vehicle** means a type of transport that:
1. is intended wholly or mainly for the carriage of passengers or for track maintenance
2. travels on flanged wheels on parallel rails
3. is designed to operate in line of sight on road-like areas.

**Loading** means pressure or force exerted on land or infrastructure.

**Outdoor education area** means outdoor areas intended for use for the training or teaching of persons. This term does not include playgrounds or outdoor sport and recreational areas.

**Outdoor play area** see the Queensland Development Code.

Note: **Outdoor play area** means an unenclosed area located outside the external walls of the building. This term only includes playgrounds/play areas in a **childcare centre** or **educational establishment**.

**Outdoor spaces for passive recreation** means **private open space**, communal open space or public open space associated with the development.

**Overhead line equipment** means overhead lines, cabling and associated **structures** used to provide power to electric **light rail vehicles**.

**Patient care area** see the Building Code of Australia.
Note: **Patient care area** means a part of a health-care building normally used for the treatment, care, accommodation, recreation, dining and holding of patients including a ward area and treatment area. A ward area means that part of a **patient care area** for resident patients and may contain areas for accommodation, sleeping, associated living and nursing facilities. A treatment area means an area within a **patient care area** such as an operating theatre and rooms used for recovery, minor procedures, resuscitation, intensive care and coronary care from which a patient may not be readily moved.

**Planned upgrade** means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified:
1. in a publicly available government document; or
2. in written advice to affected land owners.

Note: Government documents are Commonwealth, state or local government documents that include a statement of intent for, or a commitment to, a planning outcome or infrastructure provision.

See the DA mapping system.

**Public passenger service** see schedule 3 of the **Transport Operations (Passenger Transport) Act 1994**.

Note: **Public passenger service** means a service for the carriage of passengers if:
1. the service is provided for fare or other consideration; or
2. the service is provided in the course of a trade or business (but not if it is provided by an employer solely for employees); or
3. the service is a courtesy or community transport service; and
4. includes a driver service and a service for the administration of taxi services, but does not include a service excluded from the **Transport Operations (Passenger Transport) Act 1994** by a regulation.

**Public passenger transport infrastructure** see schedule 1 of the **Transport Planning and Coordination Act 1994**.

Note: **Public passenger transport infrastructure** means infrastructure for, or associated with, the provision of public passenger transport, including, but not limited to:
1. a transit terminal for public passenger services (for example, an airport terminal, a coach terminal, a cruise ship terminal)
2. a ferry terminal, jetty, pontoon or landing for ferry services
3. a bus stop, bus shelter, bus station or bus lay-by
4. a busway station
5. a **light rail** station
6. a taxi rank, limousine rank or limousine standing area
7. a railway station
8. vehicle parking and set-down facilities
9. pedestrian and bicycle paths and bicycle facilities
10. a road on which a public passenger transport service operates.

**Private open space** means an outdoor space for the exclusive use of occupants of a building.

**Retaining structures** means retention **structures** and systems such as walls, anchors, bolts, soil nails, shoring, piles, piers, beams.

**Structure** means any built structure as well as **retaining structures**.

### 4.5 Abbreviations

**RPEQ** – Registered Professional Engineer of Queensland
State code 5: Development in a state-controlled transport tunnel environment

5.1 Purpose statement

The purpose of this code is to protect state-controlled transport tunnels from adverse impacts of development. The purpose of this code is also to protect the safety of people using and living and working near state-controlled transport tunnels.

Specifically, this code seeks to ensure:

1. development does not create a safety hazard for users of a state-controlled transport tunnel, by increasing the likelihood or frequency of fatality or serious injury
2. development does not compromise the structural integrity of state-controlled transport tunnels
3. development does not compromise the state’s ability to construct state-controlled transport tunnels and future state-controlled transport tunnels, or significantly increase the cost to construct state-controlled transport tunnels
4. development does not compromise the state’s ability to maintain and operate state-controlled transport tunnels, or significantly increase the cost to maintain and operate state-controlled transport tunnels
5. the community is protected from significant adverse impacts resulting from environmental emissions generated by state-controlled transport tunnels.

Note: A document to provide guidance on how to comply with the performance outcomes of this code is currently being drafted by the Department of Transport and Main Roads.

5.2 Performance outcomes and acceptable outcomes

All development in a state-controlled transport tunnel environment should demonstrate compliance with the relevant provisions of table 5.2.1.

All development in a future state-controlled transport tunnel environment should demonstrate compliance with the relevant provisions of table 5.2.2.

Table 5.2.1: Development in a state-controlled tunnel environment

5.4 Glossary of Terms

**Accommodation activity** means any of the following:
1. caretaker’s accommodation
2. community residence
3. dual occupancy
4. dwelling house
5. dwelling unit
6. multiple dwelling
7. relocatable home park
8. residential care facility
9. resort complex
10. retirement facility
11. rooming accommodation
12. short-term accommodation
13. tourist park
14. a development with a combination of uses 1 to 13.

**Actionable nuisance** means where stormwater or surface water drainage to a downstream property causes a loss of enjoyment of property or physical damage to property (termed ‘nuisance’) such that the nuisance is actionable in law.

Note: See the Queensland Urban Drainage Manual, Institute of Public Works Engineering Australasia (Queensland Division), Fourth edition, 2016, for further information.

**ADG code** see schedule 1 of the *Work Health and Safety Act 2011*.

Note: **ADG code** means the Australian Code for the Transport of Dangerous goods by Road and Rail approved by the Australian Transport Council, as updated from time to time.

**Childcare centre** see schedule 24 of the Planning Regulation 2017.

Note: **Childcare centre** means the premises used for minding or care, but not residence, of children.

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The **DA mapping system** is available on the department’s website.

**Dangerous goods** see schedule 1 of the *Work Health and Safety Act 2011*.

Note: **Dangerous goods** means:
1. asbestos; or
2. anything defined under the **ADG code** as:
   a. **dangerous goods**; or
   b. goods too dangerous to be transported.

**Educational establishment** see schedule 24 of the Planning Regulation 2017.

Note: **Educational establishment** means premises used for training and instruction designed to impart knowledge and develop skills. **Educational establishment** includes the following uses and activities if they are ancillary:
1. on-site student accommodation
2. on-site before and after school care
3. on site vacation care.

**Future state-controlled transport tunnel** see schedule 24 of the Planning Regulation 2017.

Note: **Future state-controlled transport tunnel** means a tunnel that forms part of a **future state transport corridor**.
Future state transport corridor see schedule 24 of the Planning Regulation 2017.
Note: Future State transport corridor means:
1. a future state-controlled road; or
2. a future railway corridor; or
3. a future busway corridor; or
4. a future light rail corridor.
See the DA mapping system.

Hospital see schedule 24 of the Planning Regulation 2017.
Note: Hospital means the use of premises for:
1. the medical or surgical care or treatment of patients, whether or not the care or treatment requires overnight accommodation
2. providing accommodation for patients.

Hospital includes the use of premises for providing accommodation for employees and other activities that are ancillary to the hospital.

Loading means pressure or force exerted on land or infrastructure.

Outdoor education area means outdoor areas intended for use for the training or teaching of persons. This term does not include playgrounds or outdoor sport and recreational areas.

Outdoor play area see the Queensland Development Code.
Note: Outdoor play area means an unenclosed area located outside the external walls of the building. This term only includes playgrounds/play areas in a childcare centre or educational establishment.

Outdoor spaces for passive recreation means private open space, communal open space or public open space.

Retaining structures means retention structures and systems such as walls, batters, anchors, bolts, soil nails, shoring, piles, piers, beams and similar structures.

Structure means any built structure as well as retaining structures.

State-controlled transport tunnel see schedule 24 of the Planning Regulation 2017.
Note: State-controlled transport tunnel means a tunnel that forms part of a state transport corridor.
See the DA mapping system.

State-controlled transport tunnel portal means the entrance to a tunnel.

5.5 Abbreviations

RPEQ – Registered Professional Engineer of Queensland
State code 6: Protection of state transport networks

6.1 Purpose statement

The purpose of this code is to:

1. protect state transport infrastructure, public passenger transport infrastructure and public passenger services from the adverse impacts of development
2. maintain the operational performance of the transport network
3. ensure development enables safe and convenient access to public passenger transport.

Specifically, this code seeks to ensure development:

1. does not create a safety hazard for users of state transport infrastructure or public passenger services by increasing the likelihood or frequency of a fatality or serious injury
2. does not result in a worsening of the physical condition or operating performance of the state transport network
3. does not compromise the state’s ability to cost-effectively construct, operate and maintain state transport infrastructure
4. provides public passenger transport infrastructure to enable development to be serviced by public passenger transport
5. provides safe and direct access to public passenger transport infrastructure, including access by cycling and walking.

6.2 Performance outcomes and acceptable outcomes

Table 6.2.1 identifies which performance outcomes in table 6.2.2 and 6.2.3 are relevant for the development types listed in schedule 20 of the Planning Regulation 2017.

All development should demonstrate compliance with the relevant provisions of table 6.2.2 and table 6.2.3, where relevant.

### 6.4 Glossary of terms

**Accommodation activity** means any of the following:

- caretaker’s accommodation
- community residence
- dual occupancy
- dwelling house
- dwelling unit
- multiple dwelling
- relocatable home park
- **residential care facility**
- resort complex
- retirement facility
11. rooming accommodation
12. short-term accommodation
13. tourist park
14. a development with a combination of uses 1 to 13.

Note: Arterial road means a road that predominantly carries through traffic from one region to another, forming principal avenues of travel for traffic movements.

Club see schedule 24 of the Planning Regulation 2017.
Note: Club means the use of premises for:
1. an association established for literary, political, sporting, athletic or other similar purposes; or
2. preparing and selling food or drink, if the use is ancillary to the use in paragraph 1.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.
Note: The DA mapping system is available on the department’s website.

Educational establishment see schedule 24 of the Planning Regulation 2017.
Note: Educational establishment means the use of premises for:
1. training and instruction to impart knowledge and develop skills; or
2. student accommodation, before or after school care, or vacation care if the use is ancillary to the use in paragraph 1.

Extractive industry see schedule 24 of the Planning Regulation 2017.
Note: Extractive industry means the use of premises for:
1. extracting or processing extractive resources
2. any related activities, including, for example, transporting the resources to market.

Function facility see schedule 24 of the Planning Regulation 2017.
Note: Function facility means the use of premises for:
1. receptions or functions; or
2. preparing and providing food and liquor for consumption on the premises as part of a reception or function.

High impact industry see schedule 24 of the Planning Regulation 2017.
Note: High impact industry means the use of premises used for an industrial activity:
1. that is the manufacturing, producing, processing, repairing, altering, recycling, storing, distributing, transferring or treating of products
2. that a local planning instrument applying to the premises states is a high impact industry
3. that complies with any thresholds for the activity stated in a local planning instrument applying to the preemies, including, for example, thresholds relating to the number of products manufactured or the level of emissions produced by the activity.

Hospital see schedule 24 of the Planning Regulation 2017.
Note: Hospital means the use of premises for:
1. the medical or surgical care or treatment of patients, whether or not the care or treatment requires overnight accommodation; or
2. providing accommodation for patients; or
3. providing accommodation for employees, or any other use, if the use is ancillary to the use in paragraphs 1 or 2.

Hotel see the schedule 24 of Planning Regulation 2017.
Note: Hotel means the use of premises for:
1. selling liquor for consumption on the premises
2. a dining or entertainment activity, or short-term accommodation if the use is ancillary to the use in sub-paragraph 1; but
3. does not include a bar.

Intensive animal industry see schedule 24 of the Planning Regulation 2017.
Note: Intensive animal industry means the use of premises for:
1. the intensive production of animals or animal products, in an enclosure, that requires food and water to be provided mechanically or by hand; or
2. storing and packing feed and produce, if the use is ancillary to the use in paragraph 1; but
3. does not include the cultivation of aquatic animals.

Lawful point of discharge see the Queensland Urban Drainage Manual 2016.
Note: Lawful point of discharge means a point of discharge of stormwater from an allotment that is considered to satisfy the requirements specifically outlined within the Queensland Urban Drainage Manual, 2016. (See section 3.9 of the Queensland Urban Drainage Manual, 2016, for further information).
**Limited access policy** see the *Transport Infrastructure Act 1994.*

**Note:** Limited access policy means a policy for a limited access road prepared under section 54(4) of the *Transport Infrastructure Act 1994.* A limited access policy can be obtained by contacting the appropriate Department of Transport and Main Roads’ regional office.

**Limited access road** see the *Transport Infrastructure Act 1994.*

**Note:** Limited access road means a state-controlled road, or part of a state-controlled road, declared to be a limited access road under section 54 of the *Transport Infrastructure Act 1994.*

See the DA mapping system.

**Local road** means a road controlled by a local government authority.

**Major sport, recreation and entertainment facility** see schedule 24 of the Planning Regulation 2017.

**Note:** Major sport, recreation and entertainment facility means the use of premises for large-scale events, including, for example, major sporting, recreation, conference or entertainment events.

**New or changed access** see schedule 24 of the Planning Regulation 2017.

**Note:** New or changed access means:
1. the use of a new location as a relevant vehicular access between the premises and the road or corridor; or
2. the construction of a new relevant vehicular access between the premises and the road or corridor; or
3. the extension of an existing relevant vehicular access between the premises and the road or corridor; or
4. an increase in the number of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor; or
5. a change in the type of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor.

**Planned upgrade** means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified:
1. in a publicly available government document; or
2. in written advice to affected land owners.

**Note:** Government documents are Commonwealth, state or local government documents that include a statement of intent for, or a commitment to, a planning outcome or infrastructure provision.

See the DA mapping system.

**Public passenger service** see schedule 3 of the *Transport Operations (Passenger Transport) Act 1994.*

**Note:** Public passenger service means a service for the carriage of passengers if:
1. the service is provided for fare or other consideration
2. the service is provided in the course of a trade or business (but not if it is provided by an employer solely for employees)
3. the service is a courtesy or community transport service; and
4. includes a driver service and a service for the administration of taxi services, but does not include a service excluded from the *Transport Operations (Passenger Transport) Act 1994* by a regulation.

**Public passenger transport** see section 3 of the *Transport Planning and Coordination Act 1994.*

**Note:** Public passenger transport means the carriage of passengers by a public passenger service using a public passenger vehicle.

**Public passenger transport infrastructure** see section 3 of the *Transport Planning and Coordination Act 1994.*

**Note:** Public passenger transport infrastructure means infrastructure for, or associated with, the provision of public passenger transport, including, but not limited to:
1. a transit terminal for public passenger services (for example, an airport terminal, a coach terminal, a cruise ship terminal)
2. a ferry terminal, jetty, pontoon or landing for ferry services
3. a bus stop, bus shelter, bus station or bus lay-by
4. a busway station
5. a light rail station
6. a taxi rank, limousine rank or limousine standing area
7. a railway station
8. vehicle parking and set-down facilities
9. pedestrian and bicycle paths and bicycle facilities; or
10. a road on which a public passenger transport service operates.

**Rail transport infrastructure** see schedule 6 of the *Transport Infrastructure Act 1994.*

**Note:** Rail transport infrastructure means facilities necessary for operating a railway, including:
1. railway track and works built for the railway, including for example:
   a. cuttings; or
   b. drainage works; or
   c. excavations; or
   d. land fill; or
e. track support earthworks any of the following things that are associated with the railway's operation:
   i. bridges; or
   ii. communication systems; or
   iii. machinery and other equipment; or
   iv. marshalling yards; or
   v. noticeboards, notice markers and signs; or
   vi. overhead electrical power supply systems; or
   vii. over-track structures; or
   viii. platforms; or
   ix. power and communication cables; or
   x. service roads; or
   xi. signalling facilities and equipment; or
   xii. stations; or
   xiii. survey stations, pegs and marks; or
   xiv. train operation control facilities; or
   xv. tunnels; or
   xvi. under-track structures vehicle parking and set down facilities for intending passengers for a railway that are controlled or owned by a railway manager or the chief executive [TIA]; or
   xvii. pedestrian facilities, including footpath paving, for the railway that are controlled or owned by a railway manager or the chief executive [TIA], but does not include other rail infrastructure.

**Railway** see schedule 6 of the *Transport Infrastructure Act 1994*.  
Note: Railway means a guided system, or proposed guided system, designed for the movement of rolling stock that is capable of transporting passengers or freight, or both, on a railway track, and:
1. includes:
   a. rail transport infrastructure:
   b. a railway being or proposed to be built on future railway land; but
2. does not include:
   a. rolling stock;
   b. a railway mentioned in section 107(2) of the *Transport Infrastructure Act 1994*.

See the DA mapping system.

**Railway crossing** see schedule 6 of the *Transport Infrastructure Act 1994*.  
Note: Railway crossing means a level crossing, bridge or another structure used to cross over or under a railway.

**Residential care facility** see schedule 24 of the Planning Regulation 2017.  
Note: Residential care facility means the use of premises for supervised accommodation, and medical and other support services, for persons who:
1. cannot live independently; or
2. require regular nursing or personal care.

**Road hump** see part 13, Local area traffic management, section 1, clause 1.3.5 of the Manual of Uniform Traffic Control Devices (MUTCD).  
Note: Road hump means a raised transverse section of road causing sharp vertical displacement of vehicles, which is provided as a speed reduction (traffic calming) measure.

**Road transport infrastructure** see schedule 6 of the *Transport Infrastructure Act 1994*.  
Note: Road transport infrastructure means transport infrastructure relating to roads.

**Shop** see the schedule 24 of Planning Regulation 2017.  
Note: Shop means the use of premises for:
1. the display, sale or hire of goods; or
2. providing personal services or betting to the public.

**Shopping centre** see schedule 24 of the Planning Regulation 2017.  
Note: Shopping centre means the use of premises for an integrated shopping complex consisting mainly of shops.

**Short-term accommodation** see schedule 24 of the Planning Regulation 2017.  
Note: Short-term accommodation means the use of premises for:
1. providing accommodation of less than 3 consecutive months to tourists or travellers; or
2. a manager’s residence, office, or recreation facilities for the exclusive use of guests, if the use is ancillary to the use in paragraph 1; but
3. does not include a hotel, nature-based tourism, resort complex or tourist park.

**Special industry** see schedule 24 of the Planning Regulation 2017.
Note: Special industry means the use or premises for an industrial activity:
1. that is the manufacturing, producing, processing, repairing, altering, recycling, storing, distributing, transferring or treating of products
2. that a local planning instrument applying to the premises states is special industry
3. that complies with any thresholds for the activity stated in a local planning instrument applying to the premises, including, for example, thresholds relating to the number of products manufactured or the level of emissions produced by the activity.

State-controlled road means:
1. a state-controlled road within the meaning of the Transport Infrastructure Act 1994, schedule 6; or
2. state toll road corridor land.
Note: See the DA mapping system.

State transport corridor see schedule 24 of the Planning Regulation 2017.
Note: State transport corridor means:
1. a busway corridor; or
2. a light rail corridor; or
3. a railway corridor; or
4. a state-controlled road.

State transport infrastructure means any of the following:
1. state-controlled road; or
2. busway transport infrastructure under the Transport Infrastructure Act 1994; or
3. light rail transport infrastructure under the Transport Infrastructure Act 1994; or
4. rail transport infrastructure under the Transport Infrastructure Act 1994; or
5. other rail infrastructure under the Transport Infrastructure Act 1994; or
6. active transport infrastructure under the Transport Planning and Coordination Act 1994.

Taxi facilities see chapter 7 Public Transport Infrastructure Manual, Department of Transport and Main Roads, 2015.
Note: Taxi facilities means either a taxi rank or taxi bay.

Theatre see schedule 24 of the Planning Regulation 2017.
Note: Theatre means the use of premises for:
1. presenting movies, live entertainment or music to the public; or
2. the production of film or music; or
3. the following activities or facilities, if the use is ancillary to the use in paragraph 1 or 2:
   a. preparing and selling food and drink for consumption on the premises
   b. facilities for editing and post production
   c. facilities for wardrobe, laundry and make-up
   d. set construction workshops
   e. sound stages.

Tourist attraction see schedule 24 of the Planning Regulation 2017.
Note: Tourist attraction means the use of premises for:
1. providing entertainment to, or a recreation facility for, the general public; or
2. preparing and selling food or drink for consumption on the premises, if the use is ancillary to the use in paragraph 1.

Transport network means the series of connected routes, corridors and transport facilities required to move goods and passengers and includes roads, railways, public transport routes (for example, bus routes), active transport routes (for example, cycle ways), freight routes and local, state and privately owned infrastructure.

6.5 Abbreviations

RPEQ – Registered Professional Engineer of Queensland
State code 7: Maritime safety

7.1 Purpose statement

The purpose of the code is to ensure development:

1. supports the viable operation of aids to navigation
2. supports the safe operation of vessels in navigable waterways.

Note: Guidance for achieving the performance outcomes and acceptable solutions for this state code is available in the State Development Assessment Provisions Supporting Information – Marine Safety, Department of Transport and Main Roads, 2016.

7.2 Performance outcomes and acceptable outcomes

Development that is operational work in tidal waters should demonstrate compliance with the relevant provisions of table 7.2.1.

Table 7.2.1: Operational work

<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Lighting</strong></td>
<td></td>
</tr>
</tbody>
</table>
| PO1 Development avoids lighting that has the potential to interfere with aids to navigation. | AO1.1 Development ensures that at all times, all lights on or above the development site do not interfere with safe navigation in surrounding waterways by:
1. shielding lights to prevent glare or reflection
2. avoiding flood lighting which may reduce the visibility of aids to navigation
3. avoiding flashing or flickering lights which may be confused with aids to navigation
4. avoiding coloured lights such as green, blue or red lights, which may be confused with aids to navigation.

AND

AO1.2 Lighting complies with section 3 of AS 4282-1997 Control of the obtrusive effects of outdoor lighting. |
| **Aids to navigation** |                     |
| PO2 Development does not interfere with aids to navigation. | AO2.1 Development does not remove any material that may destabilise an aid to navigation, including ground tackle.

AND

AO2.2 Development does not create any temporary or permanent obstruction of aids to navigation.

Note: Where development has the potential to obstruct the line of sight to aids to navigation or interfere with the functioning of aids to navigation, an aid to navigation management plan is required.

AND |
<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
</table>
| **AO2.3** Development keeps sight lines of any aids to navigation which cross the land clear of obstructions.  
Note: Where development has the potential to obstruct the line of sight to aids to navigation or interfere with the functioning of aids to navigation, an aid to navigation management plan is required.  
AND  
**AO2.4** Development ensures ongoing access to aids to navigation for maintenance purposes.  
AND  
**AO2.5** Development does not result in electrical or electro-magnetic emissions which may impede the operation of aids to navigation.  |

<tr>
<td><strong>PO3</strong> Development does not impede the safe movement of vessels in a navigable waterway.</td>
<td></td>
</tr>
</tbody>
</table>
| **AO3.1** Development ensures navigable waterways are open to vessel traffic at all times.  
AND  
**AO3.2** Development, including structures and any vessel berthed at the structures:  
1. does not encroach into, pass over or under a navigation corridor; or  
2. is not located in a high-risk maritime development zone.  
Note: Navigation corridor and high-risk maritime development zone layers are currently unavailable for Gold Coast waters.  
AND  
**AO3.3** Development does not limit either the depth of a navigable waterway or the size of vessels which can safely navigate the waterway.  
Note: Where development proposes to temporarily or permanently limit the depth of a navigable waterway or the size of vessels which can navigate a waterway, it is recommended that a vessel traffic management plan be provided. It is also recommended a marine execution plan be submitted to the regional harbour master 30 days prior to the commencement of works.  
AND  
**AO3.4** Development involving the demolition of structures in a navigable waterway, including piling, ensures the entire structure is removed.  
AND  |
### Performance outcomes

<table>

</table>

### 7.3 Reference documents

- **Department of Transport and Main Roads 2016**, *State Development Assessment Provisions Supporting Information – Maritime Safety*
- **Standards Australia 1997**, AS 4282–1997 *Control of the obtrusive effects of outdoor lighting*

### 7.4 Glossary of terms

**Aid to navigation** see section 104 of the *Transport Operations (Marine Safety) Act 1994.*

*Note:* An aid to navigation:
1. is a device designed to be used for navigation or the guidance or mariners, including a device to help in:
   a. fixing a ship’s position; or
   b. deciding a safe course for a ship; or
   c. warning a ship of dangers or obstructions (for example: beacon, buoy, light, lighthouse, marine mark, radio aid or signal)
2. includes any structure or equipment ancillary to the aid to navigation (for example: the battery house providing a lighthouse with power; lifesaving equipment that is part of an aid to navigation)
3. does not include a device on board a ship.

**Aid to navigation management plan** includes information on changes to and potential obstructions of existing aids to navigation resulting from the proposed development project for all stages of the proposal lifecycle, to ensure safety of navigation at all times.

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

*Note:* The DA mapping system is available on the department’s website.

**Gold Coast waters** see section 7 of the *Gold Coast Waterways Authority Act 2012.*

*Note:* The Gold Coast Waterways Authority has responsibility for Gold Coast waters which include the inland waterways within the City of Gold Coast local government area as well as the areas at the mouth of the Nerang River, Currimbin Creek and Tallebudgera Creek.

**High risk maritime development zone** means areas indicated in the DA mapping system as high-risk maritime development zone. These are areas in the vicinity of ports, state boat harbours, marinas, and navigationally difficult areas such as waterways which experience significant shoaling and waters between and around populated islands.

**High risk maritime development zone** includes:
1. marinas with six or more boats
2. state boat harbours
3. port limits and/or pilotage areas
4. sensitive marine environments including areas of constant sand movement
5. from the coast to the extent of Queensland waters (three nautical miles).

**Marine execution plan** includes detailed information about all development related vessels and their operations during each of the stages of construction, and the relevant impacts on the availability of the navigable waterway to vessel traffic.
Navigation corridor means areas indicated in the DA mapping system as navigation corridor. These are the sections of a navigable tidal waterway allocated for the movement of vessels.

Navigable waterway means waters with a sufficient depth and width to allow safe passage by all vessel sizes and types that frequently use the area.

Vessel traffic management plan includes information on changes and increases to local vessel traffic resulting from the proposed development project and methods of cumulative vessel traffic management for all stages of the proposal lifecycle, to ensure safety of navigation at all times.
8.1 Purpose statement

The purpose of this code is to ensure that development is designed and located to:

1. protect life, buildings and infrastructure from the impacts of coastal erosion
2. maintain coastal processes
3. conserve coastal resources
4. maintain appropriate public use of, and access to and along, state coastal land
5. account for the projected impacts of climate change; and
6. avoid impacts on matters of state environmental significance and, where avoidance is not reasonably possible, minimise and mitigate impacts, and provide an offset for significant residual impacts where appropriate.

In addition to the above, the purpose of this code is to ensure that development involving operational works which is not assessed by local government is designed and located to protect life and property from the impacts of storm tide inundation.

Note: Guidance on achieving compliance with the performance outcomes and acceptable outcomes in the code is provided in the Guideline – SDAP State code 8: Coastal development and tidal works, Department of Environment and Heritage Protection, 2017. Guidance for determining if development will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.

8.2 Performance outcomes and acceptable outcomes

All development should demonstrate compliance with the relevant provisions of table 8.2.1. Development involving operational work should also demonstrate compliance with the relevant provisions of table 8.2.2. Development involving operational work which is not assessed by local government should demonstrate compliance with the relevant provisions of table 8.2.1, table 8.2.2 and table 8.2.3.

</tbody>
</table>
2. ensures that the protective function of landforms and vegetation is maintained.

Note: In considering reconfiguring a lot applications, the state may require land in the erosion prone area to be surrendered to the State for coastal management purposes under the Coastal Protection and Management Act 1995.

Where the planning chief executive receives a copy of a land surrender requirement or proposed land surrender notice under the Coastal Protection and Management Act 1995, this must be considered in assessing the application.

2. supported by a monitoring and management plan that protects the marine environment and that complies with the National Assessment Guidelines for Dredging 2009, Department of Environment and Energy, 2009, or later version. |                     |
Performance outcomes | Acceptable outcomes
--- | ---
**Reclamation**
PO22 Development does not involve reclamation of land below tidal water, other than for the purposes of:
1. coastal-dependent development, public marine development or community infrastructure; or
2. strategic ports, priority ports, boat harbours or strategic airports and aviation facilities, in accordance with a statutory land use plan or master plan, where there is a demonstrated net benefit for the state or region and no feasible alternative exists; or
3. coastal protection work or work necessary to protect coastal resources or coastal processes.
No acceptable outcome is prescribed.

8.4 Glossary of terms

Artificial waterway see section 8 of the Coastal Protection and Management Act 1995.

Note: Artificial waterway means an artificial channel, lake or other body of water. An artificial waterway includes:
1. an access channel
2. an artificial channel that is formed because land has been reclaimed from tidal water and is intended to allow boating access to allotments on subdivided land
3. other artificial channels subject to the ebb and flow of the tide
4. any additions or alterations to an artificial waterway.

However, an artificial waterway does not include the following:
1. a swimming pool
2. an ornamental pond of no more than 5 000 square metres in area
3. a pond for aquaculture or for treating effluent
4. a freshwater storage reservoir for domestic water supply
5. a water storage facility situated on a natural watercourse and used for irrigation or other agricultural purposes
6. a part of a river, creek or stream in which water flows in a natural channel, whether artificially improved or not
7. a drain for carrying stormwater or other material
8. any of the following used for accessing port infrastructure if constructed in the area of a port for which a port authority or port operator is responsible:
   a. a navigation channel
   b. a harbour swing basin
   c. a berth pocket
   d. a berth approach or departure path.

Beach nourishment means the replenishment of a beach system using imported sediment to balance erosion losses or to re-establish a wider beach and dune system. It does not include the creation of a new beach.

Beneficial reuse means using dredged material for a purpose that provides social, economic or environmental benefits (or a combination of these). It includes beach nourishment, reclamation, environmental restoration purposes (such as restoring wetlands or nesting islands) and use on land for fill or construction purposes.

Category C areas means areas of high value regrowth vegetation classed as ‘endangered’ or ‘of concern’ under the Vegetation Management Act 1999 that are shown on the regulated vegetation management map as category C areas.

Category R areas means regrowth watercourse and drainage feature areas under the Vegetation Management Act 1999 that are shown on the regulated vegetation management map as category R areas.

Coastal building line see the Coastal Protection and Management Act 1995. Note: Coastal building line means a line declared as a coastal building line under the Coastal Protection and Management Act 1995.

Coastal-dependent development:
1. means development that in order to function must be located in tidal waters or be able to access tidal water; and
2. may include, but is not limited to:
   a. industrial and commercial facilities such as ports, harbours and navigation channels and facilities, aquaculture involving marine species, desalination plants, tidal generators, coastal protection works, erosion control structures, public marine development and beach nourishment
   b. tourism facilities for marine (boating) purposes
   c. community facilities and sporting facilities which require access to tidal water in order to function, such as surf clubs, marine rescue, rowing and sailing clubs; or
   d. co-located residential and tourist uses that are part of an integrated development proposal (e.g. mixed use development) incorporating a marina, if these uses are located directly landward of the marina and appropriately protected from natural hazards; but
3. does not include:
   a. residential development, including canal development, as the primary use
   b. waste management facilities, such as landfills, sewerage treatment plants; or
   c. transport infrastructure, other than for access to the coast.

Coastal erosion means the loss of land or the removal of beach or dune sediments by wave action, wind action, tidal currents or water flows or by permanent inundation due to sea level rise.

Coastal management district see the Planning Regulation 2017. Note: Coastal management district means a coastal management district under the Coastal Protection and Management Act 1995, other than an area declared under section 54(2) of that Act.

Coastal processes means the natural processes of the coast, including:
1. sediment transport to and along the coast
2. wind, waves, tides and currents which transfer energy to the coast and drive sediment transport
3. fluctuations in the location and form of landforms and the foreshore and associated ecosystems from sediment transport (erosion and land building); and
4. changes in sea level; ecological processes (including growth and spread of native plants); and the natural water cycle (for example coastal wetlands’ role in filtration and flood mitigation).
Coastal protection work means any permanent or periodic work undertaken primarily to manage the impacts of coastal erosion or storm tide inundation, including the use of erosion control structures and altering coastal processes such as sediment transport.

Coastal resources means the natural resources of the coastal zone. It includes natural and physical features and landforms, coastal processes, vegetation, wildlife, the marine environment, quarry material, soil, water and air.

DA mapping system means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The DA mapping system is available on the department’s website.

Defined storm tide event (DSTE) means the event, measured in terms of likelihood of reoccurrence, and associated inundation level adopted to manage the development of a particular area. The DSTE is equivalent to a one in 100 year average recurrence interval storm event incorporating:

1. sea level rise; and
2. an increase in cyclone intensity by 10 percent relative to maximum potential intensity.

Note: Where storm tide inundation levels have not been determined by a local study, the defined storm tide event level can be determined by reference to default storm tide inundation area mapping, as depicted in the DA mapping system. In these mapping layers, storm tide inundation is based on default values of 1.5 metres above highest astronomical tide (HAT) for South East Queensland and 2.0 metres above HAT for the remainder of the state. Where required, the storm tide level can be related back to Australian Height Datum by reference to the Queensland Tide Tables.

Defined storm tide event level means the peak water level reached during a defined storm tide event.

Dredged material means mud, sand, coral, shingle, gravel, clay, earth and other material removed by dredging from the bed in tidal water. Dredged material includes dredge spoil, quarry material where it is removed from tidal water as a commercial product and sand dredged for beach nourishment.

Dredging means the mechanical removal of dredged material from below tidal water. It excludes minor adjustments to the bed surface to level troughs and peaks and where bed material is only redistributed locally (bed levelling).

Dry-land marina means a marina created by the excavation of land above the high-water mark.

Environmental value see the Environmental Protection Act 1994.

Note: Environmental value means:

1. a quality or physical characteristic of the environment that is conducive to ecological health or public amenity or safety; or
2. another quality of the environment identified and declared to be an environmental value under an environmental protection policy or regulation.

The Environmental Protection (Water) Policy 2009 states the environmental values of waters.

Erosion control structure means a structure designed to protect land or to permanently alter sediment transport processes and includes a structure such as a seawall or revetment (rock walls), groyne, artificial reef, or breakwater.

Erosion prone area means an area declared to be an erosion prone area under section 70(1) of the Coastal Protection and Management Act 1995.

Note: The erosion prone area is indicatively shown on the DA mapping system.

Erosion prone areas are identified in accordance with the methodology set out in the Coastal Hazard Technical Guide, Department of Environment and Heritage Protection, 2013 and use the following factors to account for the projected impacts of climate change by the year 2100:

1. a sea level rise factor of 0.8 metres
2. an increase in the maximum cyclone intensity by 10 percent.

Essential community infrastructure includes:

1. emergency services infrastructure
2. emergency shelters
3. police facilities
4. hospitals and associated facilities
5. stores of valuable records or heritage items
6. infrastructure forming part of the electricity transmission grid or supply network
7. communications facilities
8. sewerage treatment plants
9. water treatment plants

Marine access purpose means a structure in tidal water used to facilitate vessel access for people between land and a navigable waterway. This includes jetties, pontoons and boat ramps but excludes decks and boardwalks.

Matters of state environmental significance see schedule 2 of the Environmental Offsets Regulation 2014.

Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:

1. regional ecosystems under the Vegetation Management Act 1999 that:
   a. are endangered regional ecosystems
   b. are of concern regional ecosystems
   c. intersect with a wetland shown on the vegetation management wetlands map
   d. contain areas of essential habitat shown on the essential habitat map for an animal that is endangered wildlife or vulnerable wildlife or a plant that is endangered wildlife or vulnerable wildlife
   e. are located within the defined distances stated in the Environmental Offsets Policy 2014 from the defining banks of a relevant watercourse or drainage feature as shown on the vegetation management watercourse and drainage feature map
   f. contain remnant vegetation and are areas of land determined to be required for ecosystem functioning (‘connectivity areas’)
2. wetlands in a wetland protection area or wetlands of high ecological significance shown on the Map of referable wetlands under the Environmental Protection Regulation 2008
3. wetlands and watercourses in high ecological value waters as defined in schedule 2 of the Environmental Offsets Act 2014
4. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014
5. threatened wildlife under the Nature Conservation Act 1992 and special least concern animals under the Nature Conservation (Wildlife) Regulation 2006
6. protected areas under the Nature Conservation Act 1992 excluding coordinated conservation areas
7. highly protected zones of state marine parks under the Marine Parks Act 2004
8. declared fish habitat areas under the Fisheries Act 1994
9. waterways that provide for fish passage under the Fisheries Act 1994 if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway
10. marine plants under the Fisheries Act 1994
11. legally secured offset areas.

Navigable waterway means waters with a sufficient depth and width to allow safe passage by all vessel sizes and types that frequently use the area.

Offset means environmental offset under the Environmental Offsets Act 2014.

Note: Environmental offset means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a prescribed environmental matter, delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2016. The prescribed environmental matters assessed under the SDAP are matters of state environmental significance.

Prescribed environmental matters see the Environmental Offsets Regulation 2014.

Note: A prescribed environmental matter is any species, ecosystem or other similar matter protected under Queensland legislation for which an environmental offset may be provided. A prescribed environmental matter may be a matter of national, state or local environmental significance, however, assessment criteria in the SDAP only relate to matters of state environmental significance. Each of the prescribed environmental matters are listed under the Environmental Offsets Regulation 2014.

Prescribed water contaminants see the Environmental Protection Act 1994.

Note: See schedule 9 of the Environmental Protection Regulation 2008 for a list of prescribed water contaminants.

Private marine development means a work for a non-commercial purpose attached to private land and extending over abutting tidal water.

Public marine development means development for public use that requires location in or adjacent to tidal water to function.
Reclamation see the Coastal Protection and Management Act 1995.
Note: Reclamation of land under tidal water means raising the land above the high-water mark, whether gradually and imperceptibly or otherwise, by carrying out works, including dredging and the depositing of solid material.

Redevelopment means development that affects permanent built structures on an already developed site. Redevelopment includes the expansion of a building footprint or addition of a structure, reconstruction or remodelling an exterior, demolition and replacement of existing structures.

Sea level rise means an increase in sea level caused by global warming due to climate change. Sea level rise is projected to be 0.8 metres from the present day to 2100.
Note: Sea level rise projections based on the best available science are prepared by the Intergovernmental Panel on Climate Change.

Significant residual impact see the Environmental Offsets Act 2014.
Note: Significant residual impact is an impact, whether direct or indirect, of a prescribed activity on all or part of a prescribed environmental matter that:
1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity
2. is, or will or is likely to be, significant.

Guidance for determining if a prescribed activity will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department State Development, Infrastructure and Planning, 2014.

State coastal land see the Coastal Protection and Management Act 1995.
Note: State coastal land means land in a coastal management district other than land that is:
1. freehold land, or land contracted to be granted in fee simple by the state; or
2. a state forest or timber reserve under the Forestry Act 1959; or
3. in a watercourse or lake as defined under the Water Act 2000; or
4. subject to a lease or licence issued by the state.

State coastal land includes land that is, or is at any time, covered by tidal water.

Storm tide inundation means temporary inundation of land by abnormally high ocean levels caused by cyclones and severe storms.

Temporary, readily relocatable or able to be abandoned means a structure that, if threatened by coastal erosion, will be relocated, removed or allowed to be lost rather than protected from the impacts because it is:
1. of low economic value; and
2. is capable of being disassembled, is easily removed, or loss by erosion is of low consequence; and
3. is not an intrinsic part of infrastructure or will have high social value or need; or
4. intended to remain in place for only a short period and then removed, whether or not it is threatened by coastal erosion.

Tidal prism volume means the volume of water for a specified area between the mean high water springs and mean low water springs tidal planes, or the volume of water leaving an estuary during the ebb tide.

Tidal water see the Coastal Protection and Management Act 1995.
Note: Tidal water means:
1. the sea and any part of a harbour or watercourse ordinarily within the ebb and flow of the tide at spring tides; or
2. the water downstream from a downstream limit as defined under the Water Act 2000.

Water quality objectives means the numerical concentration limits, mass or volume limits per unit of time or narrative statements of indicators established for waters to enhance or protection the environmental values for those waters set out in:
1. schedule 1 of the Environmental Protection (Water) Policy 2009, for water mentioned in the policy; or
2. otherwise, the Queensland Water Quality Guidelines 2009.
State code 9: Great Barrier Reef wetland protection areas

9.1 Purpose statement

The purpose of this code is to ensure that development involving high impact earthworks in a wetland protection area is located outside of a wetland and:

1. is designed, constructed and operated to enhance or protect wetland environmental values; or
2. is designed, constructed and operated to avoid or mitigate adverse impacts on wetland environmental values; or
3. demonstrates that after all reasonable impact avoidance measures have been, or will be, undertaken, the development constitutes an acceptable impact on wetland environmental values; or
4. avoids impacts on matters of state environmental significance, and where avoidance is not reasonably possible, minimises and mitigates impacts, and provides an offset for significant residual impacts where appropriate.

Note: Guidance on achieving compliance with the performance outcomes in the code is provided in the Guideline - State Code 9: Great Barrier Reef wetland protection areas. Guidance for determining if development will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.

9.2 Performance outcomes and acceptable outcomes

Development that is operational works, a material change of use or reconfiguration of a lot involving high impact earthworks in a wetland protection area should demonstrate compliance with the relevant provisions in table 9.2.1.

Table 9.2.1: All development

Performance outcomes | Acceptable outcomes
--- | ---
where adverse impacts cannot be reasonably avoided, impacts are mitigated. | No acceptable outcome is prescribed.
PO5 Development does not use the wetland in the wetland protection area for stormwater treatment. | No acceptable outcome is prescribed.

Land degradation
PO6 Development avoids land degradation in the wetland protection area and, where land degradation cannot be reasonably avoided, it is mitigated. | No acceptable outcome is prescribed.

Vegetation
PO7 Development outside the wetland and its buffer: avoids impacts on category C areas of vegetation and category R areas of vegetation; or minimises and mitigates impacts on category C areas of vegetation and category R areas of vegetation after demonstrating avoidance is not reasonably possible. | No acceptable outcome is prescribed.

Fauna management
PO8 Development: protects wetland fauna from any impacts associated with noise, light or visual disturbance protects the movement of wetland fauna within and through a wetland protection area; and does not introduce pest plants, pest animals or exotic species into a wetland and its buffer. | No acceptable outcome is prescribed.

Matters of state environmental significance
PO9 Development outside the wetland: avoids impacts on matters of state environmental significance; or minimises and mitigates impacts on matters of state environmental significance after demonstrating avoidance is not reasonably possible; and provides an offset if, after demonstrating all reasonable avoidance minimisation and mitigation measures are undertaken, the development results in an acceptable significant residual impact on a matter of state environmental significance. | No acceptable outcome is prescribed.

Note: Guidance for determining if the development will have a significant residual impact on the matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014. Where the significant residual impact is considered an acceptable impact on the matter of state environmental significance and an offset it considered appropriate, the offset should be delivered in accordance with the Environmental Offsets Act 2004.

9.3 Reference documents
Department of Environment and Heritage Protection 2016, Environmental offsets framework documents
9.4 Glossary of terms

Buffer means the transition zone between a wetland and any surrounding land use that supports the values and processes of the wetland and protects it from external threats.

Category C areas means areas of high value regrowth vegetation classed as ‘endangered’ or ‘of concern’ under the Vegetation Management Act 1999 that are shown on the regulated vegetation management map as category C areas.

Category R areas means regrowth watercourse and drainage feature areas under the Vegetation Management Act 1999 that are shown on the regulated vegetation management map as category R areas.

Environmental values, for wetlands, means values declared under section 81A of the Environmental Protection Regulation 2008 to be the environmental values for wetlands.

Note: From the Environmental Protection Act 1994, environmental value means:
1. a quality or physical characteristic of the environment that is conducive to ecological health or public amenity or safety; or
2. another quality of the environment identified and declared to be an environmental value under an environmental protection policy or regulation.

Exotic species means all non-native and non-endemic flora and fauna, including domestic pets.

High impact earthworks see schedule 24 of the Planning Regulation 2017.

Note: High impact earthworks means operational work that:
1. changes the form of land, or involves placing a structure on land, in a way that diverts water to or from a wetland in a wetland protection area; and
2. involves excavating or filling:
   a. if the work is carried out in the wetland or within 200 metres of the wetland – more than 100m³; or
   b. otherwise – more than 1000m³.

However, high impact earthworks does not include operational work that is:
1. excavating to establish underground infrastructure, other than infrastructure for drainage or stormwater flows, if the excavated land is to be restored, as far as practicable, to its original contours after the infrastructure is established; or
2. carried out for the maintenance of dams, fences, helipads, roads, stockyards, vehicular tracks or watering facilities; or
3. carried out for any of the following in relation to government supported transport infrastructure:
   a. the maintenance, servicing or repair of the infrastructure
   b. the replacement, rehabilitation, removal or alteration of the infrastructure
   c. the taking of preventative or remedial action
   d. the maintenance of systems and services associated with the infrastructure; or
4. carried out:
   a. in tidal water; or
   b. for a forest practice; or
   c. to reinstate earthworks destroyed by floods or landslides; or
   d. to restore or conserve the ecological processes or hydrological functions of a wetland protection area; or
   e. to laser level land without change to the previously levelled contours or slopes; or
   f. for government supported transport infrastructure for which the funding and construction arrangements were approved by the state or Commonwealth before 31 October 2011; or
5. carried out under:
   a. the Electricity Act 1994, section 101 or 112A; or
   b. the Fire and Emergency Services Act 1990, section 53, 68 or 69; or
   c. a geothermal exploration permit under the Geothermal Energy Act 2010; or
6. assessable development under schedule 12 [Operational work that is assessable development] if the work is:
   a. carried out completely or partly in a declared fish habitat area; or
   b. constructing or raising waterway barrier works.
Land degradation means:
1. soil erosion; or
2. rising water tables; or
3. the expression of salinity; or
4. stream bank instability; or
5. a process that results in declining water quality, including acid sulfate soil disturbance.

Map of referable wetlands see schedule 12 of the Environmental Protection Regulation 2008.
Note: Map of referable wetlands means a document approved by the chief executive [Environment] on 4 November 2011 and published by the Department of Environment and Heritage Protection, as amended from time to time by the chief executive [Environment] under section 144D of the Environmental Protection Regulation 2008.

Matters of state environmental significance see schedule 2 of the Environmental Offsets Regulation 2014.
Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:
   1. regional ecosystems under the Vegetation Management Act 1999 that:
      a. are endangered regional ecosystems
      b. are of concern regional ecosystems
   2. wetlands in a wetland protection area or wetlands of high ecological significance shown on the map of referable wetlands under the Environmental Protection Regulation 2008
   3. wetlands and watercourses in high ecological value waters as defined in schedule 2 of the Environmental Protection (Water) Policy 2009
   4. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014
   5. threatened wildlife under the Nature Conservation Act 1992 and special least concern animals under the Nature Conservation (Wildlife) Regulation 2006
   6. protected areas under the Nature Conservation Act 1992, excluding coordinated conservation areas
   7. highly protected zones of state marine parks under the Marine Parks Act 2004
   8. declared fish habitat areas under the Fisheries Act 1994
   9. waterways that provide for fish passage under the Fisheries Act 1994 if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway
10. marine plants under the Fisheries Act 1994; or
11. legally secured offset areas.

Offset means environmental offset under the Environmental Offsets Act 2014.
Note: Environmental offset means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a prescribed environmental matter, delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2016. The prescribed environmental matters assessed under the State Development Assessment Provisions are matters of state environmental significance.

Prescribed environmental matter see the Environmental Offsets Regulation 2014.
Note: A prescribed environmental matter is any species, ecosystem or other similar matter protected under Queensland legislation for which an offset may be provided. A prescribed environmental matter may be a matter of national, state or local environmental significance, however, assessment criteria in the State Development Assessment Provisions only relate to matters of state environmental significance. Each of the prescribed environmental matters are listed under the Environmental Offsets Regulation 2014.

Prescribed urban area
Note: Prescribed urban area for clearing native vegetation means:
1. an area identified in a gazette notice by the chief executive as an urban area; or
2. if no gazette notice has been published – an area identified as an area intended specifically for urban purposes, including future urban purposes (but not rural residential or future rural residential purposes) on a map in a planning scheme that:
   a. identifies the areas using cadastral boundaries
   b. is used exclusively or primarily to assess development applications.

Significant residual impact see the Environmental Offsets Act 2014.
Note: Significant residual impact is an impact, whether direct or indirect, of a prescribed activity on all or part of a prescribed environmental matter that:
1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity
2. is, or will or is likely to be, significant.
Guidance for determining if a prescribed activity will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.
Vegetation includes all native vegetation, including:
1. vegetation as defined under the Vegetation Management Act 1999; or
2. grass and non-woody herbage; or
3. a plant within a grassland regional ecosystem prescribed under a regulation; or
4. a mangrove.

Visual disturbance means the disturbance of fauna by visual intrusions that could lead to a loss or diminishment of key life cycle functions or changes to usage patterns of a wetland by mobile fauna (such as birds). This term include disturbance by people, pets or vehicles.

Note: Loss or diminishment of key life cycle may include, but is not limited to, nest abandonment or modified feeding patterns.

Wetland means an area shown as a wetland on the map of referable wetlands as defined within the Environmental Protection Regulation 2008.

Wetland environmental values means environmental values for wetlands described under section 81A of the Environmental Protection Regulation 2008. For section 9(b) of the Environmental Protection Act 1994, the qualities of a wetland that support and maintain the following are environmental values:
1. the health and biodiversity of the wetland’s ecosystems
2. the wetland’s natural state and biological integrity
3. the presence of distinct or unique features, plants or animals and their habitats, including threatened wildlife, near threatened wildlife and rare wildlife under the Nature Conservation Act 1992
4. the wetland’s natural hydrological cycle
5. the natural interaction of the wetland with other ecosystems, including other wetlands.

Wetland fauna means species that have adapted to living in wetlands and are dependent on them for:
1. all of their life cycle; or
2. a major part of their life; or
3. critical stages of their life cycle, such as breeding and larval development.

Wetland protection area means an area shown as a wetland protection area on the map of referable wetlands as defined within the Environmental Protection Regulation 2008.
State code 10: Taking or interfering with water

10.1 Purpose statement

The purpose of this code is to provide for the sustainable management of water by ensuring that development for taking or interfering with water:

1. maintains and where reasonably possible reverses degradation of:
   a. natural ecosystem processes
   b. riverine environment
   c. underground water systems
   d. physical integrity of watercourses
2. minimises adverse impacts on the:
   a. connectivity between underground water and water in a watercourse, lake or spring
   b. property of others
3. is consistent with the requirements of water planning instruments and authorities to take or interfere with water under the Water Act 2000
4. does not adversely impact the water security of other users and their access to the water resource
5. minimises the volume of overland flow water taken, consistent with the purpose of the development.

Note: Guidance on addressing code requirements is available in the State Development Assessment Provisions Guidance Material: State code 10: Taking or interfering with water, Department of Natural Resources and Mines, 2017.

10.2 Performance outcomes and acceptable outcomes

Development mentioned in table 10.2.1 should demonstrate compliance with the relevant provisions in table 10.2.2.

</tr>
</tbody>
</table>
| PO4 Works are consistent with any of the following, to the extent they are relevant to the proposed development:  
  1. a water plan  
  2. a water management protocol  
  a moratorium notice issued under the Water Act 2000. | No acceptable outcome is prescribed. |

Note: Moratorium notices are published on the Department of Natural Resources and Mines website.  
An example of a requirement in a water plan is a prescribed setback distance for new water bores from other existing water bores. These requirements will be different for each water plan.

| **Underground water** | |
| PO5 Works maintain the natural ecosystem processes of the underground water system. | No acceptable outcome is prescribed. |
| PO6 Works minimise impacts on connectivity between underground water and water in a watercourse, lake or spring. | No acceptable outcome is prescribed. |

| **Overland flow water** | |
| PO7 Works must not take overland flow water unless the works are:  
  1. for an activity prescribed by regulation under the Water Act 2000; or  
  2. for reconfiguring existing works; or  
  3. in a limited catchment area identified in a water plan; or  
  4. for contaminated agricultural run-off water; or  
  5. part of an environmentally relevant activity or under an environmental authority; or incidental to capturing coal seam gas water; or consistent with a water entitlement; or | No acceptable outcome is prescribed. |

10.4 Reference documents

Department of Natural Resources and Mines 2017, State Development Assessment Provisions Guidance Material: State code 10: Taking or interfering with water

Queensland Government Business and Industry Portal 2015, Overland flow works that require certification

10.5 Glossary of terms

Beneficial use means the resource such as water has a beneficial use other than disposal. An example of beneficial use is reusing or recycling water.

Best practice environmental management, for an activity, see the Environmental Protection Act 1994.

Note: The best practice environmental management of an activity is the management of the activity to achieve an ongoing minimisation of the activity’s environmental harm through cost-effective measures assessed against the measures currently used nationally and internationally for the activity. In deciding the best practice environmental management of an activity, regard must be had to the following measures:
1. strategic planning by the person carrying out, or proposing to carry out, the activity
2. administrative systems put into effect by the person, including staff training and monitoring and review of the systems
3. public consultation carried out by the person
4. product and process design; and
5. waste prevention, treatment and disposal.

Bywash means water that is diverted from a dam or reservoir and is usually associated with a pipe or other structure to prevent uncontrolled overtopping.

Certified report means a report:
1. produced and certified by a person:
   a. who is a Registered Professional Engineer of Queensland (RPEQ)
   b. who has relevant farm water supply discipline experience if the proposed development is for agricultural production
2. that is prepared in accordance with or consideration of the information on certified reports provided on the Queensland Government Business and Industry Portal for ‘overland flow works that require certification’.

Coal seam gas water means underground water brought to the surface of the earth or moved underground in connection with exploring for or producing coal seam gas.

Contaminated agricultural run-off water means overland flow water that contains, or is likely to contain, excess nutrients or farm chemicals at levels potentially harmful to the quality of water in a watercourse, lake or spring.

Environmental authority see the Environmental Protection Act 1994.

Note: Environmental authority means generally an environmental authority issued under section 195 of the Environmental Protection Act 1994 that approves an environmentally relevant activity applied for in an application.
Environmentally relevant activity (ERA) see the Environmental Protection Act 1994.
Note: Each of the following is an environmentally relevant activity:
1. an agricultural ERA as defined under section 75 of the Environmental Protection Act 1994
2. a resource activity as defined under section 107 of the Environmental Protection Act 1994
3. an activity prescribed under section 19 of the Environmental Protection Act 1994 as an environmentally relevant activity.

Existing works means works that allow taking of overland flow water that are in existence at the time the relevant development application is made.

Floodwater see the Water Act 2000.
Note: Floodwater, in relation to a watercourse or lake, means water that has overflowed the outer banks of the watercourse, or the bed and banks of the lake, because of a flood event affecting the watercourse or lake.

Incidental take of overland flow water means to take overland flow water in a storage that is primarily for storing water from a source other than overland flow.

Intensive stocking means a technique of stocking land on a long term basis above what is normally considered to be the carrying capacity of the land, for example, by implementing strategic or rotational grazing.

Lake see schedule 4 of the Water Act 2000.
Note: Lake includes:
1. if a feature is identified on the watercourse identification map as a lake – means the feature identified on the map; or
2. otherwise, includes:
   a. a lagoon, swamp or other natural collection of water, whether permanent or intermittent
   b. the bed and banks and any other element confining or containing the water.

Levee see schedule 4 of the Water Act 2000.
Note: Levee means an artificial embankment or structure which prevents or reduces the flow of overland flow water onto or from land. A levee includes levee-related infrastructure.

Overland flow water see schedule 4 of the Water Act 2000.
Note: Overland flow water:
1. means water, including floodwater, that is urban stormwater or is other water flowing over land, other than in a watercourse or lake:
   a. after having fallen as rain or in any other way; or
   b. after rising to the surface naturally from underground
2. does not include:
   a. water that has naturally infiltrated the soil in normal farming operations, including infiltration that has occurred in farming activity such as clearing, replanting and broadacre ploughing; or
   b. tailwater from irrigation if the tailwater recycling meets best practice requirements; or
   c. water collected from roofs for rainwater tanks.

Same premises means contiguous parcels of land or tenure under the same land ownership or tenure holder.

Spring see schedule 4 of the Water Act 2000.
Note: Spring means:
1. if a feature is identified on the watercourse identification map as a spring – the feature identified on the map; or
2. otherwise – the land to which water rises naturally from below the ground and the land over which the water then flows.

Underground water see schedule 4 of the Water Act 2000.
Note: Underground water means water that occurs naturally in, or is introduced artificially into, an aquifer.

Water entitlement see schedule 4 of the Water Act 2000.
Note: Water entitlement means a water allocation, interim water allocation or water licence granted under the Water Act 2000.

Water plan see schedule 4 of the Water Act 2000.
Note: Water plan means a plan approved by the Governor in Council under section 48(1) of the Water Act 2000.

Water management protocol see schedule 4 of the Water Act 2000.
Note: Water management protocol means a protocol made by the chief executive under section 68 of the Water Act 2000.
**Water sensitive urban design** means design that integrates total water cycle management into the urban built form to minimise the effects of development on the natural water cycle and environmental values, and to address water supply and use.

**Watercourse** see schedule 4 of the *Water Act 2000*.

Note: A watercourse:
1. is a river, creek or other stream, including a stream in the form of an anabranch or a tributary, in which water flows permanently or intermittently, regardless of the frequency of flow events:
   a. in a natural channel, whether artificially modified or not; or
   b. in an artificial channel that has changed the course of the stream
2. includes any of the following located in it:
   a. in-stream islands
   b. benches
   c. bars
3. does not, however, include a drainage feature
4. further, unless there is a contrary intention, a reference to a watercourse in the *Water Act 2000*, other than in section 5 or in the definitions in schedule 4 to the extent they support the operation of section 5, is a reference to anywhere that is:
   a. upstream of the downstream limit of the watercourse
   b. between the lateral limits of the watercourse
   c. a reference to the *Water Act 2000* to, or a to a circumstance that involves, land adjoining a watercourse, is a reference to, or a circumstance that involves, and effectively adjoining a watercourse.

Section 5AA of the *Water Act 2000* provides for the watercourse identification map that identifies the known extent of watercourses and drainage features that are managed under the *Water Act 2000*. Please be aware that the majority of minor watercourses and drainage features in Queensland have not yet been mapped, as indicated in the mapping, and therefore it should not be the only source of information that is relied upon when interpreting the SDAP provisions or identifying assessment triggers.

### 10.6 Abbreviations

**ERA** – Environmentally relevant activity

**RPEQ** – Registered Professional Engineer of Queensland
State code 11: Removal, destruction or damage of marine plants

11.1 Purpose statement

The purpose of the code is to ensure that development which involves the removal, destruction or damage of marine plants:

1. maintains the extent, distribution, diversity and condition of marine plants communities and protects the ecological functions to which they contribute
2. maintains the health and productivity of fisheries resources and fish habitat
3. minimises impacts on the management, use, development and protection of fisheries resources and fish habitat
4. avoids impacts on marine plants that are matters of state environmental significance, and where avoidance is not reasonably possible, minimises and mitigates impacts, and provides an offset for significant residual impacts where appropriate.

Note: Marine plant protection under the Fisheries Act 1994 applies irrespective of the tenure.

Further information will be provided in the forthcoming guideline: State code 11: Removal, destruction or damage of marine plants, Department of Agriculture and Fisheries, 2017.

11.2 Performance outcomes and acceptable outcomes

Development that is a material change of use, reconfiguring of a lot or operational work which involves the removal, destruction or damage of a marine plant should demonstrate compliance with the relevant provisions of table 11.2.2. For further details of the specific performance outcomes to be addressed, please refer to table 11.2.1.

</thead>
<tbody>
<tr>
<td>PO1 There is a demonstrated need for the development, and alternatives (locations and designs) which do not involve removal, destruction or damage of marine plants and impacts to fisheries resources and fish habitats are not viable.</td>
<td>For development associated with a public health or safety purpose:</td>
</tr>
<tr>
<td></td>
<td>AO1.1 Development is for:</td>
</tr>
<tr>
<td></td>
<td>1. signage or aids to warn the public of a safety hazard (for example, within a waterway to warn of submerged rocks, crocodiles, marine stingers); or</td>
</tr>
<tr>
<td>Performance outcomes</td>
<td>Acceptable outcomes</td>
</tr>
<tr>
<td>----------------------</td>
<td>---------------------</td>
</tr>
<tr>
<td>2. prevention of an impending public safety issue; or 3. the mitigation of a hazard to public safety that has resulted from a specific unforeseen event (for example, a fallen tree that is a danger to safe navigation); or 4. placement of a cyclone mooring identified under a cyclone contingency plan by the harbour master or controlling port authority, and is located in accordance with the plan; or 5. a public health purpose that has been endorsed in writing by Queensland Health or the relevant local government.</td>
<td>For any other development, no acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

Note: The application should identify and document the impacts of alternative proposals.

PO2 Only those aspects of a development that have a functional requirement to be located on tidal land create the requirement to remove, destroy or damage marine plants. Ancillary elements (for example: car and trailer parks, rest rooms, offices) occur outside of tidal land.

Note: Tidal land within the development site should be accurately identified on plans provided with the application, together with the location of highest astronomical tide, mean high water spring and mean low water spring tide heights.

The extent, location, species and condition of marine plants that are proposed for removal, damage or destruction and retained have been clearly and accurately identified and mapped to enable risks and impacts to be properly assessed.

No acceptable outcome is prescribed.

PO3 Development impacting marine plants:
1. directly abuts land that has full riparian access rights; or
2. provides a public facility.

Note: Further guidance on rights in context of fisheries resources and fish habitats is provided in the operational policy provisions of Management and protection of marine plants and other tidal fish habitats (FHMOP 001), Department of Primary Industries and Fisheries, 2007.

The provision of owner’s consent to lodge the development application does not confer rights.

No acceptable outcome is prescribed.

PO4 The spatial extent of disturbance to marine plants is minimised.

Note: For more information, refer to relevant fish habitat management operational policies and fish habitat guidelines:
1. Management and protection of marine plants and other tidal fish habitats (FHMOP 001), Department of Primary Industries and Fisheries, 2007
2. Tidal fish habitats, erosion control and beach replenishment (FHMOP 010), Department of Primary Industries and Fisheries, 2007
3. Dredging, extraction and spoil disposal activities (FHMOP 004), Department of Primary Industries, 1998

For work associated with private development that is a jetty, pontoon or boat ramp only:

AO4.1 Only one structure adjoins the property.

Note: A structure includes boat ramps, jetties and pontoons.

AND

<td>No acceptable outcome is prescribed.</td>
</tr>
<tr>
<td><strong>PO21</strong> The beach replenishment work is undertaken in a way that minimises the frequency of any ongoing replenishment requirements.</td>
<td>AO21.1 Beach replenishment will not require maintenance more often than every two years. AND AO21.2 A source of replenishment material for future maintenance is identified and secured.</td>
</tr>
<tr>
<td><strong>PO22</strong> Erosion control structures are located parallel to the shoreline and as far landward as possible to avoid impacts to tidal land and marine plants.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

### Dredging

**PO23** Capital dredging is to create or provide access to public infrastructure.

- No acceptable outcome is prescribed.

- **Note:**
  1. Privately owned marina facilities or maritime infrastructure development that is open to the general public and facilitates unrestricted public use for fishing purposes may be considered public infrastructure.  
  2. Dredging for access to private structures that do not provide unrestricted public use is not supported.

**PO24** Maintenance dredging is consistent with an existing development approval for dredging; and within approved profiles for navigational purposes.

- No acceptable outcome is prescribed.

**PO25** Disposal of dredge spoil avoids adverse impacts on marine plants.

- AO25.1 Dredge spoil is not deposited on tidal land.

### Temporary works

**PO26** Fish habitats and the fisheries resources they support are restored to pre-existing or improved condition and extent when the temporary works have ceased.

- No acceptable outcome is prescribed.

**PO27** Temporary works will be in place or are undertaken for a specified period and for the shortest possible time.

- No acceptable outcome is prescribed.

**PO28** A temporary structure is in place for a specified period and is designed to be completely removed.

- No acceptable outcome is prescribed.

### Restoration

**PO29** Restoration does not:

1. compromise condition of fish habitats or fisheries productivity; or

- No acceptable outcome is prescribed.
### Performance outcomes

2. substitute a particular **fish habitat** for another type of habitat, for example, creation of mangrove communities from other tidal **fish habitats**; or

3. substitute a natural **fish habitat** for artificial **fish habitat**; or

4. deliver **fish habitats** that are likely to be regularly disturbed, such as through predictable sediment removal or maintenance dredging; or

5. deliver **fish habitats** that will predictably be at a high risk of contamination and/or further disturbance.

Note: For further guidance refer to Restoration of fish habitats: Fisheries guidelines for marine areas (FHG 002), Department of Primary Industries, 1998.

### Acceptable outcomes

Restoration works authorised through an endorsed restoration plan under the code for self-assessable development MP06 – Minor impact works in a declared fish habitat area or involving the removal, destruction or damage of marine plants, Department of Agriculture, Fisheries and Forestry, 2013, do not require a development permit.

PO30 Marine plants to be used for revegetation purposes have local provenance.

PO30.1 Marine plants used in restoration works are collected within a 100 kilometre radius of the site.

### Matters of state environmental significance

PO31 Development:

1. avoids impacts on **matters of state environmental significance**; or

2. minimises and mitigates impacts on **matters of state environmental significance** after demonstrating avoidance is not reasonably possible; and

3. provides an **offset** if, after demonstrating all reasonable avoidance, minimisation and mitigation measures are undertaken, the development results in an acceptable **significant residual impact** on a **matter of state environmental significance**.

Statutory note: For Brisbane core port land, an offset may only be applied to development on land identified as E1 Conservation/Buffer, E2 Open Space or Buffer/Investigation in the Brisbane Port LUP precinct plan.

Note: For the purpose of this code, the **matter of state environmental significance** assessed is marine plants under the Fisheries Act 1994.

Guidance for determining if the development will have a **significant residual impact** on the **matter of state environmental significance** is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014. Where the **significant residual impact** is considered an acceptable impact on the **matter of state environmental significance** under the Environmental Offsets framework and an **offset** is considered appropriate, the **offset** should be delivered in accordance with the Environmental Offsets Act 2014.

No acceptable outcome is prescribed.

11.4 Glossary of terms

Declared fish habitat area see the Fisheries Act 1994.
Note: Declared fish habitat area means an area that is declared under the Fisheries Act 1994 to be a fish habitat area. Section 120 of the Fisheries Act 1994 deals with declaration of fish habitat areas.

Fish see section 5 of the Fisheries Act 1994.
Note: Fish:
1. means an animal (whether living or dead) of a species that throughout its life cycle usually lives:
   a. in water (whether freshwater or saltwater); or
   b. in or on foreshores; or
   c. in or on land under water
2. includes:
   a. prawns, crayfish, rock lobsters, crabs and other crustaceans
   b. scallops, oysters, pearl oysters and other molluscs
   c. sponges, annelid worms, bêche-de-mer and other holothurians
   d. trochus and green snails
3. does not include:
   a. crocodiles, or
   b. protected animals under the Nature Conservation Act 1992; or
   c. pests under the Pest Management Act 2001; or
   d. animals prescribed under a regulation not to be fish
4. also includes:
   a. the spat, spawn and eggs of fish
   b. any part of fish or spat, spawn or eggs of fish
   c. treated fish, including treated spat, spawn and eggs of fish
   d. coral, coral limestone, shell grit or star sand
   e. freshwater or saltwater products declared under a regulation to be fish.

Fish habitat see the Fisheries Act 1994.
Note: Fish habitat includes land, waters and plants associated with the life cycle of fish, and includes land and waters not presently occupied by fisheries resources.

Fisheries resources see the Fisheries Act 1994.
Note: Fisheries resources includes fish and marine plants.

Fishery see section 7 of the Fisheries Act 1994.
Note: Fishery means activity by way of fishing, for example, activities specified by reference to all or any of the following:
1. a species of fish
2. a type of fish by reference to sex, size or age or another characteristic
3. an area
4. a way of fishing
5. a type of boat
6. a class of person
7. the purpose of an activity
8. the effect of the activity on a fish habitat, whether or not the activity involves fishing
9. anything else prescribed under a regulation.

Fishing see the Fisheries Act 1994.
Note: Fishing includes:
1. searching for, or taking, fish
2. attempting to search for, or take, fish
3. engaging in other activities that can reasonably be expected to result in the locating, or taking, of fish
4. landing fish (from a boat or in another way), bringing fish ashore or transhipping fish.

Foreshore see the Fisheries Act 1994.
Note: Foreshore means parts of the banks, beds, reefs, shoals, shore and other land between high water and low water.

Note: Harbour master means a person who is appointed under the Transport Operations (Maritime Safety) Act 1994 as a harbour master.

Highest astronomical tide means the highest level of the tides that can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.

Land includes foreshores and tidal and non-tidal land.

Legally secured offset area see the Environmental Offsets Act 2014.
Note: An area of land is a legally secured offset area if:
1. the area is:
   a. an environmental offset protection area; or
   b. an area declared as an area of high nature conservation value under section 19F of the Vegetation Management Act 1999; or
   c. another area prescribed under a regulation; and
2. under the Environmental Offsets Act 2014 or another Act, the area is subject to a delivery or management plan or agreement (however described in this Act or the other Act) to achieve a conservation outcome for a prescribed environmental matter.

Marine plant see section 8 of the Fisheries Act 1994.
Note: Marine plant includes the following:
1. a plant (a tidal plant) that usually grows on, or adjacent to, tidal land, whether it is living, dead, standing or fallen
2. material of a tidal plant, or other plant material on tidal land
3. a plant, or material of a plant, prescribed under a regulation or management plan to be a marine plant.

A marine plant does not include a plant that is a declared pest under the Land Protection (Pest and Stock Route Management) Act 2002.

Matters of state environmental significance see schedule 2 of the Environmental Offsets Regulation 2014.
Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:
1. regional ecosystems under the Vegetation Management Act 1999 that:
   a. are endangered regional ecosystems
   b. are of concern regional ecosystems
   c. intersect with a wetland shown on the vegetation management wetlands map
   d. contain areas of essential habitat shown on the essential habitat map for an animal that is endangered wildlife or vulnerable wildlife or a plant that is endangered wildlife or vulnerable wildlife
   e. are located within the defined distances stated in the Environmental Offsets Policy, Department of Environment and Heritage Protection 2014 from the defining banks of a relevant watercourse or drainage feature as shown on the vegetation management watercourse and drainage feature map; or
   f. are areas of land determined to be required for ecosystem functioning (‘connectivity areas’); or
2. wetlands and watercourses in high ecological value waters as defined in schedule 2 of the Environmental Protection (Water) Policy 2009
3. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014
5. protected areas under the Nature Conservation Act 1992, excluding coordinated conservation areas
7. highly protected zones of state marine parks under the Marine Parks Act 2004
8. declared fish habitat areas under the Fisheries Act 1994
9. waterways that provide for fish passage under the Fisheries Act 1994 if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway
10. marine plants under the Fisheries Act 1994; or
11. legally secured offset areas.

Offset means environmental offset under the Environmental Offsets Act 2014.
Note: Environmental offset means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a prescribed environmental matter, delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2014. The prescribed environmental matters assessed under the State Development Assessment Provisions are matters of state environmental significance.

Prescribed environmental matters see the Environmental Offsets Act 2014.
Note: A prescribed environmental matter is any species, ecosystem or other similar matter protected under Queensland legislation for which an offset may be provided. A prescribed environmental matter may be a matter of national, state or local environmental significance, however, assessment criteria in the State Development Assessment Provisions only relate to matters of state environmental significance. Each of the prescribed environmental matters are listed under the Environmental Offsets Regulation 2014.

Public infrastructure means infrastructure constructed, owned and maintained by or on behalf of a public sector entity.

Public sector entity see the Planning Act 2016.
Note: A public sector entity means:
1. a department or part of a department; or
2. other than in chapter 4 (of the Planning Act 2016) – a distributor-retailer; or
3. an agency, authority, commission, committee, corporation (including a government owned corporation), instrumentality, office, or other entity, established under an Act for a public or state purpose (for example: a local government, a government owned corporation or a rail government entity under the Transport Infrastructure Act 1994).

Public use means available for free use by any member of the public without prior permission.

Significant residual impact see the Environmental Offsets Act 2014.
Note: Significant residual impact is an impact, whether direct or indirect, of a prescribed activity on all or part of a prescribed environmental matter that:
1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity
2. is, or will or is likely to be, significant.
Guidance for determining if a prescribed activity will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.

Tidal land see the Fisheries Act 1994.
Note: Tidal land includes reefs, shoals and other land permanently or periodically submerged by waters subject to tidal influence.

Waterway see the Fisheries Act 1994.
Note: Waterway includes a river, creek, stream, watercourse or inlet of the sea. For further guidance see fact sheet Maintaining Fish Passage in Queensland: What is a waterway?, Department of Agriculture, Fisheries and Forestry, 2014.
State code 12: Development in a declared fish habitat area

12.1 Purpose statement

The purpose of the code is to ensure development in a declared fish habitat area:

1. is limited to prescribed development purposes where there is a need for the development or the development will improve the condition of fisheries resources, fish habitat and natural processes;
2. maintains the natural condition of fish habitat and natural processes in management A areas;
3. maintains the current fish habitat values and functions of management B areas;
4. avoids impacts on marine plants, waterways that provide for fish passage and declared fish habitat areas that are matters of state environmental significance, and where avoidance is not reasonably possible, minimises and mitigates impacts, and provides an offset for significant residual impacts where appropriate.

Note: In most cases, a resource allocation authority is required under the Fisheries Act 1994 before development that will be assessable against this code can proceed. It is recommended that this authority is obtained before a development application is made.

Some work will be accepted development and will not require a development application and assessment against this code.

Guidance on addressing code requirements is available in the State Development Assessment Provisions Guidance Material: State code 12: Development in a declared fish habitat area, Department of National Parks, Sport and Racing 2017.

12.2 Performance outcomes and acceptable outcomes

Development that is building work or operational work in a declared fish habitat area should demonstrate compliance with the relevant provisions of table 12.2.2. For further details of the specific performance outcomes to be addressed, please refer to table 12.2.1.

**All development**

| **PO2** When development is proposed for any of the purposes mentioned in PO1, there is a demonstrated need for the development, and for the following types of development, alternative locations outside the declared fish habitat area have been assessed and are not viable: | **For development to ensure public health and safety:** |
| a. for management A areas and management B areas: | AO2.1 Development is: |
| b. researching, including monitoring or educating | 1. for a public health purpose and has been formally endorsed as being necessary by Queensland Health or the relevant government authority; or |
| c. ensuring public health or safety | 2. for mosquito control and is required to be carried out under a mosquito management plan developed in accordance with the Mosquito management code of practice for Queensland, Local Government Association of Queensland, 2014 and do not include works for the control of other nuisance pest insect species (for example, midges); or |
| d. providing public infrastructure to facilitate fishing | 3. for an aid to navigation and is endorsed in writing by Department of Transport and Main Roads or Gold Coast Waterways Authority; or |
| e. providing subterranean public infrastructure if the surface of the area can be restored, after the completion of the works or activity, to its condition before the performance of the works or activity | 4. is for a cyclone buoy mooring and: |
| f. constructing a temporary structure | a. is identified under the relevant port cyclone contingency plan by the controlling authority (for example, a port authority) |
| g. for management B areas only: | |
| h. constructing a permanent structure on tidal land or within the management area; or | |

</tr>
<tr>
<td>For any other development, no acceptable outcome is nominated.</td>
<td></td>
</tr>
</tbody>
</table>

**PO10** Development likely to cause disturbance to potential or actual acid sulfate soil, prevents the release of contaminants.

Note: Management of acid sulfate soil is consistent with the current Queensland acid sulfate soil technical manual: Soil Management Guidelines V4.0, Department of Science, Information Technology, Innovation and the Arts, 2014.

No acceptable outcome is prescribed.

**PO11** Where benthic disturbance is necessary, it is undertaken in a manner that enables the area to be restored to the pre-disturbance condition and profile, having regard to (amongst other things): surface sediment type and profile, bank profile and potential for erosion; and amount of surface area disturbed.

Note: Such disturbances include but are not limited to those associated with provisions of subterranean infrastructure, or temporary structures.

No acceptable outcome is prescribed.

**PO12** Excess sediment arising from development is managed to avoid further disturbance within the **declared fish habitat area**.

AO12.1 Excess sediment is disposed of outside of the boundaries of a declared fish habitat area.

**PO13** The design and siting of development maximises light penetration under the structure where feasible, through measures such as:
1. increasing the height of the structure above the substrate
2. decreasing the width of the structure
3. using a north-south orientation
4. using pedestrian decking surfaces that maximise light penetration to the substrate.

No acceptable outcome is prescribed.

**PO14** Development is designed, sited and constructed such that the potential for additional works to ensure long term operability is minimised, having regard to (amongst other things) the need for future:
1. dredging to maintain access
2. trimming of marine plants; or
3. warning signs or protective structures.

No acceptable outcome is prescribed.

**PO15** Public boat ramps have vessel staging areas that are appropriate for the size of the boat ramp.

Note: Vessel staging areas include land based staging areas and staging areas in water.

No acceptable outcome is prescribed.
<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
</table>
| **PO16** Development minimises disturbance to marine plants. | For private structures or works:  
AO16.1 Private fishing platforms, private jetties and pontoons extend through a marine plant fringe that is no more than 15 metres wide (measured perpendicular to the shore).

AND

AO16.2 Private boat ramps have a total area of marine plant disturbance for construction that is less than 45 square metres and extends through a marine plant fringe that is no more than three metres wide (measured perpendicular to the shore).

AND

For signs:

AO16.3 Signs do not involve disturbance of marine plants unless this would compromise the purpose of a warning sign.

For any other development, no acceptable outcome is prescribed.

| **PO17** To the greatest extent practical, development occurs in a way that allows for the fish habitat to quickly recover through natural processes. | No acceptable outcome is nominated. |

Note: A condition of approval for any restoration proposed in a declared fish habitat area is likely to require a post-works monitoring and maintenance program appropriate for the scale of the restoration works.

| **PO18** Marine plants to be used for revegetation purposes have local provenance and are obtained from within a declared fish habitat area only if:  
1. no alternative source of marine plants is feasible; or  
2. the removal of marine plants will have minimal impact on the declared fish habitat area. | No acceptable outcome is prescribed. |

Note: Vegetation to be used in a restoration project should comply with any relevant provisions of the National policy for the translocation of live aquatic organisms. See Management and protection of marine plants and other tidal fish habitats (FHMOP 001), Department of Primary Industries and Fisheries, 2007 for specific guidance on marine plant translocation.

| **PO19** Development for a public or educational purpose is located to optimise public use, benefit or awareness of the declared fish habitat area. | No acceptable outcome is prescribed. |

| **PO20** Development does not adversely impact on community access to fisheries resources and fish habitats including recreational and indigenous fishing access. | No acceptable outcome is prescribed. |

Note: In some cases, compensation for impact on fisheries access may be necessary. The Guideline on fisheries adjustment provides advice for proponents on relevant fisheries adjustment.

</tbody>
</table>

### Dredging or extracting sediment

| PO39 Dredging or extracting sediment is only undertaken for the purposes of: restoring fish habitats or natural processes; or as part of the construction of a structure (e.g. excavating the footings for a boat ramp or revetment wall). | No acceptable outcome is prescribed. |

### Aquaculture

| PO40 Development for aquaculture is only for tidal works associated with oyster production within licensed oyster areas in compliance with the Oyster industry plan for Moreton Bay Marine Park, Department of Agriculture and Fisheries, 2015. | No acceptable outcome is prescribed. |

Note: Water intake and discharge structures associated with land based aquaculture developments (e.g. prawn farms) are considered as structures within a declared fish habitat area rather than aquaculture.

### Matters of state environmental significance

| PO41 Development: 1. avoids impacts on matters of state environmental significance; or 2. minimises and mitigates impacts on matters of state environmental significance after demonstrating avoidance is not reasonably possible; and 3. provides an offset if, after demonstrating all reasonable avoidance, minimisation and mitigation measures are undertaken, the development results in an acceptable | No acceptable outcome is prescribed. |
Performance outcomes

| significant residual impact on a matter of state environmental significance. |

Statutory note: For Brisbane core port land, an offset may only be applied to development on land identified as E1 Conservation/Buffer, E2 Open Space or Buffer/Investigation in the Brisbane Port LUP precinct plan.

Note: For the purpose of this code, the matters of state environmental significance assessed are marine plants, waterways that provide for fish passage and declared fish habitat areas.

 Guidance for determining if the development will have a significant residual impact on the matter of state environmental significance is provided in the Significant residual impact guideline, Department of State Development, Infrastructure and Planning, 2014. Where the significant residual impact is considered an acceptable impact on the matter of state environmental significance and an offset is considered appropriate under the Environmental offsets framework, the offset should be delivered in accordance with the Environmental Offsets Act 2014.

12.4 Glossary of terms

Aquaculture see the Fisheries Act 1994.
Note: Aquaculture means the cultivation of live fisheries resources for sale other than in circumstances prescribed under a regulation.

Declared fish habitat area see the Fisheries Act 1994.
Note: Declared fish habitat area means an area that is declared under the Fisheries Act 1994 to be a fish habitat area. Section 120 of the Fisheries Act 1994 deals with declaration of fish habitat areas.

Designated mooring area see Marine resource management: Management of declared fish habitat areas, Department of National Parks, Sport and Racing, 2015.
Note: Designated mooring area means an area designated for moorings under an agreement, plan or legislation by the Department of Agriculture and Fisheries, Department of Transport and Main Roads and/or any other relevant agencies.

Disease see section 94 of the Fisheries Act 1994.
Note: Disease means:
1. a disease, parasite, pest, plant or other thing (the disease) that has, or may have, the effect (directly or indirectly) of killing or causing illness in fisheries resources, or in humans or animals that eat fisheries resources infected with or containing the disease
2. a chemical or antibiotic residue
3. a fish or plant species that may compete against fisheries resources or other fisheries resources to the detriment of the fisheries resources or other fisheries resources.

Entity see the schedule of the Fisheries Act 1994.
Note: Entity includes an entity established under the law of the Commonwealth or another state.

Fish see section 5 of the Fisheries Act 1994.
Note: Fish:
1. means an animal (whether living or dead) of a species that throughout its life cycle usually lives:
   a. in water (whether freshwater or saltwater); or
   b. in or on foreshores; or
   c. in or on land under water
2. includes:
   a. prawns, crayfish, rock lobsters, crabs and other crustaceans
   b. scallops, oysters, pearl oysters and other molluscs
   c. sponges, annelid worms, bêche-de-mer and other holothurians
   d. trochus and green snails
   e. does not include:
      f. crocodiles, or
      g. protected animals under the Nature Conservation Act 1992; or
      h. pests under the Pest Management Act 2001; or
      i. animals prescribed under a regulation not to be fish
3. also includes:
   a. the spat, spawn and eggs of fish
   b. any part of fish or spat, spawn or eggs of fish
   c. treated fish, including treated spat, spawn and eggs of fish
   d. coral, coral limestone, shell grit or star sand
   e. freshwater or saltwater products declared under a regulation to be fish.

Fish habitat see the Fisheries Act 1994.
Note: Fish habitat includes land, waters and plants associated with the life cycle of fish, and includes land and waters not presently occupied by fisheries resources.

Fisheries resources see the Fisheries Act 1994.
Note: Fisheries resources includes fish and marine plants.

Fishery see section 7 of the Fisheries Act 1994.
Note: Fishery means activity by way of fishing, for example, activities specified by reference to all or any of the following:
1. a species of fish
2. a type of fish by reference to sex, size or age or another characteristic
3. an area
4. a way of fishing
5. a type of boat
6. a class of person
7. the purpose of an activity
8. the effect of the activity on a fish habitat, whether or not the activity involves fishing
9. anything else prescribed under a regulation.

Fishing see the Fisheries Act 1994.
Note: Fishing includes:
1. searching for, or taking, fish
2. attempting to search for, or take, fish
3. engaging in other activities that can reasonably be expected to result in the locating, or taking, of fish
4. landing fish (from a boat or in another way), bringing fish ashore or transshipping fish.

Foreshore see the Fisheries Act 1994.
Note: Foreshore means parts of the banks, beds, reefs, shoals, shore and other land between high water and low water.

Land includes foreshores and tidal and non-tidal land.

Legally secured offset area see the Environmental Offsets Act 2014.
Note: An area of land is a legally secured offset area if:
1. the area is:
   a. an environmental offset protection area; or
   b. an area declared as an area of high nature conservation value under section 19F of the Vegetation Management Act 1999; or
   c. another area prescribed under a regulation; and
2. under the Environmental Offsets Act 2014 or another Act, the area is subject to a delivery or management plan or agreement (however described in this Act or the other Act) to achieve a conservation outcome for a prescribed environmental matter.

Management A area see the Fisheries Regulation 2008.
Note: A management A area means an area within a declared fish habitat area identified by the words ‘management A’ on the fish habitat area plan mentioned in schedule 3 for the declared fish habitat area.

Management B area see the Fisheries Regulation 2008.
Note: A management B area means an area within a declared fish habitat area identified by the words ‘management B’ on the fish habitat area plan mentioned in schedule 3 for the declared fish habitat area.

Marina see Marine Resource Management: Management of Declared Fish Habitat Areas Operational Policy, Department of National Parks, Sport and Racing, 2015.
Note: Marina means an area of tidal water primarily used for storage of multiple vessels secured to fixed or floating platforms that can be used to access the vessels. The marina may also include uses such as slipways, boat ramps, and fuel wharves.

Marine plant see section B of the Fisheries Act 1994.
Note: Marine plant includes the following:
1. a plant (a tidal plant) that usually grows on, or adjacent to, tidal land, whether it is living, dead, standing or fallen
2. material of a tidal plant, or other plant material on tidal land
3. a plant, or material of a plant, prescribed under a regulation or management plan to be a marine plant.

A marine plant does not include a plant that is a declared pest under the Land Protection (Pest and Stock Route Management) Act 2002.

Matters of state environmental significance see the Environmental Offsets Regulation 2014.
Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:
1. regional ecosystems under the Vegetation Management Act 1999 that:
   a. are endangered regional ecosystems
   b. are of concern regional ecosystems
   c. intersect with a wetland shown on the vegetation management wetlands map
   d. contain areas of essential habitat shown on the essential habitat map for an animal that is endangered wildlife or vulnerable wildlife or a plant that is endangered wildlife or vulnerable wildlife
   e. are located within the defined distances stated in the Environmental Offsets Policy 2014 from the defining banks of a relevant watercourse or drainage feature as shown on the vegetation management watercourse and drainage feature map; or
   f. are areas of land determined to be required for ecosystem functioning (‘connectivity areas’)
2. wetlands and watercourses in high ecological value waters as defined in schedule 2 of the Environmental Protection (Water) Policy 2009
3. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014
5. protected areas under the Nature Conservation Act 1992, excluding coordinated conservation areas
6. highly protected zones of state marine parks under the Marine Parks Act 2004
7. declared fish habitat areas under the Fisheries Act 1994
8. waterways that provide for fish passage under the Fisheries Act 1994 if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway
9. marine plants under the Fisheries Act 1994; or
10. legally secured offset areas.

Offset means environmental offset under the Environmental Offsets Act 2014.
Note: Environmental offset means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a prescribed environmental matter, delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2016. The prescribed environmental matters assessed under the State Development Assessment Provisions are matters of state environmental significance.

Prescribed development purposes see the Fisheries Regulation 2008.
Note: A prescribed development purpose for a declared fish habitat area, means any of the following in, or directly affecting, the area:
1. managing fisheries resources or fish habitat (for example: constructing a boardwalk for public access within a declared fish habitat area for preventing uncontrolled disturbance of the habitat)
3. researching, including monitoring, or educating
4. ensuring public health or safety
5. providing public infrastructure to facilitate fishing (for example: a boat ramp or jetty for public use)
6. providing subterranean public infrastructure if the chief executive is satisfied the surface of the area can be restored, after the completion of the relevant works or activity, to its condition before the performance of the works or activity
7. constructing a temporary structure
8. maintaining a structure that was constructed before the area was declared to be a fish habitat area under the Act
9. maintaining a structure, other than a structure mentioned in 8 above, that has been lawfully constructed
10. for a part of the area that is a management B area:
   a. constructing a permanent structure on tidal land or within the area; or
   b. depositing material for beach replenishment in the area.

**Prescribed environmental matters** see the *Environmental Offsets Act 2014*.

Note: A prescribed environmental matter is any species, ecosystem or other similar matter protected under Queensland legislation for which an offset may be provided. A prescribed environmental matter may be a matter of national, state or local environmental significance, however, assessment criteria in the SDAP only relate to matters of state environmental significance. Each of the prescribed environmental matters are listed under the Environmental Offsets Regulation 2014.

**Public sector entity** see the *Planning Act 2016*.

Note: A public sector entity means:
1. a department or part of a department; or
2. other than in chapter 4 (of the Planning Act 2016) – a distributor-retailer; or
3. an agency, authority, commission, committee, corporation (including a government owned corporation), instrumentality, office, or other entity, established under an Act for a public or state purpose (for example: a local government, a government owned corporation or a rail government entity under the *Transport Infrastructure Act 1994*).

**Public use** means available for free use by any member of the public without prior permission.

**Resource allocation authority** means a resource allocation authority issued, and in force, under part 5, division 3, subdivision 2A of the *Fisheries Act 1994*.

**Significant residual impact** see the *Environmental Offsets Act 2014*.

Note: Significant residual impact is an impact, whether direct or indirect, of a prescribed activity on all or part of a prescribed environmental matter that:
1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity
2. is, or will, or is likely to be, significant.

Guidance for determining if a prescribed activity will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.

**Tidal land** see the *Fisheries Act 1994*.

Note: Tidal land includes reefs, shoals and other land permanently or periodically submerged by waters subject to tidal influence.

**Translocation** means the movement of live aquatic organisms (including all stages of the organism’s life cycle and any derived viable genetic material):
1. beyond its accepted distribution; or
2. to areas which contain genetically distinct populations; or
3. to areas with superior parasite or disease status.

**Waterway** see the *Fisheries Act 1994*.

Note: Waterway includes a river, creek, stream, watercourse or inlet of the sea. For further guidance see the Maintaining Fish Passage in Queensland: What is a waterway? factsheet, Department of Agriculture, Fisheries and Forestry, 2014.
State code 13: Unexploded ordnance

13.1 Purpose statement

The purpose of the code is to ensure that sites identified as having **substantial unexploded ordnance (UXO)** potential are appropriately investigated and, where necessary, remediated so as to not place another part of the environment, or human health, at risk as a consequence of development.

Note: Guidance on how to demonstrate compliance with the performance outcomes of this state code is available in the Planning guidance – State code 13: Unexploded ordnance, Department of Infrastructure, Local Government and Planning, 2017.

13.2 Performance outcomes and acceptable outcomes

Development that is a material change of use or reconfiguring a lot on a site identified as **substantial UXO** potential should demonstrate compliance with table 13.2.1.

<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>PO1 A contractor approved by the Commonwealth Department of Defence has certified that the area identified as having UXO potential has been remediated or can be managed to be suitable for the proposed use.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

Note: A UXO search can be conducted through the Australian Department of Defence. The Australian Department of Defence maintains a list of approved UXO consultants (D2) and contractors (F2) on the Defence Environment and Heritage Panel.

13.3 Reference documents

Department of Infrastructure, Local Government and Planning 2017, Planning guidance – State code 13: Unexploded ordnance

Australian Government, Department of Defence, Unexploded Ordnance in Australia

Note: The Australian Department of Defence will provide advice on the hazards associated with UXO to all Commonwealth, state and local government authorities and private organisations or individuals who request it. Defence is actively engaged in identifying areas where UXO are likely to be present. Members of the public can assist in this process. If you have any information that may be of assistance please contact UXO@defence.gov.au.

13.4 Glossary of terms

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The DA mapping system is available on the department’s website.
Substantial unexploded ordnance (UXO) means a site identified as having substantial UXO potential on the DA mapping system.

13.5 Abbreviations

UXO – Unexploded ordnance
14.1 Purpose statement

The purpose of this code is to regulate development on and adjoining a state heritage place to:

1. conserve cultural heritage significance for the benefit of the community and future generations
2. minimise or mitigate unavoidable impacts on cultural heritage significance
3. maintain or enhance the setting and streetscape adjoining the state heritage place, and views to and from the state heritage place, where these aspects form part of its cultural heritage significance.

In addition, if it is demonstrated that there is no prudent or feasible alternative to development on a state heritage place destroying or substantially reducing the place’s cultural heritage significance, ensure that the place’s significance is interpreted and incorporated as appropriate.

Note:
1. The cultural heritage significance of a state heritage place is described in the entry for the place in the Queensland Heritage Register.
2. Exemption certificates are available for development that has no more than a minimal detrimental impact on cultural heritage significance, and involve a separate assessment process which is administered by the Department of Environment and Science. A general exemption certificate is also available for upfront approval of development that has no impact on cultural heritage significance.

14.2 Performance outcomes and acceptable outcomes

Development on a state heritage place should demonstrate compliance with the relevant provisions of table 14.2.2. For further details of the specific performance outcomes to be addressed, please refer to table 14.2.1. A material change of use on land adjoining a state heritage place should demonstrate compliance with table 14.2.3.

Table 14.2.1: Applicable criteria for development on a state heritage place

<table>
<thead>
<tr>
<th>Type of development on a state heritage place</th>
<th>Relevant provisions of code</th>
</tr>
</thead>
<tbody>
<tr>

</table>
### Performance outcomes

<table>
<thead>
<tr>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. minimises and mitigates unavoidable detrimental impacts on its <strong>cultural heritage significance</strong></td>
</tr>
<tr>
<td>b. provides opportunities for public appreciation of its <strong>cultural heritage significance</strong></td>
</tr>
<tr>
<td>c. where adaptive reuse is proposed, is compatible with its ongoing <strong>conservation</strong> management.</td>
</tr>
</tbody>
</table>

**PO2** Where open space, or the relationship between built and open spaces at a **state heritage place** is identified as forming part of its **cultural heritage significance**, **development**:

1. maintains or enhances the significance of the **setting**, including significant views, circulation, access, spatial patterns and layout
2. maintains a lot size and layout which permits viable adaptive reuse or **conservation** of significant heritage buildings and open spaces.

**PO3** Development on a **state heritage place** with identified archaeological potential avoids or appropriately manages detrimental impacts on artefacts.

**PO4** Development destroying or substantially reducing the cultural heritage significance of a **state heritage place**

1. demonstrate that there is no prudent and feasible alternative to carrying out the **development** due to:
   a. an extraordinary economic cost to the state, all or part of a community, or an individual; or
   b. an extraordinary environmental or social disadvantage
   c. a risk to public health or safety; or
   d. another extraordinary or unique circumstance
2. interpret and incorporate the place’s history and significance into any **development** of the site.

Note: In accordance with the *Planning Act 2016*, the State Assessment and Referral Agency (SARA) will seek advice from the Queensland Heritage Council (via the Department of Environment and Science) on any application that will potentially destroy or substantially reduce the **cultural heritage significance** of a **state heritage place**.

**PO5** Development on land adjoining a **state heritage place**:

1. is located, designed and scaled so that its form, bulk and proximity does not have a detrimental impact on the **cultural heritage significance** of the **state heritage place**; or

<table>
<thead>
<tr>
<th>Acceptable outcomes</th>
</tr>
</thead>
</table>

No acceptable outcome is prescribed.
Performance outcomes | Acceptable outcomes

2. where it is demonstrated that 1 is not reasonably achievable, the development minimises and mitigates unavoidable detrimental impacts on cultural heritage significance.

14.3 Reference documents

Department of Environment and Heritage Protection 2017, Guideline – SDAP State code 14: Queensland heritage

Australia ICOMOS 2013, The Burra Charter: The Australia ICOMOS Charter for Places of Cultural Significance

Queensland heritage register Application form: Request for a certified copy of entry

14.4 Glossary of terms

**Adjoining** means premises that share a common boundary with a *state heritage place*, including premises that meet at a single point on a common boundary.

**Artefact** see the Queensland Heritage Act 1992.

Note: Artefact means an archaeological artefact or underwater cultural heritage artefact. The terms archaeological artefact and underwater cultural heritage artefact are defined in the Queensland Heritage Act 1992.

Note: Conservation means all the processes of looking after a place so as to retain its cultural heritage significance.

**Cultural heritage significance** of a *state heritage place* is described in the entry for the place in the *Queensland Heritage Register*.

Note: In describing the cultural heritage significance of a state heritage place, the entry for the place in the Queensland Heritage Register may address the aesthetic, architectural, historical, scientific, social, or other significance of a place or a feature of a place to the present generation or past or future generations. Cultural heritage significance is embodied in the place itself: its fabric, setting, use, associations, meanings, records, related places and related objects, as described in the entry for the place in the Queensland Heritage Register. This definition is based on the Queensland Heritage Act 1992 and The Burra Charter: The Australia ICOMOS Charter for Places of Cultural Significance, 2013.

**Destroy or substantially reduce** see section 277 of the Planning Act 2016.

Note: Destroy or substantially reduce means to destroy or substantially reduce the cultural heritage significance of the state heritage place, including:
1. by demolishing all elements or features of the place that contribute to the place’s cultural heritage significance described in the place’s entry in the Queensland Heritage Register; and
2. by changing the place so that the place no longer satisfies any of the criteria for entry in the Queensland Heritage Register.

**Development** means development as defined by the Planning Act 2016, as well as all types of work and/or changes to built, archaeological, natural and landscape features on the site of a *state heritage place*. This includes, but is not limited to:
1. altering, repairing, maintaining or moving a built, natural, or landscape feature
2. excavating, filling or other disturbances to land that may damage, expose or move archaeological artefacts
3. altering, repairing or removing artefacts that contribute to the place’s cultural heritage significance, including, for example, furniture or fittings; and
4. altering, repairing or removing building finishes that contribute to the place’s cultural heritage significance, including, for example, paint, wallpaper or plaster.

**Identified archaeological potential** means that a place has been entered in the Queensland Heritage Register as it has potential to contain an archaeological artefact or other feature that is an important source of information.
about an aspect of Queensland’s history. Places with identified archaeological potential satisfy criterion C of the cultural heritage criteria on which places are assessed for entry on the Queensland Heritage Register.

Queensland Heritage Register means the list of places that have state-level cultural heritage significance. Note: Places in the Queensland Heritage Register have been assessed as satisfying one or more of eight cultural heritage criteria and have been entered in accordance with the requirements of the Queensland Heritage Act 1992. All applicants are encouraged to obtain a certified copy of the entry for the relevant state heritage place(s) from the Queensland Heritage Register prior to making a development application. A certified copy of entry is an official and complete copy of a place’s entry in the Queensland Heritage Register. To request a certified copy of entry submit an Application form: Request for a certified copy of entry available at to the Department of Environment and Science along with the required fee.

Setting see The Burra Charter: The Australia ICOMOS Charter for Places of Cultural Significance, 2013. Note: Setting means the immediate and extended environment of a state heritage place that is part of or contributes to its cultural heritage significance and distinctive character. Urban form, setbacks, landmarks, spatial character and layout, landscape elements and historically significant views to or from the heritage place can contribute to the cultural heritage significance of a setting.

State heritage place see the Queensland Heritage Act 1992. Note: State heritage place means a place entered in the Queensland Heritage Register as a state heritage place under part 4 of the Queensland Heritage Act 1992.
State code 15: Removal of quarry material from a watercourse or lake

15.1 Purpose statement

The purpose of the code is to provide for the removal of quarry material from a watercourse or lake in a way that ensures the sustainable management of water resources and quarry material and does not result in adverse impacts on:

1. natural ecosystem processes
2. riverine or estuarine environment
3. the physical integrity of watercourses and lakes
4. infrastructure
5. other users’ access to quarry material and water resources.

15.2 Performance outcomes and acceptable outcomes

Development for removing quarry material should demonstrate compliance with the relevant provisions in table 15.2.1.

Table 15.2.1: Various aspects of development

</tr>
<tr>
<td>PO2 Development does not adversely impact on other users’ ability to access the resource.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
<tr>
<td>PO3 Development does not adversely impact on the physical integrity of the watercourse or lake.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
<tr>
<td>PO4 Development does not adversely impact on downstream features, including but not limited to estuaries and beaches, that naturally require riverine quarry material from the watercourse or lake to maintain natural geomorphic processes.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
<tr>
<td>PO5 Development is carried out in a way that would not adversely impact the structure or operation of built infrastructure such as road crossings, bridges, weirs and pump sites.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

15.3 Reference documents

Watercourse identification map.
15.4 Glossary of terms

**Lake** see schedule 4 of the *Water Act 2000*.

*Note:* Lake includes:

1. if a feature is identified on the watercourse identification map as a lake – means the feature identified on the map; or
2. otherwise, includes:
   a. a lagoon, swamp or other natural collection of water, whether permanent or intermittent
   b. the bed and banks and any other element confining or containing the water.

**Quarry material** see schedule 4 of the *Water Act 2000*.

*Note:* Quarry material means material, other than a mineral within the meaning of any Act relating to mining, in a watercourse or lake. Quarry material includes stone, gravel, sand, rock, clay, earth and soil unless it is removed from the watercourse or lake as waste material.

**Watercourse** see schedule 4 of the *Water Act 2000*.

*Note:* A watercourse:

1. is a river, creek or other stream, including a stream in the form of an anabranch or a tributary, in which water flows permanently or intermittently, regardless of the frequency of flow events:
   a. in a natural channel, whether artificially modified or not; or
   b. in an artificial channel that has changed the course of the stream
2. includes any of the following located in it:
   a. in-stream islands
   b. benches
   c. bars
3. does not, however, include a drainage feature
4. further:
   a. unless there is a contrary intention, a reference to a watercourse in the *Water Act 2000*, other than in section 5 or in the definitions in schedule 4 to the extent they support the operation of section 5, is a reference to anywhere that is:
      i. upstream of the downstream limit of the watercourse
      ii. between the lateral limits of the watercourse
   b. a reference in the *Water Act 2000* to, or to a circumstance that involves, land adjoining a watercourse, is a reference to, or to a circumstance that involves, land effectively adjoining a watercourse.

*Note:* Section 5AA of the *Water Act 2000* provides for the watercourse identification map that identifies the known extent of watercourses and drainage features that are managed under the *Water Act 2000*. Please be aware that the majority of minor watercourses and drainage features in Queensland have not yet been mapped, as indicated in the mapping, and therefore it should not be the only source of information that is relied upon when interpreting the SDAP provisions or identifying assessment triggers.
State code 16: Native vegetation clearing

16.1 Purpose statement

The purpose of this code is to ensure development:
1. is consistent with any notice requiring compliance on the land subject to the development application unless a better environmental outcome can be achieved.
2. is consistent with vegetation management requirements for particular regulated areas unless a better environmental outcome can be achieved.
3. minimises contributions to greenhouse gas emissions.
4. avoids clearing, or where avoidance is not reasonably possible, minimises clearing to:
   a. conserve vegetation
   b. avoid land degradation
   c. avoid the loss of biodiversity
   d. maintain ecological processes.
5. avoids impacts on vegetation that is a matter of state environmental significance, and where avoidance is not reasonably possible, minimises and mitigates impacts and provides an offset for any acceptable significant residual impacts where appropriate. An offset is only appropriate for any acceptable significant residual impacts on vegetation that forms a connectivity area for development that is a coordinated project or for necessary environmental clearing (natural channel diversion and contaminants removal); and
6. for vegetation retention purposes, is undertaken in a manner that retains or regenerates vegetation by sustainably managing the impacts of the clearing on regional ecosystems, biodiversity and ecological processes over time.

Notes: Guidance on how to comply with this code is provided in State Development Assessment Provisions Guidance material: State code 16: Native vegetation clearing, Department of Natural Resources, Mines and Energy, 2019.

Guidance for determining if the development will have a significant residual impact is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014 in section 3.1 (Regulated vegetation). Where the significant residual impact is considered an acceptable impact on the matter of state environmental significance and an offset is considered appropriate, the offset should be delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2015.

Statutory note: Where an offset applies to development on Brisbane core port land, it only applies to areas within the area identified as E1 Conservation/Buffer, E2 Open Space or Buffer/Investigation in the Brisbane Port LUP precinct plan.
16.2 Performance outcomes and acceptable outcomes

Development listed in table 16.2.1 should demonstrate compliance with the relevant provisions of tables 16.2.2 and 16.2.3.

2. within 100 metres of the **defining bank** of any natural **wetland**.  

**Clearing associated with wetlands (necessary environmental clearing – land restoration and natural disaster preparation)**

| PO9 Clearing maintains vegetation associated with any natural **wetland or rehabilitates the cleared area to protect:**  
AO9.1 Clearing does not occur in any of the following areas:  
1. inside the **defining bank** of any natural **wetland**; and  

INVESTED IN QUEENSLAND
### Performance outcomes
1. bank stability by protecting against bank erosion; and
2. water quality by filtering sediments, nutrients and other pollutants; and
3. aquatic habitat; and
4. terrestrial habitat.

### Acceptable outcomes
2. within 100 metres of the **defining bank** of any natural **wetland**.

OR

**AO9.2 Clearing** within 100 metres of the **defining bank** of any natural **wetland** only occurs where:
1. clearing does not exceed 0.5 hectares; and
2. **clearing** retains all **mature trees** and **habitat trees**; and
3. **clearing** that is for **flood preparation** complies with all of the following:
   a. clearing is undertaken by **felling** only; and
   b. clearing does not exceed 100 square metres; and
   c. clearing does not occur outside the **defining banks** of a natural **wetland**; and
   d. clearing does not occur within 50 metres of other clearing for **flood preparation**.

OR

**AO9.3 Clearing** to provide necessary access to undertake **necessary environmental clearing** only occurs where clearing:
1. does not exceed 10 metres in width; and
2. retains all **mature trees** and **habitat trees**; and
3. the access track:
   a. runs parallel to a natural **wetland** and clearing is not within 10 metres of the **defining bank** of a natural **wetland**; or
   b. is required to provide access across the **wetland**.

OR

**AO9.4 Where clearing** cannot be reasonably avoided, and clearing has been reasonably minimised, the cleared area is **rehabilitated**.

### Clearing associated with wetlands (necessary environmental clearing - natural channel diversion and contaminants removal)

**PO10 Clearing** maintains the current extent of **vegetation** associated with any natural **wetland** or **rehabilates** the cleared area to protect:
1. bank stability by protecting against bank erosion; and
2. water quality by filtering sediments, nutrients and other pollutants; and
3. aquatic habitat; and
4. terrestrial habitat.

**AO10.1 Clearing** does not occur in any of the following areas:
1. inside the **defining bank** of any natural **wetland**; and
2. within 100 metres of the **defining bank** of any natural **wetland**.

OR

**AO10.2 Clearing** within 100 metres of the **defining bank** of any natural **wetland** only occurs where:
1. clearing does not exceed 0.5 hectares; and
2. **clearing** retains all *mature trees* and *habitat trees*.

OR

**AO10.3 Clearing** to provide necessary access to undertake *necessary environmental clearing* only occurs where **clearing**:  
1. does not exceed 10 metres in width; and  
2. retains all *mature trees* and *habitat trees*; and  
3. the access track:  
   a. runs parallel to a natural *wetland* and **clearing** is not within 10 metres of the *defining bank* of a natural *wetland*; or  
   b. is required to provide access across the *wetland*.

OR

**AO10.4** Where **clearing** cannot be reasonably avoided, and **clearing** has been reasonably minimised, the **cleared** area is **rehabilitated**.

OR

**AO10.5** Where **clearing** is for *natural channel diversion* or *contaminants removal*, and **clearing** cannot be reasonably avoided, and:  
1. **clearing** has been reasonably minimised; and  
2. the **cleared** area cannot be reasonably **rehabilitated**,  
an offset is provided for any acceptable *significant residual impact* from **clearing** of *vegetation* associated with a natural *wetland* (a matter of state environmental significance).
### Clearing associated with watercourses and drainage features (public safety, relevant infrastructure activities, consequential development of IPA approval, coordinated project, extractive industry)

**PO11** Clearing maintains the current extent of vegetation associated with any watercourse or drainage feature to protect:
1. bank stability by protecting against bank erosion; and
2. water quality by filtering sediments, nutrients and other pollutants; and
3. aquatic habitat; and
4. terrestrial habitat.

**AO11.1** Clearing does not occur in any of the following areas:
1. inside the defining bank of a watercourse or drainage feature; and
2. within the relevant distance of the defining bank of any watercourse or drainage feature in table 16.3.2 of this code.

OR

**AO11.2** Clearing within any watercourse or drainage feature, or within the relevant distance of the defining bank of any watercourse or drainage feature only occurs where:
1. clearing does not exceed 0.5 hectares; and
2. clearing retains all mature trees and habitat trees; and
3. clearing that is for flood preparation complies with all of the following:
   a. clearing is undertaken by felling only; and
   b. clearing does not exceed 100 square metres; and

**AO11.3** Where clearing cannot be reasonably avoided, and clearing has been reasonably minimised, an offset is provided for any acceptable significant residual impact from clearing of vegetation associated with any watercourse or drainage feature (a matter of state environmental significance).

### Clearing associated with watercourses and drainage features (necessary environmental clearing - land restoration and natural disaster preparation)

**PO12** Clearing maintains vegetation associated with any watercourse or drainage feature or rehabilitates the cleared area to protect:
1. bank stability by protecting against bank erosion; and
2. water quality by filtering sediments, nutrients and other pollutants; and
3. aquatic habitat; and
4. terrestrial habitat.

**AO12.1** Clearing does not occur in any of the following areas:
1. inside the defining bank of a watercourse or drainage feature; and
2. within the relevant distance of the defining bank of any watercourse or drainage feature in table 16.3.2 of this code.

OR

**AO12.2** Clearing in any watercourse or drainage feature, or within the relevant distance of the defining bank of any watercourse or drainage feature in table 16.3.2 of this code only occurs where:
1. clearing does not exceed 0.5 hectares; and
2. clearing retains all mature trees and habitat trees; and
3. clearing that is for flood preparation complies with all of the following:
   a. clearing is undertaken by felling only; and
   b. clearing does not exceed 100 square metres; and
c. clearing does not occur outside of the defining bank of any watercourse or drainage feature; and

d. clearing does not occur within 50 metres of other clearing for flood preparation.

OR

AO12.3 Clearing to provide necessary access to undertake necessary environmental clearing only occurs where clearing:

1. does not exceed 10 metres in width; and
2. retains all mature trees and habitat trees; and
3. the access track:
   a. runs parallel to a watercourse or drainage feature and clearing is not within 10 metres of the defining bank of a watercourse or drainage feature; or
   b. is required to provide access across the watercourse or drainage feature.

OR

AO12.4 Where clearing cannot be reasonably avoided, and clearing has been reasonably minimised, the cleared area is rehabilitated.

Clearing associated with watercourses and drainage features (necessary environmental clearing – natural channel diversion, and contaminants removal)

PO13 Clearing maintains the current extent of vegetation associated with any watercourse or drainage feature or rehabilitates the cleared area to protect:

1. bank stability by protecting against bank erosion; and
2. water quality by filtering sediments, nutrients and other pollutants; and
3. aquatic habitat; and
4. terrestrial habitat.

AO13.1 Clearing does not occur within any of the following areas:

1. inside the defining bank of a watercourse or drainage feature; and
2. within the relevant distance of the defining bank of any watercourse or drainage feature in table 16.3.2 of this code.

OR

AO13.2 Clearing in any watercourse or drainage feature, or within the relevant distance of the defining bank of any watercourse or drainage feature in table 16.3.2 of this code only occurs where:

1. clearing does not exceed 0.5 hectares; and
2. clearing retains all mature trees and habitat trees.

OR

AO13.3 Clearing to provide necessary access to undertake necessary environmental clearing only occurs where:

1. clearing does not exceed 10 metres in width; and
2. clearing retains all mature trees and habitat trees; and
3. the access track:
   a. runs parallel to a watercourse or drainage feature and clearing is not within 10 metres of the defining bank of a watercourse or drainage feature; or
   b. is required to provide access across the watercourse or drainage feature.

OR

AO13.4 Where clearing cannot be reasonably avoided, and:
1. clearing has been reasonably minimised; and
2. the cleared area cannot be reasonably rehabilitated, an offset is provided for any acceptable significant residual impact from clearing of vegetation associated with a watercourse or drainage feature (a matter of state environmental significance).

### Conserving remnant vegetation that are regional ecosystems (necessary to control non-native plants or declared pests)

**PO33 Clearing** activities:

1. maintain the natural floristic composition and **range of sizes** of each species of the **regional ecosystem** evenly spaced across the **application area**; and
2. retain all **habitat trees** and **mature trees**.

**AO33.1 Mechanical clearing**:

1. only occurs within 1.5 metres from the edge of the canopy of individual non-native plants, unless the **clearing** is required to provide necessary access to control a non-native plant or **declared pest**; and
2. does not occur using two machines linked by chain or cable; and
3. retains all **habitat trees** and **mature trees**.

**AND**

**AO33.2 Clearing** to provide necessary access to control non-native plants or **declared pests** does not exceed five metres in width.

**AND**

**AO33.3 Any regional ecosystem burn** is undertaken in accordance with the fire guideline for the **regional ecosystem**, as outlined in the Regional Ecosystem Description Database (REDD).

**AND**

**AO33.4 Chemical clearing** retains all of the following:

1. **mature trees**; and
2. **habitat trees**; and
3. at least 50 per cent of **immature trees** in each 50 metre by 50 metre area.

**AND**

**AO33.5 Aerial application** of a **root-absorbed broad spectrum herbicides** does not occur.

**AND**

**AO33.6 Root-absorbed broad spectrum herbicides** are not applied within whichever distance is the greater from a **mature tree** or a **habitat tree**:

1. 30 metres; or
2. the distance specified on the approved product label; or
3. the distance specified in the safety and use conditions issued by the Australian Pesticides and Veterinary Medicines Authority.

### Restoring the regional ecosystem (managing thickened vegetation)

**PO34 Clearing** activities:

**AO34.1 Clearing** does not occur in **thickets**.
1. restore the natural floristic composition and range of sizes of each species of the regional ecosystem evenly spaced across the application area; and
2. retain mature trees, habitat trees and tall immature trees and thickets.

AND

AO34.2 Clearing retains:
1. all mature trees and habitat trees;
2. a full range of sizes and species typical of the regional ecosystem in the area; and
3. where the number of mature trees plus habitat trees is less than 20 per hectare, tall immature trees to total 20 mature trees, habitat trees and tall immature trees per hectare.

AND

AO34.3 Clearing does not result in debris stacked or pushed against a mature tree, habitat tree or tall immature tree.

AND

AO34.4 If clearing immature trees, retain immature trees in each 50 metre by 50 metre area to at least the density specified in table 16.3.4 of this code.

AND

AO34.5 If clearing low shrubs:
1. in regional ecosystems where clearing is restricted to low shrubs as specified in table 16.3.4 of this code – clearing retains all immature trees;
2. in regional ecosystems where clearing is not restricted to low shrubs as specified in table 16.3.4 of this code – clearing retains at least the number of immature trees specified in table 16.3.4 of this code; and
3. clearing retains at least 10 per cent of the predominate species that have thickened.

AND

AO34.6 Mechanical clearing does not occur within 5 metres of the trunk of a mature tree, habitat tree or tall immature tree.

AND

AO34.7 Clearing is not undertaken by:
1. aerial application of any herbicide;
2. application of a root-absorbed broad spectrum herbicide.

AND

AO34.8 Chemical clearing does not occur within five metres of the trunk of a mature tree, habitat tree or tall immature tree.
<table>

<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

### Conserving vegetation (fodder harvesting)

**PO41 Clearing** is carried out in a way that conserves:

1. remnant vegetation in perpetuity; and
2. the regional ecosystem in which the vegetation is situated.

**AO41.1 Clearing** does not result in the removal of non-fodder species with a height of four metres or more.

**AND**

**AO41.2 Selective harvesting**:

1. retains all non-fodder species except where the damage is an unavoidable consequence of clearing the selected fodder tree; and
2. when using a chainsaw in regional ecosystems listed in table 16.3.6 of this code, retains at least one fodder tree for every fodder tree cleared; and
3. in least concern regional ecosystems listed in table 16.3.7 of this code, retains at least one fodder tree for each fodder tree cleared; and
4. In **of concern regional ecosystems** listed in table 16.3.7 of this code, retains at least two fodder trees for each fodder tree **cleared**.

AND

**AO41.3 Strip harvesting and block harvesting:**
1. Where **fodder harvesting** has previously occurred in an area of a lot, only occurs if all of the following apply:
   a. The **vegetation** has not been **cleared** in the last 10 years; and
   b. The average height of the fodder trees is at least 70 per cent of the height of the tallest stands of **fodder species** in the **regional ecosystem**; and
   c. The fodder trees that were previously harvested have now attained an average height of at least 4 metres.
2. Aligns **clearing** along the contour where practical; and
3. Does not occur in patches of **regional ecosystems** that are less than 10 hectares in area or less than 500 metres wide.

AND

**AO41.4 Strip harvesting:**
1. Does not result in any **strip harvesting area** exceeding 50 metres in width; and
2. Results in all **strip retention areas**:
   a. Being preserved along the length of **strip harvest areas** to a width of at least 1.5 times that of the adjacent **strip harvest area**; and
   b. Containing **fodder species** with an average height of at least four metres; and
3. Does not result in **clearing** for machinery access between **strip harvest areas** exceeding 15 metres in width.

AND

**AO41.5 Block harvesting:**
1. Does not result in any **block harvest area** exceeding one hectare; and
2. Results in **block retention areas**:
   a. Being preserved between **block harvest areas** in accordance with the widths specified in table 16.3.8 of this code; and
   b. Containing **fodder species** with an average height of at least four metres; and
3. Does not result in **clearing** for machinery access between **block harvest areas** exceeding 10 metres in width.
PO42 **Fodder harvesting** is carried out in a way that results in the woody biomass of the **cleared vegetation** remaining where it is **cleared**.

16.6 Glossary of terms

**Accelerated soil erosion** means **soil erosion** that exceeds the natural level and that occurs as a direct result of human activity.

**Accepted development vegetation clearing code** see the *Vegetation Management Act 1999.*

Note: An **accepted development vegetation clearing code** is a code made under section 19O of the *Vegetation Management Act 1999.*

**Adverse impacts of clearing** include, but are not limited to, the following:

1. the loss of vegetation
2. the loss of biodiversity
3. land degradation
4. loss of connectivity
5. altered **ecological processes**; and
6. contributions to greenhouse gas emissions.
Aerial application means application by aircraft or drone.

Application area means the area the subject of the development application that is proposed to be cleared of vegetation.

Better environmental outcome means an environmental outcome provided on land in exchange for an area to be developed which is a particular regulated area, or is subject to a notice requiring compliance (impact area), and is legally secured using a declared area (voluntary) before the commencement of works.

Biodiversity see the Vegetation Management Act 1999.

Note: Biodiversity means the variability among living organisms from all sources, including terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are a part, and includes:
1. diversity within species and between species; and
2. diversity of ecosystems.

Block harvest area means the block or clump where block harvesting is undertaken.

Block harvesting means fodder harvesting in blocks or clump (block harvest areas) while retaining undisturbed areas of vegetation (block retention areas) on all sides of the block harvest area.

Block retention area means an undisturbed area of vegetation required to be retained on all sides of a block harvest area when undertaking block harvesting.

Built infrastructure see Vegetation Management Act 1999

Note: built infrastructure includes a building, or other structure, built or used for any purpose

Category A area see the Vegetation Management Act 1999.

Note: A category A area is an area, other than a category B area, category C area, category R area or category X area, shown on the regulated vegetation management map as a category A area that:
1. is any of the following:
   a. a declared area
   b. an offset area
   c. an exchange area; or
2. has been unlawfully cleared; or
3. is, or has been, subject to:
   a. a restoration notice; or
   b. an enforcement notice under the Planning Act 2016 containing conditions about restoration of vegetation; or
4. has been cleared of native vegetation and in relation to the clearing a person has been found guilty by a court, whether or not a conviction has been recorded, of a clearing offence; or
5. the chief executive decides under section 20BA [of the VMA] is a category A area.

Category B area see the Vegetation Management Act 1999.

Note: A category B area is an area, other than a category A area, category C area, category R area or category X area, shown on the regulated vegetation management map as a category B area that:
1. contains remnant vegetation; or
2. the chief executive [administering the VMA] decides to show on the regulated vegetation management map as a category B area; or
3. if section 20AN [of the VMA] does not apply to the area:
   a. is a Land Act tenure to be converted under the Land Act 1994 to another form of tenure, and contains:
      i. an endangered regional ecosystem; or
      ii. an of concern regional ecosystem; or
      iii. a least concern regional ecosystem.

Category X area see the Vegetation Management Act 1999.

Note: A category X area is an area, other than a category A area, category B area, category C area or category R area, shown on the regulated vegetation management map as a category X area. However, an area is not a category X area if the chief executive decides under section 20CA [of the VMA] that the area is not a category X area.

Clear, cleared or clearing of (vegetation) means:
1. to remove, cut down, ringbark, push over, poison or destroy in any way including by burning, flooding or draining; but
2. does not include destroying standing vegetation by stock, or lopping a tree.

Note: For the purpose of assessment of a material change of use or reconfiguring a lot application, any reference to clearing is taken to be “clearing as a result of the material change of use” or “clearing as a result of the reconfiguring a lot”.

Clearing as a result of a material change of use means:

1. clearing that will result from the change in use, consisting of any of the following:
   a. clearing to construct built infrastructure – including buildings, stormwater management systems, water supply and sewerage systems – that are proposed as part of the material change of use application
   b. clearing for roads, vehicle parking, vehicle and pedestrian access, utilities corridors, services, fences, fire breaks and fire management lines
   c. clearing that may not be necessary for developing built infrastructure but is associated with the use applied for

2. clearing that will become exempt clearing work if the development application is approved. This includes any of the following examples:
   a. clearing for routine management and essential management purposes associated with the approved development including clearing to maintain proposed infrastructure, facilities, roads, access routes, utilities, services and fences, and clearing to maintain the safety of persons and property that will be associated with the development
   b. clearing for necessary fire breaks, fire management lines and associated with the development. This will be assessed as follows:
      i. all built infrastructure other than underground services, roads and fences will be assessed as requiring for fire breaks and safety buffers with a width of 20 metres or 1.5 times the height of the tallest adjacent tree to the infrastructure, whichever is the greater. The extent of clearing assessed will include any vegetation that may be required to be cleared for fire breaks distances and safety buffers on adjoining land
      ii. all proposed allotment boundaries will be assessed as requiring clearing for fire management lines with a width of 10 metres constructed on either side of the allotment boundary unless written evidence from the relevant Area Commander of the Queensland Fire and Emergency Service which confirms an alternative fire management line width is required or acceptable
      iii. in the case of evidence being presented which demonstrates constraints on clearing for fire management lines as being reasonably imposed in accordance with written evidence from the relevant Area Commander or equivalent officer of the Queensland Fire and Emergency Service, the development may be conditioned so that the full extent of exempt clearing work prescribed for essential management under schedule 21 of the Planning Regulation 2017 cannot be carried out by current or future landholders.

Clearing as a result of reconfiguring a lot means:

1. clearing that will result from reconfiguring a lot, consisting of any of the following:
   a. clearing for boundary fence lines for each proposed allotment (whether or not the clearing is proposed as part of the application)
   b. clearing to construct built infrastructure, including stormwater management systems, water supply and sewerage systems, roads, access routes or utilities corridors that are proposed as part of the reconfiguring a lot application or that will be required as a condition of approval by the assessment manager
   c. clearing for excavation and filling, for example, where the lots are to be levelled

2. clearing of vegetation that will become exempt clearing work if the development application is approved. This includes any of the following examples:
   a. clearing for a single residence and reasonably associated buildings and structures for each allotment to be created as a result of the reconfiguring a lot, where no such dwelling house already exists on the proposed allotment
   b. all lots will be assessed as including clearing of two hectares for the purpose stated in 2a, or for lots smaller than two hectares the whole area of the lot, unless the application demonstrates that a greater or smaller area will be required and achieved – for example, building envelopes binding on title
   c. clearing for routine management and essential management purposes associated with the approved development including clearing to maintain proposed infrastructure, facilities, roads, access routes, utilities, services and fences, and clearing to maintain the safety of persons and property that will be associated with the development
d. **clearing** for necessary **fire breaks, fire management lines** and safety buffers associated with the development. This will be assessed as follows:

i. all **built infrastructure** other than underground services, roads and fences will be assessed as requiring **clearing** for **firebreaks** and safety buffers with a width of 20 metres or 1.5 times the height of the tallest adjacent tree to the infrastructure, whichever is the greater. The extent of **clearing** assessed will include any vegetation that may be required to be **cleared** for **fire breaks** and **safety buffers** on adjoining land.

ii. all proposed allotment boundaries will be assessed as requiring **clearing** for **fire management lines** with a width of 10 metres constructed on either side of the allotment boundary unless written evidence from the relevant Area Commander of the Queensland Fire and Emergency Service which confirms an alternative **fire management line** width is required or acceptable.

iii. in the case of evidence being presented which demonstrates constraints on **clearing** for **fire management lines** as being reasonably imposed in accordance with written evidence from the relevant Area Commander of the Queensland Fire and Emergency Service, the development may be conditioned so that the full extent of **exempt clearing work** prescribed for **essential management** under schedule 21 of the Planning Regulation 2017 cannot be carried out by current or future landholders.

**Coastal bioregions and subregions** mean the following bioregions and subregions, as shown in figure 16.4.1:

1. Brigalow Belt Bioregion sub-regions Townsville Plains (sub-region 11.1), Bogie River Hills (sub-region 11.2), and Marlborough Plains (sub-region 11.14)
2. Central Queensland Coast Bioregion
3. Cape York Peninsula Bioregion sub-region Starke Coastal Lowlands (sub-region 3.2)
4. Einasleigh Uplands Bioregion sub-region Hodgkinson Basin
5. Wet Tropics Bioregion

**Consequential development of IPA approval** means **clearing** that is a natural and ordinary consequence of other assessable development for which a development approval was given under the repealed **Integrated Planning Act 1997**, or a development application was made under that Act, before 16 May 2003.

**Contaminant** see the **Vegetation Management Act 1999**.

Note: **Contaminant** includes a gas, liquid, solid or energy source, including radioactivity and electromagnetic radiation.

**Contaminants removal** means part 4 of **necessary environmental clearing**, defined as **clearing** of vegetation that is necessary to remove **contaminants** from land.

**Coordinated project** see the **State Development and Public Works Organisation Act 1971**.

Note: A **coordinated project** is a project declared to be a **coordinated project** under the **State Development and Public Works Organisation Act 1971**.

**Declared area (voluntary)** see section 19F of the **Vegetation Management Act 1999**.

Note: A **declared area (voluntary)** is an area declared under the VMA to be an area of high nature conservation value or an area vulnerable to **land degradation**, at the request of the owner of the land.

**Declared pests** means restricted or prohibited matter declared under the **Biosecurity Act 2014**.

Note: A prohibited matter is a biosecurity matter that, for the time being, is established as prohibited matter. A restricted matter is a biosecurity matter that, for the time being, is established as restricted matter.

**Defining bank** means the bank which confines the seasonal flows but may be inundated by flooding from time to time. This can be either:

1. the bank or terrace that confines the water before the point of flooding; or
2. where there is no bank, the **seasonal high water line** which represents the point of flooding.

**Diameter** means the width of a tree trunk measured at 1.3 metres above the ground.

**Drainage feature** means a natural landscape feature, including a gully, drain, drainage depression or other erosion feature that:
1. is formed by the concentration of, or operates to confine or concentrate, overland flow water during and immediately after rainfall events
2. flows for only a short duration after a rainfall event, regardless of the frequency of flow events
3. commonly, does not have enough continuing flow to create a riverine environment
4. is shown on the vegetation management watercourse and drainage feature map:
   a. at a scale of 1:25 000 for the local government areas of Brisbane, Moreton Bay, Gold Coast, Sunshine Coast, Logan, Noosa and Redlands, unless the application is to clear vegetation for an extractive industry; or
   b. for all other local governments, and for applications to clear vegetation for an extractive industry.

Ecological processes means processes including, but not limited to, the following:
1. hydrological processes; or
2. soil development; or
3. nutrient cycling; or
4. chemical processes including storage of nutrients; or
5. decomposition and cycling of organic matter; or
6. pollination and seed production; or
7. seed dispersal; or
8. predator-prey relationships; or
9. germination and recruitment of species; or
10. the carbon cycle and stability of atmospheric carbon; or
11. habitats for flora and fauna (such as particular regional ecosystems, logs, rocks, debris, leaf litter, nectar, hollow bearing trees, food and shelter).

Encroachment means a woody species that has invaded an area of a grassland regional ecosystem to an extent the area is no longer consistent with the description of the regional ecosystem and the woody species is absent in historical imagery and present in recent imagery.

Endangered regional ecosystem see the Vegetation Management Act 1999.
Note: Endangered regional ecosystem means a regional ecosystem declared to be an endangered regional ecosystem under the VMA.

Enforcement notice means a notice under the Planning Act 2016 issued for a clearing offence or a notice under the Planning Act 2016 containing conditions about restoration of vegetation.

Environmental clearing management plan means a plan that outlines management actions that will be undertaken in an area cleared for necessary environmental clearing to rehabilitate the area over time to ensure endangered regional ecosystems, of concern regional ecosystems, least concern regional ecosystems, essential habitat, connectivity is maintained, wetlands and watercourses are protected, and clearing does not result in land degradation.
Note: Refer to the Guidelines for necessary environmental clearing to assist with developing the environmental clearing management plan.

Environmental offset agreement see the Environmental Offsets Act 2014.
Note: Environmental offset agreements may also be described as an ‘agreed delivery arrangement’ or ‘delivery agreement’.

Erosion and sediment control plan means a plan which details all of the following:
1. the presence and location of any accelerated soil erosion within the proposed development area; and
2. the rates of soil and sediment movement prior to the proposed development; and
3. the estimated rates of soil loss and sediment movement after the proposed development; and
4. the recognised best practice methods that will be employed to:
   a. ensure rates of soil loss and sediment movement are the same or less than those prior to the proposed development; and
   b. prevent increased soil erosion resulting from the clearing; and
   c. prevent increased sediment run-off entering a wetland, watercourse or drainage feature as a result of the clearing; and
   d. stabilise soil erosion which results from clearing.
5. A map showing where recognised best practice methods will be used within and around the proposed development area to address points 4(a) to 4(d) above.

Note: For further guidance on developing an erosion and sediment control plan, please refer to the Best Practice Erosion and Sediment Control Document, IECA, 2008.

Essential habitat see the Vegetation Management Act 1999, section 20AC.

Note: Essential habitat is shown on the essential habitat map.

Essential habitat for protected wildlife is a category A area, category B area or category C area shown on the regulated vegetation management map:

1. that has at least three essential habitat factors for the protected wildlife that must include any essential habitat factors that are stated as mandatory for the protected wildlife in the essential habitat database; or
2. in which the protected wildlife, at any stage of its life cycle, is located.

Essential habitat database see the Vegetation Management Act 1999.

Note: An essential habitat database means a database, listing essential habitat factors for protected wildlife, certified by the chief executive (administering the VMA) as an essential habitat database.

Essential habitat factor see the Vegetation Management Act 1999.

Note: Essential habitat factor, for protected wildlife, is a component of the wildlife’s habitat, including for example, a landform, pollinator, regional ecosystem, soil and water, that is necessary or desirable for the wildlife at any stage of its lifecycle.

Essential habitat map see the Vegetation Management Act 1999, section 20AC.

Note: The essential habitat map is a map certified by the chief executive (administering the VMA) as the essential habitat map for the State and showing, for the State, areas the chief executive reasonably believes are areas of essential habitat for protected wildlife.

Essential management see schedule 24 of the Planning Regulation 2017.

Note: Essential management means clearing native vegetation:

1. for establishing or maintaining a necessary firebreak to protect infrastructure other than a fence, road or vehicular track, if the maximum width of the firebreak is equivalent to 1.5 times the height of the tallest vegetation adjacent to the infrastructure, or 20 metres, whichever is the greater; or
2. for establishing a necessary fire management line if the maximum width of the clearing for the fire management line is 10 metres; or
3. necessary to remove or reduce the imminent risk that the vegetation poses of serious personal injury or damage to the infrastructure; or
4. by fire under the Fire and Emergency Services Act 1990 to reduce hazardous fuel load; or
5. necessary to maintain infrastructure including any core airport infrastructure, buildings, fences, helipads, roads, stockyards, vehicular tracks, watering facilities and constructed drains other than contour banks, other than to source construction material; or
6. for maintaining a garden or orchard, other than clearing predominant canopy trees to maintain underplantings established within remnant vegetation; or
7. on land subject to a lease issued under the Land Act 1994 for agriculture or grazing purposes to source construction timber to repair existing infrastructure on the land, if:
   a. the infrastructure is in need of immediate repair
   b. the clearing does not cause land degradation as defined under the VMA
   c. restoration of a similar type, and to the extent of the removed trees, is ensured; or
8. by the owner on freehold land to source construction timber to maintain infrastructure on any land of the owners, if:
   a. the clearing does not cause land degradation as defined under the VMA
   b. restoration of a similar type, and to the extent of the removed trees, is ensured.

Exchange area see the Vegetation Management Act 1999.

Note: Exchange area means an area of vegetation that must be protected in the way provided under a self-assessable vegetation clearing code in exchange for clearing high value regrowth vegetation.

Exempt clearing work see the Planning Regulation 2017.

Note: Exempt clearing work means operational work that is the clearing of native vegetation as exempt clearing work or for particular land as prescribed in schedule 21 of the Planning Regulation 2017, or that, under the Vegetation Management Act 1999, section 74, is not affected by that Act.

Extractive industry see the Vegetation Management Act 1999.

Note: Extractive industry means one or more of the following:

1. dredging material from the bed of any waters
2. extracting, from a pit or quarry, rock, sand, clay, gravel, loam or other material
3. screening, washing, grinding, milling, sizing or separating material extracted from a pit or quarry; and
4. includes carrying out work that is the natural and ordinary consequence of carrying out the work mentioned above.

Felling means the cutting of vegetation using equipment that retains the root of the vegetation in the ground, such as a handsaw, axe, brush cutter or chainsaw. The term does not include using a dozer or tractor or other type of machinery to push vegetation.
Firebreak means an area that has been cleared and maintained in a low fuel state to either stop or steady wildfire, or back burn against.

Fire management line means a pathway, track or road, including existing property tracks, or fence line clearings, which can be used to access water for fire-fighting, divide the property into sub-units to allow for a fuel reduction burning program to be carried out, or divide the property into sub-units to allow for back burning in the event of a wildfire.

Flood means an overflow of water rising above the defining banks of a wetland, watercourse or drainage feature.

Flood preparation means activities undertaken to reduce the likelihood or impacts of a flood.

Fodder harvesting see the Vegetation Management Act 1999.
Note: Fodder harvesting is the clearing of vegetation predominantly consisting of fodder species:
1. necessary to provide fodder for stock
2. carried out in a way that:
   a. conserves the vegetation in perpetuity
   b. conserves the regional ecosystem in which the vegetation is situated
   c. results in the woody biomass of the cleared vegetation remaining where it is cleared.

Fodder species means any of the following species:
1. Acacia aneura;
2. Acacia brachystachya;
3. Acacia excels;
4. Acacia pendula;
5. Acacia sibirica;
6. Alphitonia excels;
7. Flindersia maculosa;
8. Geijera parviflora.

Foliar herbicide means a herbicide primarily absorbed by the foliage of plants. For example, spraying using glyphosate.
Note: The application of a herbicide must also comply with the approved product label or the safety and use conditions published by the Australian Pesticides and Veterinary Medicines Authority.

Ground cover means plant matter, either dead or alive, woody or non-woody, that covers the surface of the ground (either attached or detached). For example, grasses, shrubs, tree and grass leaf litter, twigs, logs, branches etc.

Groundwater means water occurring below the surface of the ground.

Grove means an area of woody vegetation that is present in historical imagery.

Gully erosion means the removal of soil by water creating large incised channels more than 30 centimetres in depth.

Habitat trees means a living or dead standing tree that contains either of the following:
1. one or more visible hollows positioned at least two metres above the base of the tree;
2. an active bird’s nest or the nest of a raptor or other bird that uses the same nest each year.
Note: Habitat trees are used, or potentially used, by hollow-dwelling fauna.

Historical imagery means an aerial photograph or satellite image used for the purpose of demonstrating the presence of encroachment, that was taken more than 15 years ago.

Immature trees means a tree or shrub (other than a mature tree or habitat tree) that is two metres or more in height.
Land Act notice see the Vegetation Management Act 1999, section 20BA(b).

Note: A Land Act notice is a notice issued by the chief executive [administrating the VMA] for clearing in contravention of a tree clearing provision under the Land Act 1994 as in force before the commencement of the Vegetation Management and Other Legislation Amendment Act 2004, section 3.

Land degradation see the Vegetation Management Act 1999.

Note: Land degradation includes any of the following:
1. soil erosion; or
2. rising water tables; or
3. the expression of salinity; or
4. mass movement by gravity of soil or rock; or
5. stream bank instability; or
6. a process that results in declining water quality.

Land restoration means part 1 of necessary environmental clearing, defined as clearing of vegetation that is necessary to restore the ecological and environmental condition of land.

Land zone 1 means quaternary estuarine and marine deposits subject to periodic inundation by saline or brackish marine waters. This includes mangroves, salt pans, off-shore tidal flats and tidal beaches.

Land zone 2 means quaternary coastal dunes and beach ridges. This includes degraded dunes, sand plains and swales, lakes and swamps enclosed by dunes, as well as coral and sand cays.

Land zone 3 means quaternary alluvial systems, including floodplains, alluvial plains, alluvial fans, terraces, levees, swamps, channels, closed depressions and fine textured palaeo-estuarine deposits. This also includes estuarine plains currently under fresh water influence, inland lakes and associated dune systems (lunettes).

Least concern regional ecosystem see the Vegetation Management Act 1999.

Note: Least concern regional ecosystem means a regional ecosystem declared to be a least concern regional ecosystem under the VMA.

Legally secured offset area see the Environmental Offsets Act 2014.

Note: An area of land is a legally secured offset area if:
1. the area is:
   a. an environmental offset protection area; or
   b. an area declared as an area of high nature conservation value under section 19F of the Vegetation Management Act 1999; or
   c. another area prescribed under a regulation; and
2. under the Environmental Offsets Act 2014 or another Act, the area is subject to a delivery or management plan or agreement (however described in this Act or the other Act) to achieve a conservation outcome for a prescribed environmental matter.

Low shrub means any live woody tree, shrub or ground cover less than two meters high.

Maintain the current extent means to:
1. avoid clearing the regional ecosystems; or
2. if subparagraph 1 is not reasonably practicable, ensure the structure and function of the regional ecosystem is maintained (minimise the clearing); or
3. if subparagraphs 1 or 2 are not reasonably practicable, provide an offset.

Managing thickened vegetation means the selective clearing of vegetation at a locality that does not include clearing using a chain or cable linked between 2 tractors, bulldozers or other traction vehicles –
1. to restore a regional ecosystem to the floristic composition and range of densities typical the regional ecosystem in the bioregion in which it is located; and
2. to maintain ecological processes and prevent loss of biodiversity.

Mass movement is a landslip, earthflow, landslide, rock avalanche or soil creep.

Matters of state environmental significance see the Environmental Offsets Regulation 2014, schedule 2.

Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:
1. regional ecosystems under the Vegetation Management Act 1999 that:
   a. are endangered regional ecosystems; or
   b. are of concern regional ecosystems; or
   c. intersect with a wetland shown on the vegetation management wetlands map; or
   d. contain areas of essential habitat shown on the essential habitat map for an animal that is endangered wildlife or vulnerable wildlife or a plant that is endangered wildlife or vulnerable wildlife; or
   e. are located within the defined distances stated in the Environmental Offsets Policy 2014 from the defining banks of a relevant watercourse or drainage feature as shown on the vegetation management watercourse and drainage feature map; or
   f. are areas of land determined to be required for ecosystem functioning ('connectivity areas'); or
2. wetlands in a wetland protection area or wetlands of high ecological significance shown on the Map of referable wetlands under the Environmental Protection Regulation 2008; or
3. wetlands and watercourses in high ecological value waters as defined in the Environmental Protection (Water) Policy 2009, schedule 2; or
4. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014; or
5. threatened wildlife under the Nature Conservation Act 1992 and special least concern animals under the Nature Conservation (Wildlife) Regulation 2006; or
6. protected areas under the Nature Conservation Act 1992, excluding coordinated conservation areas; or
7. highly protected zones of state marine parks under the Marine Parks Act 2004; or
8. fish habitat areas under the Fisheries Act 1994; or
9. waterways that provide for fish passage under the Fisheries Act 1994 if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway; or
10. marine plants under the Fisheries Act 1994; or
11. legally secured offset areas.

**Mature tree** means a native tree that is:
1. a Eucalyptus, Corymbia, Lophostemon and Angophora species (such as ‘gum’ or ‘box’ trees) with a single trunk or several trunks with a diameter of 30 centimetres or more;
2. any other native tree species with—a single trunk with a diameter of 20 cm or more; or
   several trunks with a diameter of 25 cm or more.

Note: If there are several trunks, add the diameters of the two largest trunks together.

**Mechanical clearing** means the clearing of vegetation using any of the following methods:
1. slashing; or
2. brush cutting; or
3. machinery which disturbs the soil surface or uproots woody vegetation.

**Natural channel diversion** means part 2 of necessary environmental clearing, defined as clearing that is necessary to divert existing natural channels in a way that replicates the existing form of the natural channels.

**Natural disaster preparation** means part 3 of necessary environmental clearing, defined as clearing that is necessary to prepare for the likelihood of a natural disaster.

**Necessary environmental clearing** see the Vegetation Management Act 1999.

Note: Necessary environmental clearing means clearing of vegetation that is necessary to:
1. restore the ecological and environmental condition of land (example – stabilising banks of watercourses and drainage features, works to rehabilitate eroded areas, works to prevent erosion of land or for ecological fire management); or
2. divert existing natural channels in a way that replicates the existing form of the natural channels; or
3. prepare for the likelihood of a natural disaster (example – removal of silt to mitigate flooding); or
4. remove contaminants from land.

**Non-coastal bioregions and subregions** mean the following bioregions and subregions, as shown in figure 16.4.1:
1. Brigalow Belt Bioregion sub-regions not listed under coastal bioregions and subregions
2. New England Tableland Bioregion
3. Northwest Highlands Bioregion
4. Gulf Plains Bioregion
5. Cape York Peninsula Bioregion subregions not listed under coastal bioregions and subregions
6. Mitchell Grass Downs Bioregion
7. Channel Country Bioregion
8. Mulga Lands Bioregion
9. Einasleigh Uplands Bioregion subregions not listed under coastal bioregions and subregions
10. Desert Uplands Bioregion.

Notice requiring compliance mean any of the following notices:
1. a restoration notice; or
2. a stop work notice; or
3. a Land Act notice; or
4. a trespass notice if the trespass related act under the Land Act 1994 for the notice is the clearing of vegetation on the relevant land; or
5. an enforcement notice under the Planning Act 2016 issued for a vegetation clearing offence; or
6. a compliance notice containing conditions about the restoration of vegetation.

Of concern regional ecosystem see the Vegetation Management Act 1999.
Note: Of concern regional ecosystem means a regional ecosystem declared to be an of concern regional ecosystem under the VMA.

Offset means environmental offset under the Environmental Offsets Act 2014.
Note: Environmental offset means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a prescribed environmental matter, delivered in accordance with the Environmental offsets Framework. The prescribed environmental matters assessed under the State Development Assessment Provisions are matters of state environmental significance.

Offset area see the Vegetation Management Act 1999.
Note: Offset area means a legally secured offset area under the Environmental Offsets Act 2014.

Particular regulated areas means any of the following areas:
1. an exchange area; or
2. an unlawfully cleared area; or
3. a declared area (voluntary) declared for purposes other than to legally secure an offset area under the Environmental Offsets Act 2014; or
4. an area on a PMAV shown to be category A area where the chief executive [administering the VMA] reasonably believes that a vegetation clearing offence is being, or has been, committed in relation to the area.

Prescribed environmental matters see the Environmental Offsets Act 2014.
Note: A prescribed environmental matter is any species, ecosystem or other similar matter protected under Queensland legislation for which an offset may be provided. A prescribed environmental matter may be a matter of national, state or environmental significance, however, assessment criteria in the State Development Assessment Provisions only relate to matters of state environmental significance. Each of the prescribed environmental matters is listed under the Environmental Offsets Regulation 2014.

Prescribed regional ecosystems and restrictions means a regional ecosystem or restriction prescribed in table 16.3.4 of this code for managing thickened vegetation.

Property map of assessable vegetation (PMAV) see Vegetation Management Act 1999.
Note:
1. a property map of assessable vegetation (PMAV) is a map certified by the chief executive [administering the VMA] as a PMAV for an area and showing the vegetation category area for the area
2. the map may also show for the area the location of the boundaries of, and the regional ecosystem number for, each regional ecosystem in the area.

Protected wildlife see the Vegetation Management Act 1999.
Note: Protected wildlife means native wildlife prescribed under the Nature Conservation Act 1992 as:
1. extinct in the wild wildlife; or
2. endangered wildlife; or
3. vulnerable wildlife; or
4. near threatened wildlife; or
5. least concern wildlife.

Public safety means clearing to ensure public safety.

Range of sizes means retaining a range of all size classes as outlined in table 16.3.9.

Recent imagery means an aerial photograph or satellite image used for the purposes of demonstrating encroachment, that was taken less than 15 years ago.
Recognised best practices method means a method to mitigate accelerated soil erosion, recognised by any of the following:
1. a Federal or State government agency published advice or guide, such as the Soil Conservation Guidelines for Queensland (3rd edition)

Regional ecosystem see the Vegetation Management Act 1999. 
Note: Regional ecosystem means a vegetation community in a bioregion that is consistently associated with a particular combination of geology, landform and soil.

Regional ecosystem burn means a burn that is planned and undertaken for the purpose of restoring the range of plant species, size classes, and vegetation densities typical of the regional ecosystem.
Note: A regional ecosystem burn is for purposes other than reducing hazardous fuel loads. Reducing hazardous fuel loads by fire under the Fire and Emergency Services Act 1990, is exempt clearing work.
A permit under the Fire and Emergency Services Act 1990 is required for a regional ecosystem burn.

Regulated vegetation management map see the Vegetation Management Act 1999, section 20A. 
Note: The regulated vegetation management map is the map certified by the chief executive [administering the VMA] as the regulated vegetation management map for a part of the State and showing the vegetation category areas for the part.

Rehabilitate means undertaking management actions in accordance with an environmental clearing management plan to ensure:
1. clearing vegetation associated with a wetland protects:
   a. water quality by filtering sediments, nutrients and pollutants
   b. aquatic habitat
   c. terrestrial habitat.
2. clearing vegetation associated with a watercourse or drainage feature protects:
   a. bank stability by protecting against bank erosion
   b. water quality by filtering sediments, nutrients and pollutants
   c. aquatic habitat
   d. terrestrial habitat
3. connectivity areas are maintained
4. essential habitat is maintained
5. endangered regional ecosystems, of concern regional ecosystems and least concern regional ecosystems are maintained.
Note: Refer to the Guidelines for necessary environmental clearing, Department of Natural Resources and Mines, 2013 to assist with developing relevant management actions to ensure the application area is appropriately rehabilitated.

Relevant infrastructure activities see the Vegetation Management Act 1999. 
Note: Relevant infrastructure activities means:
1. establishing and maintaining a necessary fence, firebreak, road, or vehicular track; or
2. constructing and maintaining necessary built infrastructure.

Remnant vegetation see the Vegetation Management Act 1999. 
Note: Remnant vegetation means vegetation:
1. that is:
   a. an endangered regional ecosystem; or
   b. an of concern regional ecosystem; or
   c. a least concern regional ecosystem
2. forming the predominant canopy of the vegetation:
   a. covering more than 50 per cent of the undisturbed predominant canopy
   b. averaging more than 70 per cent of the vegetation’s undisturbed height
   c. composed of species characteristic of the vegetation’s undisturbed predominant canopy.

Restoration notice see the Vegetation Management Act 1999, section 54B. 
Note: A restoration notice means a notice given to a person by an official requiring the person to rectify the matter if the official reasonably believes the person has committed a vegetation clearing offence and the matter can be rectified.

Retained tree means any native tree that has a diameter at 1.3 metres above ground level which is 20 centimetres or more. For multi-stemmed trees, add the diameters of the two largest stems.
Retained vegetation means an area of a fodder regional ecosystem that has an average canopy height of fodder species that is more than four metres.

Rill erosion means the removal of soil by runoff water to create small channels up to 30 centimetres deep.

Root-absorbed broad spectrum herbicide means a broad spectrum herbicide that is primarily absorbed by the roots of plants, rather than the shoots.

Note: Examples of root-absorbed broad spectrum herbicides are hexazinone (Velpar) or tebuthiuron (Graslan). Glyphosate is not considered a root absorbed broad spectrum herbicide.

The application of a herbicide must also comply with the approved product label or the safety and use conditions published by the Australian Pesticides and Veterinary Medicines Authority.

Routine management see schedule 24 of the Planning Regulation 2017.

Note: Routine management means the clearing of native vegetation:
1. to establish a necessary fence, road or vehicular track if the maximum width of clearing for the fence, road or track is 10 metres; or
2. to construct necessary built infrastructure, including core airport infrastructure, other than contour banks, fences, roads or vehicular tracks, if:
   a. the clearing is not to source construction timber
   b. the total extent of clearing is less than two hectares
   c. the total extent of the infrastructure is less than two hectares; or
3. by the owner on freehold land to source construction timber for establishing necessary infrastructure on any land of the owner, if:
   a. the clearing does not cause land degradation as defined under the VMA
   b. restoration of a similar type, and to the extent of the removed trees, is ensured; or
4. by the lessee of land subject to a lease issued under the Land Act 1994 for agriculture or grazing purposes to source construction timber, other than commercial timber, for establishing necessary infrastructure on the land if:
   a. the clearing does not cause land degradation as defined under the VMA
   b. restoration of a similar type, and to the extent of the removed trees, is ensured.

Salinisation means the process of salts accumulating in soils or waters.

Salinity means waterlogging or the salinisation of groundwater, surface water or soil.

Salinity expression area means an area containing more than one of the following salinity indicators:
1. plant species tolerant of saline conditions, shallow water tables or poor drainage (waterlogging);
2. wet areas in lower parts of the landscape or bare soil (soil scalding);
3. dieback of larger trees in low, wetter parts of the landscape (outside drought conditions or the effects of fire);
4. salt accumulations on the surface (often white and powdery, sometimes crystalline); or
5. areas of shallow groundwater.

Note:
1. For example—Melaleuca spp. (in particular Melaleuca bracteata and Melaleuca quinquenervia), Sporobolus spp. (in particular saltwater or marine couch), Salsola kali (soft roly-poly), Sclerolaena spp. (in particular prickly roly-poly), Cyperus spp. (sedges), Juncus spp. (rushes), Atriplex spp. (saltbushes), Halosarcia spp. (samphires), Chloris spp. (Rhodes grasses), Cynodon dactylon (common couch), Enchytraea tomentosa (ruby saltbush), Sesuvium portulacastrum (purslane), Tecticornia spp (samphires), Phragmites spp.
2. A water table less than five metres from the surface would generally be considered as shallow for this purpose. One mechanism to identify this is from a nearby bore.

Scald means a bare area formed when the surface soil is removed by wind or water erosion, exposing a more clayey subsoil which is devoid of vegetation and relatively impermeable to water.

Seasonal high water line means the zone which represents the usual peak seasonal flow level and can be identified by deposition, debris or characteristic vegetation zonation. If this is not obvious, project a horizontal line from the seasonal high water line on the opposite bank.

Selective harvesting involves felling individual fodder trees using a chainsaw, or selectively pushing individual fodder trees using a tractor or dozer. This practice should cause minimal damage to the surrounding vegetation.

Sheet erosion is the removal of a relatively uniform layer of soil from the surface with generally no obvious channel created.

**Significant residual impact** see the *Environmental Offsets Act 2014.*

Note: *Significant residual impact* is an impact, whether direct or indirect, of a prescribed activity on all or part of a *prescribed environmental matter* that:

1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity;
2. is, or will or is likely to be, significant.

Guidance for determining if a prescribed activity will have a *significant residual impact* on a *matter of state environmental significance* is provided in the Significant Residual Impact Guideline, Department State Development, Infrastructure and Planning, 2014.

**Slope** means a measure of the upward or downward incline of the land surface over any 30 metre length in the application area.

**Soil erosion** means, for the purpose of this code, forms of accelerated soil erosion, including *mass movement, gully erosion, rill erosion, sheet erosion, tunnel erosion, stream bank erosion, wind erosion,* or *scald,* and any associated loss of chemical, physical or biological fertility – including, but not limited to water holding capacity, soil structure, organic matter, soil biology, and nutrients.

**Stream order** means a numerical ordering classification of each stream segment according to its position within a catchment, as shown in figure 16.4.2. Streams are *watercourses* and *drainage features* shown on the vegetation management watercourse and drainage feature map.

**Stop work notice** see the *Vegetation Management Act 1999,* section 54A. Note: A **stop work notice** means a notice given to a person by an official requiring the person to stop committing a *vegetation* offence if the official reasonably believes the person is committing a *vegetation clearing* offence.

**Strip harvest area** means a strip where **strip harvesting** is undertaken.

**Strip harvesting** means fodder harvesting in strips (**strip harvest areas**), while retaining undisturbed areas of *vegetation* (**strip retention areas**) on both sides of a **strip harvest area**.

**Strip retention area** means an undisturbed area of *vegetation* required to be retained on all sides of a **strip harvest area** when undertaking **strip harvesting**.

**Tall immature tree** means the tallest immature trees retained as ‘surrogate’ *mature trees.*

**Thicket** means thick or dense patches of *vegetation* such as vine-scrub, gidgee (*Acacia cambagei*) or brigalow (*Acacia harpophylla*) that naturally occur in sparse to mid-*dense regional ecosystems.* Note: **Thickets** are generally too small to be mapped as distinct vegetation communities, but may be visible on satellite or aerial imagery. The species composition within vine-scrub **thickets** may differ from the surrounding vegetation.

**Threatening processes** are natural or human induced process that adversely affect or may adversely affect regulated *vegetation,* populations, ecological communities or species. A threatening process threatens or may threaten the survival, abundance or evolutionary development of a native species or ecological community and may include but are not limited to:

1. fragmentation
2. land clearing
3. climate change
4. weather events
5. weeds and pests (animal and plant) infestations
6. fire
7. disease
8. land degradation
9. predation.

Tunnel erosion means the removal of subsoil by water while the surface soil remains relatively intact.

Unlawfully cleared see the Vegetation Management Act 1999.

Note: means cleared of vegetation by a person in contravention of:
1. a vegetation clearing provision, if the person:
   a. has not contested an infringement notice given for the contravention; or
   b. has been convicted of the contravention, whether or not the conviction is recorded; or
2. a tree clearing provision under the Land Act 1994, as in force before the commencement of the Vegetation Management and Other Legislation Amendment Act 2004, section 3.

Vegetation see the Vegetation Management Act 1999.

Note: For the purpose of this code, vegetation is limited to vegetation where it is identified as assessable under the Planning Regulation 2017.

Vegetation clearing provision see the Vegetation Management Act 1999.

Note: A vegetation clearing provision is any of the following to the extent the provision relates to the clearing of vegetation:
1. the Planning Act 2016, section 162, 163(1), 164, 165 and 168(5);
2. for the clearing of vegetation that happened before the repeal of the Sustainable Planning Act 2009 – section 578(1), 580(1), 581(1), 582 or 594(1) of that Act.

Vegetation management requirements means any conditions, restrictions, management requirements or outcomes identified in a particular regulated area which must be undertaken or complied with to achieve compliance with the particular regulated area.

Vegetation management watercourse and drainage feature map see the Vegetation Management Act 1999.

Note: The vegetation management watercourse and drainage feature map is the map certified by the chief executive [administering the VMA] as the vegetation management watercourse and drainage feature map showing particular watercourses and drainage features for the State. The map consists of the following documents:
1. the document called Vegetation management watercourse and drainage feature map (1:25 000)
2. the document called Vegetation management watercourse and drainage feature map (1:100 000 and 1:250 000).

Vegetation management wetlands map see the Vegetation Management Act 1999.

Note: The vegetation management wetlands map is the map certified by the chief executive [administering the VMA] as the vegetation management wetlands map showing particular wetlands for the state.

Vegetation retention purposes means clearing that is not intended to permanently remove vegetation or change remnant vegetation to non-remnant vegetation, but retains vegetation or allows it to regenerate over time. Vegetation retention purposes are:
1. fodder harvesting
2. controlling non-native plants or declared pests
3. managing thickened vegetation
4. clearing of encroachment
5. necessary environmental clearing.

Watercourse means a watercourse as defined under the Vegetation Management Act 1999, other than an artificial channel, that is shown:
1. at a scale of 1:25 000 on the vegetation management watercourse and drainage feature map for the local government areas of Brisbane, Moreton Bay, Gold Coast, Sunshine Coast, Logan, Noosa and Redlands, unless the application is to clear vegetation for an extractive industry; or
2. on the vegetation management watercourse and drainage feature map for all other local governments and applications to clear vegetation for extractive industries.

Waterlogging means to soak or saturate with water.

Weed cover means the estimated percentage of the area that is covered by weeds, measured over a 30 metre by 30 metre (0.09 hectare) area.
Wetland means an area of land that supports plants or is associated with plants that are adapted to and dependent on living in wet conditions for at least part of their life cycle, and are shown on the vegetation management wetlands map.

Wind erosion means the movement of soil by wind.

16.7 Abbreviations

PMAV – Property map of assessable vegetation

VMA – Vegetation Management Act 1999

REDD – Regional Ecosystem Description Database
State code 17: Aquaculture

17.1 Purpose statement

The purpose of this code is to ensure aquaculture industry development and practices are ecologically sustainable. The code ensures that development:

1. appropriately carries out the use of fisheries and aquaculture fisheries resources (proposed broodstock and culture species)
2. meets standards in the prevention, control and eradication of disease in fish
3. suitably contains aquaculture fisheries resources to prevent escape and release
4. has the ability to prevent the entry of fisheries resources into the development area
5. has the ability to meet food and other relevant supply chain standards
6. meets the relevant standards for associated features (e.g. location of ponds, use of aquaculture furniture)
7. manages any proposed disturbance or adverse impact to fisheries resources
8. manages any displacement of commercial, recreational or indigenous fishing access
9. monitors performance and operational procedures where required
10. rehabilitates the development area if the aquaculture use is abandoned or ends.

Note: Guidance on addressing code requirements is available in the State Development Assessment Provisions Guidance Material: State code 17: Aquaculture, Department of Agriculture and Fisheries, 2019.

17.2 Performance outcomes and acceptable outcomes

Development that is a material change of use for aquaculture should demonstrate compliance with the relevant provisions of table 17.2.2. For further details of the specific performance outcomes to be addressed, please refer to table 17.2.1.

</table>
| Aquaculture development is designed and constructed to prevent impacts on *waterways* and wetlands by:
1. being located away from important natural features such as *waterways* and wetlands:
   a. for tidal habitats:
      i. 100 metres from highest astronomical tide outside an urban area; or
      ii. 50 metres from highest astronomical tide within an urban area
   b. for non-tidal habitats:
      i. 50 metres from bankfull width outside an urban area; and
      ii. 25 metres from bankfull width within an urban area
2. constructing all *ponds* above the highest astronomical tide
3. measures ensuring that all waters (e.g. *ponds*, *tanks*, *containers* and aquaria) on the premises are screened to prevent the escape of any *aquaculture fisheries resources* (eggs, juveniles or adults) into Queensland waters
4. for *land*-based freshwater aquaculture, not allowing *discharge* from *ponds* and *tanks* to enter Queensland waters. |

Note: The exception for point 4 is constructed storage dams located above Q100 limits and used for the purposes of water storage and reuse only.
Performance outcomes | Acceptable outcomes
--- | ---
| AND | AO11.2 The design of the aquaculture facility provides control at all times over the containment and release of water from all ponds, tanks and drainage systems within the approved aquaculture area.

PO12 Ponds, tanks, containers, aquaria and drainage systems are designed, constructed and operated to ensure immunity from flooding and inundation. | AO12.1 The development is not located on flood prone land.

AND

AO12.2 Ponds, tanks, containers and aquaria used to cultivate aquaculture fisheries resources are constructed with the lowest point of the top of wall at least the height of the Q100 flood level, or no lower than the highest known or recorded flood level if Q100 is unavailable.

AND

AO12.3 Ponds, tanks, containers and aquaria solely for treatment and settlement (free of aquaculture fisheries resources) are constructed so that the lowest point on the top of wall is at least the height of the Q50 flood level.

AND

AO12.4 All in-ground structures, including any structure or impoundment used for the collection or treatment of wastewater, are constructed to prevent the ingress of stormwater run-off; for example by constructing a bund or levee wall around the structure or impoundment.

PO13 All juvenile or adult wild fauna (excluding zooplankton) are excluded from land-based aquaculture development through:

1. the design, construction, and operation preventing entry of fauna; and
2. the screening of water introduced into the aquaculture development.

No acceptable outcome is prescribed.

PO14 Aquaculture development that hold fish capable of overland escape are designed to prevent overland escape. | AO14.1 The aquaculture development is secured to prevent the overland escape of aquaculture product by maintaining a perimeter barrier that is impervious to all size classes of the aquaculture fisheries resources.

PO15 Bioremediation practices for the purpose of aquaculture are designed, constructed, and operated to minimise impacts on fisheries resources.

No acceptable outcome is prescribed.

Tidal aquaculture developments

PO16 Aquaculture furniture or other structures on tidal land are designed and maintained to prevent

No acceptable outcome is prescribed.

Accepted Development
17.4 Glossary of terms

**Aquaculture** see the schedule of the *Fisheries Act 1994.*
Note: *Aquaculture* means the cultivation of live *fisheries resources* for sale other than in circumstances prescribed under a regulation.

**Aquaculture fisheries resources** see the schedule of the *Fisheries Act 1994.*
Note: *Aquaculture fisheries resources* means live *fish* and other marine plants cultivated in *aquaculture*.

**Aquaculture furniture** see the schedule of the *Fisheries Act 1994.*
Note: *Aquaculture furniture* means a cage, rack, *tank*, tray or anything else used, or capable of being used, in *aquaculture* or to assist in *aquaculture*.

**AQUAVETPLAN** means the Australian Aquatic Veterinary Emergency Plan.
Note: *AQUAVETPLAN* is a series of manuals that outline Australia’s approach to national *disease* preparedness and propose the technical response and control strategies to be activated in a national aquatic animal *disease* emergency. The manuals also provide guidance based on sound analysis, linking policy, strategies, implementation, coordination and emergency management plans.

**Bioremediation** means the branch of biotechnology that uses biological processes to overcome environmental problems.
Note: For example, the culture of *fisheries resources* for the purpose of improving the quality of *discharge* water from treatment and settlement *ponds*.

**Biosecurity** means protection from the risks posed by organisms to the economy, environment and people’s health.

**Container** see the schedule of the *Fisheries Act 1994.*
Note: *Container* includes a basket, case and tray.

**Discharge** means the release of wastewater into natural *waterways*.

**Disease** see section 94 of the *Fisheries Act 1994.*
Note: *Disease* means:
1. a *disease*, parasite, pest, plant or other thing (the *disease*) that has, or may have, the effect (directly or indirectly) of killing or causing illness in *fisheries resources*, or in humans or animals that eat *fisheries resources* infected with or containing the *disease*; or
2. a chemical or antibiotic residue; or
3. a species of a *fish* or plant that may compete against *fisheries resources* or other *fisheries resources* to the detriment of the *fisheries resources* or other *fisheries resources*.

**Exotic fish** means *fish* originating from anywhere outside Queensland.

**Fish** see section 5 of the *Fisheries Act 1994.*
Note: *Fish*:
1. means an animal (whether living or dead) of a species that throughout its life cycle usually lives:
a. in water (whether freshwater or saltwater)
b. in or on foreshores; or
c. in or on **land** under water

2. includes:
   a. prawns, crayfish, rock lobsters, crabs and other crustaceans
   b. scallops, oysters, pearl oysters and other molluscs
   c. sponges, annelid worms, bêche-de-mer and other holothurians
d. trochus and green snails
e. however, does not include:
   f. crocodiles
g. protected animals under the Nature Conservation Act 1992
   h. pests under the Pest Management Act 2001; or
   i. animals prescribed under a regulation not to be **fish**

3. also includes:
   a. the spat, spawn and eggs of **fish**
   b. any part of **fish** or of spat, spawn or eggs of **fish**
   c. treated **fish**, including treated spat, spawn and eggs of **fish**
   d. coral, coral limestone, shell grit or star sand
e. freshwater or saltwater products declared under a regulation to be **fish**.

**Fisheries resources** see the schedule of the *Fisheries Act 1994*.

*Note:* **Fisheries resources** includes **fish** and **marine plants**.

**Fishing** see the schedule of the *Fisheries Act 1994*.

*Note:* **Fishing** includes:
1. searching for, or taking, **fish**
2. attempting to search for, or take, **fish**
3. engaging in other activities that can reasonably be expected to result in the locating, or taking, of **fish**
4. landing **fish** (from a boat or another way), bringing **fish** ashore or transshipping **fish**.

**Highest astronomical tide** means the highest level of the tides that can be predicted to occur under average meteorological conditions and under any combination of astronomical conditions.

**Land** see the schedule of the *Fisheries Act 1994*.

*Note:* **Land** includes foreshores and tidal and non-tidal **land**.

**Marine park** see the *Marine Parks Act 2004*.

*Note:* **Marine park** means a **marine park** declared, or taken to be declared, under the *Marine Parks Act 2004*.

**Marine plant** see section 8 of the *Fisheries Act 1994*.

*Note:* **Marine plant** means a **marine plant** declared, or taken to be declared, under the *Marine Parks Act 2004*.

A **marine plant** does not include a plant that is a declared pest under the *Land Protection (Pest and Stock Route Management) Act 2002*.

**Pond** means an earthen in-ground **container**.

**Prescribed aquaculture** means aquaculture for which a resource allocation authority has been obtained.

**Resource allocation authority** see the schedule of the *Fisheries Act 1994*.

*Note:* **Resource allocation authority** means a **resource allocation authority** issued, and in force, under part 5, division 3, subdivision 2A of the *Fisheries Act 1994*.

**Tank** means an above-ground **container** used for intensive **aquaculture** within an enclosed facility.

**Tidal land** see the schedule of the *Fisheries Act 1994*.

*Note:* **Tidal land** includes reefs, shoals and other **land** permanently or periodically submerged by waters subject to tidal influence.

**Translocation** means the movement of live aquatic organisms (including all stages of the organism’s life cycle and any derived viable genetic material):
1. beyond its accepted distribution; or
2. to areas which contain genetically distinct populations; or
3. to areas with superior parasite or disease status.

**Waterway** see the schedule of the *Fisheries Act 1994*.

*Note: Waterway includes a river, creek, stream, watercourse or inlet of the sea.*
State code 18: Constructing or raising waterway barrier works in fish habitats

18.1 Purpose statement

The purpose of the code is to ensure that development involving the constructing or raising of waterway barrier works in a fish habitat:

1. maintains fish movement and connectivity throughout waterways and within and between fish habitats
2. maintains the health and productivity of fisheries resources and fish habitat
3. maintains the community and fishing sectors’ use of the area and access to fisheries resources
4. only occurs only where there is a need for the development and no other reasonable alternative exists
5. provides adequate fish passage including a fish way, if necessary
6. avoids impacts on marine plants, waterways that provide for fish passage and declared fish habitat areas that are matters of state environmental significance, and where avoidance is not reasonably possible, minimises and mitigates impacts, and provides an offset for significant residual impacts where appropriate.

Note: For guidance on how to determine whether this code applies to development, see fact sheets:
1. Maintaining Fish Passage in Queensland: What is a waterway, Department of Agriculture, Fisheries and Forestry, 2014
2. Maintaining Fish Passage in Queensland: What is a waterway barrier work, Department of Agriculture, Fisheries and Forestry, 2014
3. Maintaining Fish Passage in Queensland: What is not a waterway barrier work, Department of Agriculture, Fisheries and Forestry, 2014.

18.2 Performance outcomes and acceptable outcomes

Development that is operational work for constructing or raising waterway barrier works in fish habitats should demonstrate compliance with the relevant provisions of table 18.2.2. For further details of the specific performance outcomes to be addressed, please refer to table 18.2.1.

</table>
| **AO4.15** The base of the culvert incorporates a low flow channel consistent with the natural low flow channel and:  
1. is buried a minimum of 300 millimetres to allow bed material to deposit and reform the natural bed on top of the culvert base; or  
2. the base of the culvert is the stream bed; or  
3. the base of the culvert cell and any instream scour protection is roughened throughout to approximately simulate natural bed conditions. | **AO4.16** The outermost culvert cells incorporate roughening elements such as baffles on their bankside sidewalls.  
AND  
**AO4.17** Roughening elements are installed on the upstream wingwalls on both banks to the height of the upstream obvert or the full height of the wingwall.  
AND  
**AO4.18** Roughening elements provide a contiguous lower velocity zone (no greater than 0.3 metres/second) for at least 100 millimetres width from the wall through the length of the culvert and wingwalls.  
AND  
**AO4.19** Culvert alignment to the stream flow minimises water turbulence.  
AND  
**AO4.20** There is sufficient light at the entrance to and through the culvert so that fish are not discouraged by a sudden darkness.  
AND  
**AO4.21** The depth of cover above the culvert is as low as structurally possible, except where culverts have an average recurrence interval (ARI) greater than 50 years.  
AND  
**AO4.22** For culvert crossings designed with a flood immunity ARI greater than 50 years, fish passage is provided up to culvert capacity. |
### Performance outcomes

<table>
<thead>
<tr>
<th><strong>PO5 Waterway barrier works</strong></th>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Are designed, constructed, operated and maintained to provide lateral and longitudinal fish passage for all members of the fish community, regardless of size, species, life-stage or swimming ability, and accommodating future and seasonal increases in fish biomass.</td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

Note: In order to demonstrate compliance with this performance outcome, the seasonal and flow related biomass of the fish community at the location of the proposed waterway barrier works will need to be surveyed and addressed in the design of the fish way by a person suitably qualified and experienced in fish passage biology. In addition, any future increases in fish biomass should be quantified and catered for.

Lateral fish passage refers to the movement into both permanent and temporary off-stream systems, including wetlands, lagoons, floodplain etc. Fragmentation of connectivity into and out of these systems must be mitigated via adequate fish passage.

### PO6 Development is designed and operated so that all components of waterway barrier works (for example scour protection, intake and outlet structures, spillway, stilling basin, apron and dissipation structures) and all pathways of potential fish movement provide safe fish passage.

Stepped spillways (including sheet pile weirs) are not acceptable.

Note: Stepped spillway (including sheet pile weirs) have been associated with high mortalities and injuries to fish.

Assessment of this performance outcome will include consideration of adequate tailwater depth at the toe of the spillway (for example: stilling basin) at commencement to spill (for example: 30 percent of the head difference).

### PO7 The drownout characteristics of the waterway barrier works and the frequency, timing and duration of drownout conditions will provide adequate fish passage for the fish community and biomass moving past the barrier.

Note: Determining adequacy of fish passage will involve consideration of passage achieved during drownout and during other hydraulic conditions and the relative frequencies of these conditions among other things.

### PO8 Development does not increase the risk of mortality, disease or injury, or compromise the health, productivity, marketability or suitability for human consumption of fisheries resources, having regard to (but not limited to):

1. Biotic and abiotic conditions, such as water and sediment quality
2. Substances that are toxic to plants or toxic to or cumulative within fish
3. Design of structures
4. Impacts on reproductive success
5. Effect on fish energy reserves

No acceptable outcome is prescribed.

</tbody>
</table>

**PO15** The natural substrate of the waterway bed is retained or reconstructed so that the post-construction substrate is comparable to the natural substrate; for example in terms of size and consistency.  
No acceptable outcome is prescribed.

**PO16** Development does not adversely impact on community access to tidal land and waterways.  
No acceptable outcome is prescribed.

**PO17** Development does not adversely impact on community access to fisheries resources and fish habitats including recreational and indigenous fishing access.  
No acceptable outcome is prescribed.

Note: In some cases, compensation for impact on fisheries access, operations and/or productivity may be necessary. The Guideline on fisheries adjustment provides advice for proponents on relevant fisheries adjustment processes and is available by request from the Department of Agriculture and Fisheries.

**PO18** Development does not adversely impact on commercial fishing access and linkages between a commercial fishery and infrastructure, services and facilities.  
No acceptable outcome is prescribed.

Note: In some cases, compensation for impact on fisheries access, operations and/or productivity may be necessary. The Guideline on fisheries adjustment provides advice for proponents on relevant fisheries adjustment processes and is available by request from the Department of Agriculture and Fisheries.

### Development involving fish ways

**PO19** Having regard to the hydrology of the site and fish movement characteristics, the fish way is capable of operating, and will operate:

1. for as long as the waterway barrier work is in position; and
2. whenever there are inflows into the impoundment or waterway, release out of the impoundment and during overtopping events; and
3. when the impoundment is above dead storage level.

AO19.1 For the life of the waterway barrier works, the lower operational range of the fish way is at least:

1. 0.5 metres below minimum headwater drawdown level; and
2. 0.5 metres below minimum tail water level at the site.

**PO20** For the life of the waterway barrier works, the hydrology of the development allows for adequate fish movement.

AO20.1 The lower operational range of the fish way is at least:

1. 0.5 metres below minimum headwater drawdown level; and
2. 0.5 metres below minimum tail water level at the site.

**PO21** Fish way maximises fish movement by providing:

1. continuous attraction flows at the fish way entrance under all flow conditions within the fish way’s operating range
2. additional means of fish attraction are included in the fish way design if appropriate

No acceptable outcome is prescribed.
<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>3. attraction flow velocities are sufficient and variable to attract the whole fish community, and expected future and seasonal biomass</td>
<td></td>
</tr>
<tr>
<td>4. adequate holding chamber capacity for the expected fish biomass in any lock, lift, trap and transfer type fish ways</td>
<td></td>
</tr>
<tr>
<td>5. adequate exit conditions for downstream fish passage; and</td>
<td></td>
</tr>
<tr>
<td>6. for future adjustments in capacity or operation that may be needed once in place.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>No acceptable outcome is prescribed.</td>
</tr>
</tbody>
</table>

**PO22 Fish ways** are designed so that:

1. water intakes, outlets, screens and other structures do not cause entrainment, injury or mortality to fish
2. appropriate light levels are maintained at entrances, exits and throughout the fish way to ensure successful use by fish
3. fish attracted to the spillway or outlet flows are able to access the fish way without having to swim back downstream
4. fish are able to exit upstream and downstream fish ways at a water levels over the full range of tailwater and headwater levels
5. exits are located to avoid fish being washed back over the spillway during overtopping
6. adequate hydraulic conditions and minimum water depth for fish passage is maintained throughout the fish way
7. predation on fish using the fish way is avoided
8. rubbish and debris do not impede fish passage or cause blockages or damage the fish way
9. delays in fish movement are avoided when fish are undertaking upstream spawning migrations; and
10. delays in fish movement are avoided immediately after times when there have been flows in the system but no fish passage in the rising hydrograph.

**PO23** All water releases are directed through the fish way as a priority over the outlet works.

**PO24** All flows and releases initiate and terminate adjacent to the fish way or are directed parallel to the fish way entrance and all flows are transferred to the fish way as soon as possible during a flow recession.

Note: Flows and releases include but are not limited to spillway overtopping and outlet flows. Such flows must not compete with fish way attraction flows or reduce the operation of a fish way.

**PO25** Mechanisms are in place to ensure that operational issues in fish ways are promptly rectified for the life of the fish way including but not limited to:

1. all components are designed to be durable, reliable and adequately protected from damage during high flow and flood events

No acceptable outcome is prescribed.
### Performance outcomes

2. all components can be replaced; and  
3. a contingency plan ensures provision of alternate adequate fish passage during the fish way re-instatement process.

**Note:** Fish way downtime greater than 14 consecutive calendar days is likely to have a significant impact to fisheries resources.

### Acceptable outcomes

<table>
<thead>
<tr>
<th>PO26 Development provides for:</th>
<th>No acceptable outcome is prescribed.</th>
</tr>
</thead>
</table>
| 1. installation of monitoring equipment (such as traps and lifting equipment); and  
2. access for monitoring, maintenance and operational purposes. |

**PO27 Water supply for the fish ways and attraction flows are sourced from surface quality water or equivalent water quality.**

**PO28 Tailwater control structures such as a gauging weir, rock bar or stream crossings are fitted with a fish way or designed to provide fish passage.**

No acceptable outcome is prescribed.

### Development involving floodgates

**PO29 Floodgates are designed and operated:**

1. to provide hydraulic conditions adequate for fish passage over an adequate duration of the tidal cycle; and  
2. as tidally activated, automatic floodgates.

No acceptable outcome is prescribed.

**PO30 The invert of the floodgate is at bed level.**

No acceptable outcome is prescribed.

**PO31 The operation of the floodgate will not result in adverse impacts on water quality that may harm fish or fish habitat.**

No acceptable outcome is prescribed.

### Temporary waterway barrier works

**PO32 The temporary waterway barrier works will exist only for a specified temporary period and provide for adequate fish movement.**

**AO32.1 The temporary waterway barrier work:**

1. is a partial barrier, or  
2. does not constrict the area or flows of a low flow channel.

AND one of the following acceptable outcomes apply

**AO32.2 The temporary structure is only in place outside of known fish spawning or migration periods.**

**OR**

**AO32.3 The barrier is opened periodically every five days for at least 48 hours to allow fish movement and water exchange.**

**OR**

**AO32.4 Fish movement is provided for via a stream diversion.**

**PO33** Temporary barriers are removed at the end of their design life, so that full movement for fish is reinstated and the bed and banks are returned to their original profile and stability.

No acceptable outcome is prescribed.

**Matters of state environmental significance**

| PO36 Development: 1. avoids impacts on matters of state environmental significance; or 2. minimises and mitigates impacts on matters of state environmental significance after demonstrating avoidance is not reasonably possible; and 3. provides an offset if, after demonstrating all reasonable avoidance, minimisation and mitigation measures are undertaken, the development results in an acceptable significant residual impact on a matter of state environmental significance. | No acceptable outcome is prescribed. |

Statutory note: For Brisbane core port land, an offset may only be applied to development on land identified as E1 Conservation/Buffer, E2 Open Space or Buffer/Investigation in the Brisbane Port LUP precinct plan.

Note: For the purpose of this code, the matters of state environmental significance assessed are marine plants, waterways that provide for fish passage and declared fish habitat areas.

Guidance for determining if the development will have a significant residual impact on the matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014. Where the significant residual impact is considered an acceptable impact on the matter of state environmental significance under the Environmental Offsets framework and an offset is considered appropriate, the offset should be delivered in accordance with the Environmental Offsets Act 2014.

18.4 Glossary of terms

Declared fish habitat area see the Fisheries Act 1994.
Note: Declared fish habitat area means an area that is declared under the Fisheries Act 1994 to be a fish habitat area. Section 120 of the Fisheries Act 1994 deals with declaration of fish habitat areas.

Disease see section 94 of the Fisheries Act 1994.
Note: Disease means:
1. a disease, parasite, pest, plant or other thing (the disease) that has, or may have, the effect (directly or indirectly) of killing or causing illness in fisheries resources, or in humans or animals that eat fisheries resources infected with or containing the disease
2. a chemical or antibiotic residue
3. a fish or plant species that may compete against fisheries resources or other fisheries resources to the detriment of the fisheries resources or other fisheries resources.

Drownout means when the tailwater and headwater levels across a weir are essentially equal, velocities are sufficiently low at, or close to, the edge of the spillway crest and the weir is fully submerged to a sufficient depth to allow for fish passage and for the species and size-classes of fish moving through the site to cross the weir.

Fish see section 5 of the Fisheries Act 1994.
Note: Fish:
1. means an animal (whether living or dead) of a species that throughout its life cycle usually lives:
   a. in water (whether freshwater or saltwater); or
   b. in or on foreshores; or
   c. in or on land under water
2. includes:
   a. prawns, crayfish, rock lobsters, crabs and other crustaceans
   b. scallops, oysters, pearl oysters and other molluscs
   c. sponges, armelid worms, beche-de-mer and other holothurians
   d. trochus and green snails
3. does not include:
   a. crocodiles; or
   b. protected animals under the Nature Conservation Act 1992; or
   c. pests under the Pest Management Act 2001; or
   d. animals prescribed under a regulation not to be fish
4. also includes:
   a. the spat, spawn and eggs of fish
   b. any part of fish or spat, spawn or eggs of fish
   c. treated fish, including treated spat, spawn and eggs of fish
   d. coral, coral limestone, shell grit or star sand, coral, coral limestone, shell grit or star sand
   e. freshwater or saltwater products declared under a regulation to be fish.

Fish habitat see the Fisheries Act 1994.
Note: Fish habitat includes land, waters and plants associated with the life cycle of fish, and includes land and waters not presently occupied by fisheries resources.

Fish way see the Fisheries Act 1994.
Note: Fish way means a fish ladder or another structure or device by which fish can pass through, by or over waterway barrier works.

Fisheries resources see the Fisheries Act 1994.
Note: Fisheries resources includes fish and marine plants.

Fishery see section 7 of the Fisheries Act 1994.
Note: Fishery means activity by way of fishing, for example, activities specified by reference to all or any of the following:
1. a species of fish
2. a type of fish by reference to sex, size or age or another characteristic
3. an area
4. a way of fishing
5. a type of boat
6. a class of person
7. the purpose of an activity
8. the effect of the activity on a fish habitat, whether or not the activity involves fishing
9. anything else prescribed under a regulation.

Fishing see the Fisheries Act 1994.
Note: Fishing includes:
1. searching for, or taking, fish
2. attempting to search for, or take, fish
3. engaging in other activities that can reasonably be expected to result in the locating, or taking, of fish
4. landing fish (from a boat or in another way), bringing fish ashore or transshipping fish.

Foreshore see the Fisheries Act 1994.
Note: Foreshore means parts of the banks, beds, reefs, shoals, shore and other land between high water and low water.

Legally secured offset area see the Environmental Offsets Act 2014.
Note: An area of land is a legally secured offset area if:
1. the area is:
   a. an environmental offset protection area; or
   b. an area declared as an area of high nature conservation value under section 19F of the Vegetation Management Act 1999; or
   c. another area prescribed under a regulation; and
2. under the Environmental Offsets Act 2014 or another Act, the area is subject to a delivery or management plan or agreement (however described in this Act or the other Act) to achieve a conservation outcome for a prescribed environmental matter.

Main channel means the active component of the flow channel of a waterway characterised by a distinct change in appearance or structure at the upper limit of the channel (refer to accepted development requirements for examples).

Marine plant see section 8 of the Fisheries Act 1994.
Note: Marine plant includes the following:
1. a plant (a tidal plant) that usually grows on, or adjacent to, tidal land, whether it is living, dead, standing or fallen
2. material of a tidal plant, or other plant material on tidal land
3. a plant, or material of a plant, prescribed under a regulation or management plan to be a marine plant.

A marine plant does not include a plant that is a declared pest under the Land Protection (Pest and Stock Route Management) Act 2002.

Matters of state environmental significance (MSES) see schedule 2 of the Environmental Offsets Regulation 2014.
Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:
1. regional ecosystems under the Vegetation Management Act 1999 that:
   a. are endangered regional ecosystems
   b. are of concern regional ecosystems
   c. intersect with a wetland shown on the vegetation management wetlands map
   d. contain areas of essential habitat shown on the essential habitat map for an animal that is endangered wildlife or vulnerable wildlife or a plant that is endangered wildlife or vulnerable wildlife
   e. are located within the defined distances stated in the Environmental Offsets Policy 2014 from the defining banks of a relevant watercourse or drainage feature as shown on the vegetation management watercourse and drainage feature map; or
   f. are areas of land determined to be required for ecosystem functioning (‘connectivity areas’)
2. wetlands in a wetland protection area or wetlands of high ecological significance shown on the map of referable wetlands under the Environmental Protection Regulation 2008
3. wetlands and watercourses in high ecological value waters as defined in schedule 2 of the Environmental Protection (Water) Policy 2009
4. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014
5. threatened wildlife under the Nature Conservation Act 1992 and special least concern animals under the Nature Conservation (Wildlife) Regulation 2006
6. protected areas under the Nature Conservation Act 1992 excluding coordinated conservation areas
7. highly protected zones of state marine parks under the Marine Parks Act 2004
8. declared fish habitat areas under the Fisheries Act 1994
9. waterways that provide for fish passage under the Fisheries Act 1994 if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway
10. marine plants under the Fisheries Act 1994; or
11. legally secured offset areas.

Offset means environmental offset under the Environmental Offsets Act 2014.
Note: Environmental offset means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a prescribed environmental matter, delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2014. The prescribed environmental matters assessed under the State Development Assessment Provisions are matters of state environmental significance.

Prescribed environmental matters see the Environmental Offsets Act 2014.
Note: A prescribed environmental matter is any species, ecosystem or other similar matter protected under Queensland legislation for which an offset may be provided. A prescribed environmental matter may be a matter of national, state or local environmental significance, however, assessment criteria in the State Development Assessment Provisions only relate to matters of state environmental significance. Each of the prescribed environmental matters are listed under the Environmental Offsets Regulation 2014.

Significant residual impact see the Environmental offsets Act 2014.
Note: Significant residual impact is an impact, whether direct or indirect, of a prescribed activity on all or part of a prescribed environmental matter that:
1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity
2. is, or will or is likely to be, significant.
Guidance for determining if a prescribed activity will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department State Development, Infrastructure and Planning, 2014.

Strategic environmental area see the Regional Planning Interests Act 2014.
Note: A strategic environmental area is an area that:
1. contains one or more environmental attributes for the area
2. is either:
   a. shown on a map in a regional plan as a strategic environmental area; or
   b. prescribed under a regulation.

Tidal land see the Fisheries Act 1994.
Note: Tidal land includes reefs, shoals and other land permanently or periodically submerged by waters subject to tidal influence.

Waterway see the Fisheries Act 1994.
Note: Waterway includes a river, creek, stream, watercourse or inlet of the sea. For further guidance see the fact sheet Maintaining Fish Passage in Queensland: What is a waterway? Department of Agriculture, Fisheries and Forestry, 2014.

Waterway barrier works see the Fisheries Act 1994.
Note: Waterway barrier works means a dam, weir, or other barrier across a waterway if the barrier limits fish stock access and movement along a waterway. For further guidance see the factsheets Maintaining Fish Passage in Queensland: What is a waterway barrier work?, Department of Agriculture, Fisheries and Forestry, 2014 and Maintaining Fish Passage in Queensland: What is not a waterway barrier work?, Department of Agriculture, Fisheries and Forestry, 2014.

18.5 Abbreviations

ARI – Average Recurrence Interval
State code 19: Category 3 levees

19.1 Purpose statement

The purpose of this code is to ensure the community's resilience to the impacts of flood events, levee failure, or levee overtopping is maintained or enhanced by the category 3 levee.

Note: Further information on category 3 levees and guidance on how to demonstrate compliance with the provisions of this code is provided in the current version of the guidance document called Guidelines for the construction or modification of category 2 and 3 levees.

19.2 Performance outcomes and acceptable outcomes

Development that is operational work for a category 3 levee should demonstrate compliance with the relevant provisions in table 19.2.1.

Table 19.2.1 Operational work for a category 3 levee

<table>
<thead>
<tr>
<th>Performance outcomes</th>
<th>Acceptable outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>PO1 People and properties impacted by the category 3 levee have been made aware of the benefits and impacts created by the development.</td>
<td>AO1.1 A vulnerability and tolerability assessment report is provided. AND AO1.2 A report identifying the benefits and impacts to people and property under pre and post category 3 levee conditions across a range of flood event scenarios is provided. Note: The range of flood event scenarios addressed in the report should include all the following: 1. 10, 20, 30, 40, 50 and 100 year average recurrence interval (ARI) design events 2. design flood event 3. an overtopping scenario that will result in the largest impact on people and properties as a result of the category 3 levee's construction.</td>
</tr>
<tr>
<td>PO2 Appropriate disaster management processes are in place to maintain or enhance the resilience of the community in the event of levee failure or overtopping.</td>
<td>AO2.1 A levee operations and maintenance manual is provided. Note: It is recommended that a Registered Professional Engineer of Queensland (RPEQ) prepare the operations and maintenance manual. AND AO2.2 The emergency action plan in the Local Government's Local Disaster Management Plan is updated to reflect changes as a result of the category 3 levee.</td>
</tr>

</table>
19.3 Reference documents

Department of Natural Resources, Mines and Energy 2018, Guidelines for the construction or modification of category 2 and 3 levees

19.4 Glossary of terms

Category 3 levee see the Water Regulation 2016.
Note: Category 3 levee means a levee that has off-property impacts and affects three or more impacted people.

Levee see schedule 4 of the Water Act 2000.
Note: Levee means an artificial embankment or structure which prevents or reduces the flow of overland flow water onto or from land. A levee includes levee-related infrastructure.

Resilience means the ability to adapt to changing conditions and prepare for, withstand and rapidly recover from disruption.

19.5 Abbreviations

RPEQ – Registered Professional Engineer of Queensland

ARI – Average Recurrence Interval
State code 20: Referable dams

20.1 Purpose statement

The purpose of this code is to reduce the risk to the community from the failure or other impacts of referable dams by ensuring appropriate safety standards are utilised in the design, construction, management and maintenance of dams.

Note: Further information regarding referable dams, and guidance on how to demonstrate compliance with the performance outcomes of this state code, is available in the Referable Dams Planning Guidance Material, Department of Energy and Water Supply, 2016.

20.2 Performance outcomes and acceptable outcomes

Development that is operational work for a referable dam should demonstrate compliance with the relevant provisions of table 20.2.1.

Table 20.2.1: Operational work

20.3 Reference documents

Department of Energy and Water Supply 2017, Guidance on referable dams planning

20.4 Glossary of terms

Referable dam means any dam which has been failure impact assessed under the Water Supply (Safety and Reliability) Act 2008, and which has been accepted by the chief executive administering the Water Supply (Safety and Reliability) Act 2008 as having either a category 1 or category 2 failure impact rating.

Note: Please refer to the Referable Dams Planning Guidance Material and/or the Water Supply (Safety and Reliability) Act 2008 for further information on when a dam is required to be failure impact assessed, and the process associated with failure impact assessment.
State code 21: Hazardous chemical facilities

21.1 Purpose statement

The purpose of this code is to ensure that, so far as is reasonably practicable:

1. any off-site physical or chemical hazards and risks associated with a hazardous chemical facility are identified and managed appropriately in order to protect human health and safety, proportionate to the sensitivity of the surrounding land uses and zones
2. the design and siting of a hazardous chemical facility provides adequate protection from the harmful effects of:
   a. an off-site hazard scenario at an existing hazardous chemical facility
   b. any natural hazards applicable for the location.

Note: Further information regarding hazardous chemical facilities, and guidance on how to demonstrate compliance with the performance outcomes of this state code, is available in the Planning guideline – State code 21: Hazardous chemical facilities, Queensland Treasury, 2017.

21.2 Performance outcomes and acceptable outcomes

Development that is a material change of use for a hazardous chemical facility should demonstrate compliance with the relevant provisions of table 21.2.1.

Table 21.2.1: Material change of use

<table>
<thead>
<tr>

**AND**

**AO1.4** Any off-site impact from a **hazard scenario** shall not exceed, at the boundary of any **open space land use** or zone:  
1. a **dangerous dose to human health**; or  
2. if the above criteria cannot be achieved:  
   a. an **individual fatality risk level** of $10 \times 10^6$/year  
   b. the societal risk criteria in figure 21.3.1.  

**AND**

**AO1.5** Any off-site impact from a **hazard scenario** shall not exceed, at the boundary of any **industrial land use** or zone:  
1. a **dangerous dose to the built environment**; or  
2. an **individual fatality risk level** of $50 \times 10^6$/year.

**PO2** The location and siting of a **hazardous chemical facility** considers and responds to any off-site effects from a **hazard scenario** at any existing **hazardous chemical facility** in the vicinity.  

No acceptable outcome is prescribed.

**PO3** Storage and handling areas for **fire risk hazardous chemicals** are provided with control measures to identify a fire situation and trigger an emergency response.

**AO3.1** Storage and handling areas for **fire risk hazardous chemicals** are provided with a 24 hour monitored fire detection system that has the ability to detect a fire in its early stages and notify an **emergency responder** at all times.

**PO4** Storage and handling areas for liquid or solid **fire risk hazardous chemicals** are provided with a spill containment system which:  
1. has a working volume capable of containing any reasonably foreseeable spill or leak within the boundaries of the development, including any resultant effluent generated in response to an emergency  
2. ensures that any **prescribed hazardous chemicals** that, if in contact with each other, may react to produce a fire, explosion or other harmful reaction, or a flammable, toxic or corrosive vapour, are not brought together.

**AO4.1** Storage and handling areas for packages of liquid or solid **fire risk hazardous chemicals** are provided with a spill containment system with a working volume capable of containing a minimum of 100 percent of all packages (**prescribed hazardous chemicals** and/or non-hazardous chemicals) within the area plus the output of any **fixed firefighting system** provided for the area over a minimum of 90 minutes.  

**AND**

**AO4.2** Storage and handling areas for liquid or solid **fire risk hazardous chemicals** in **tanks** are provided with a spill containment system with a working volume capable of containing a minimum of percent of the largest **tank** within a spill compound or 25 percent of the aggregate where multiple **tanks** are located within a spill compound, whichever is the greater.
Performance outcomes | Acceptable outcomes
--- | ---
1. the output of any fixed firefighting system provided for any bulk tank within a spill compound over a minimum of 90 minutes. AND AO4.3 The hazardous chemical facility does not store or handle any prescribed hazardous chemicals that, if in contact with each other, may react to produce a fire, explosion or other harmful reaction, or a flammable, toxic or corrosive vapour.

**PO5** The hazardous chemical facility is located and/or designed to minimise any adverse consequence of:
1. flood
2. bushfire
3. erosion or storm tide inundation
4. landslide
   on a storage and handling area.

| AO5.1 Storage and handling areas are located outside of:
| 1. a flood hazard area
| 2. a bushfire prone area
| 3. an erosion prone area or storm tide inundation area
| 4. a landslide hazard area.

**PO6** The hazardous chemical facility is located and/or designed to minimise any adverse consequence of a natural hazard such as an earthquake or wind action on a storage and handling area.

No acceptable outcome is prescribed.

### 21.3 Figures

**Figure 21.3.1: Societal risk criteria**

![Societal risk criteria diagram](image)

### 21.4 Reference documents

National Transport Commission, *Australian code for the transport of dangerous goods by road and rail*
21.5 Glossary of terms

**AEGL** means Acute Exposure Guidelines Level which identifies threshold exposure limits for the general public and are applicable to emergency exposure periods ranging from 10 minutes to eight hours as published by the United States Environmental Protection Agency.

**AEGL-2** means the airborne concentration (expressed as ppm or mg/m³) of a substance above which it is predicted the general population, including susceptible individuals, could experience irreversible or other serious, long-lasting adverse health effects or an impaired ability to escape.

**Bushfire prone area** see glossary in the State Planning Policy.

Note: **Bushfire prone area** means an area that is:
1. shown on the State Planning Policy interactive mapping system as a bushfire prone area; or
2. identified by a local government in its planning scheme as a bushfire prone area, based on a localised bushfire study, prepared by a suitably qualified person.

**Commercial or community activity land use** means any of the following as defined in the Planning Regulation 2017:
1. shopping centre
2. shop
3. office
4. major sport, recreation and entertainment facility
5. market
6. showroom
7. tourist attraction
8. entertainment facility
9. place of worship
10. community use
11. theatre

**Dangerous dose to human health** means:
1. for fire or explosion – an effect that equals or exceeds the following:
   a. 4.7 kilowatts per square metre for heat radiation; or
   b. 7 kilopascals for explosion overpressure
2. for toxic or corrosive gases – an effect that equals or exceeds the following:
   a. AEGL-2 (60 minutes); or
   b. where a corresponding AEGL is not available – ERPG-2; or
   c. where a corresponding ERGP-2 is not available – a concentration that is likely to produce the following effects:
      i. severe distress to almost all people; or
      ii. a substantial proportion of people require medical attention; or
      iii. some people are seriously injured, requiring prolonged treatment; or
      iv. highly susceptible people might be fatally injured.

**Dangerous dose to the built environment** means an effect from fire or explosion that equals or exceeds the following:
1. 12.6 kilowatts per square metre for heat radiation; or
2. 14 kilopascals for explosion overpressure.

**Emergency responder** means a person capable of assessing the severity of an emergency situation and providing a response or requesting assistance.

Note: An emergency responder includes a person employed by or on behalf of a hazardous chemical facility or Queensland Fire and Emergency Services.
**Erosion prone area** means an area declared to be an erosion prone area under section 70(1) of the *Coastal Protection and Management Act 1995*.

Note: Erosion prone areas are identified in accordance with the methodology set out in the Coastal hazard technical guide, Department of Environment and Heritage Protection, 2013 and use the following factors to account for the projected impacts of climate change by the year 2100:

1. a sea level rise factor of 0.8 metres
2. an increase in the maximum cyclone intensity by 10 percent.

**ERPG** means the Emergency Response Planning Guidelines developed by the American Industrial Hygiene Association and includes **ERPG-2**.

**ERPG-2** means the maximum airborne concentration below which it is believed that nearly all individuals could be exposed for up to one hour without experiencing or developing irreversible or other serious health effects or symptoms which could impair an individual’s ability to take protective action.

**Fire risk hazardous chemical** see schedule 19 of the Work Health and Safety Regulation 2011.

Note: Fire risk hazardous chemical means a prescribed hazardous chemical that:

1. is any of the following:
   a. a flammable gas
   b. a flammable liquid (hazard category 1 to 3)
   c. a flammable solid
   d. a substance liable to spontaneous combustion
   e. a substance which, in contact with water, emits flammable gases
   f. an oxidizing substance
   g. an organic peroxide
2. burns readily or supports combustion.

**Fixed firefighting system** means any water-supplying engineering control such as a drencher system, sprinkler system, foam making system, cooling ring, fire hydrant, hydrant monitor or hose reel that has been installed for a prescribed hazardous chemical storage and handling area for the purposes of mitigating fire hazards associated with that area. It does not include any fixed or portable firefighting system located outside the boundaries of the development.

**Flood hazard area** see glossary in the State Planning Policy 2017.

Note: Flood hazard area means an area that is:

1. shown on the State Planning Policy interactive mapping system as a flood hazard area; or
2. identified by a local government in its planning scheme as a flood hazard area, based on a localised flood study that is prepared by a suitably qualified person using the revised climate change factor for increased rainfall intensity in the Australian Rainfall and Runoff projections.

**Hazard scenario** means a reasonably foreseeable scenario involving prescribed hazardous chemicals resulting in an uncontrolled fire or explosion, or release of corrosive or toxic vapours, dusts or gases from the development.

**Hazardous chemical facility** see the Planning Regulation 2017.

Note: Hazardous chemical facility means the use of premises for a facility at which a prescribed hazardous chemical is present or likely to be present in a quantity that exceeds 10 percent of the chemical’s threshold quantity under schedule 15 of the Work Health and Safety Regulation 2011.

**Individual fatality risk level** means the risk of death to a person at a particular point.

**Industrial activity** see the Planning Regulation 2017.

Note: Industrial land use means any of the following:

1. a warehouse
2. a low impact industry
3. a medium impact industry
4. a high impact industry
5. a special industry
6. an extractive industry
7. a marine industry
8. a research and technology industry
9. a service industry
Landslide hazard area see glossary in the State Planning Policy.

Note: Landslide hazard area means an area that is:
1. identified by a local government in its planning scheme as a landslide hazard area, based on a localised landslide study prepared by a suitably qualified person; or
2. if the local government has not identified landslide hazard areas in its planning scheme in accordance with point 1 above - land with a slope greater than or equal to 15 percent.

Natural hazard see glossary in the State Planning Policy.

Note: Natural hazard means a naturally occurring situation or condition, such as a flood, bushfire, landslide, coastal erosion or storm-tide inundation, with the potential for loss or harm to the community, property or environment.

Open space land use means any of the following as defined in the Planning Regulation 2017:
1. outdoor sport and recreation (not including sporting stadiums)
2. park
3. environment facility
4. rural industry.

Package means a transportable container designed to contain a prescribed hazardous chemical that has a water capacity:
1. not exceeding 500 litres; or
2. exceeding 500 litres and is an intermediate bulk container (IBC) as defined by the ADG Code.

Placard quantity means a placard quantity for a prescribed hazardous chemical or group of prescribed hazardous chemicals as per schedule 11 of the Work Health and Safety Regulation 2011.

Prescribed hazardous chemical means any of the following:
1. a chemical listed in schedule 11 of the Work Health Safety Regulation 2011; or
2. a chemical classified as explosives under the ADG Code or GHS; or
3. a chemical classified as hazardous to the aquatic environment under the ADG Code or GHS.

Reasonably practicable see section 18 of the Work Health and Safety Act 2011.

Note: Reasonably practicable, in relation to a duty to ensure health and safety, means that which is, or was at a particular time, reasonably able to be done in relation to ensuring health and safety, taking into account and weighing up all relevant matters including:
1. the likelihood of the hazard or the risk concerned occurring
2. the degree of harm that might result from the hazard or the risk
3. what the person concerned knows, or ought reasonably to know, about:
   a. the hazard or the risk
   b. ways of eliminating or minimising the risk
4. the availability and suitability of ways to eliminate or minimise the risk
5. after assessing the extent of the risk and the available ways of eliminating or minimising the risk, the cost associated with available ways of eliminating or minimising the risk, including whether the cost is grossly disproportionate to the risk.

Sensitive land use means any of the following as defined in the Planning Regulation 2017:
1. community residence
2. dual occupancy
3. dwelling house
4. educational establishment
5. multiple dwelling
6. relocatable home park
7. residential care facility
8. rooming accommodation
9. short-term accommodation
10. tourist park.
Storage and/or handling means storing, processing, generating, using, transferring or unloading activities, but does not include transporting prescribed hazardous chemicals by road, rail, sea or air if the transport is regulated under the:
1. Explosive Act 1999; or
2. Transport Operations (Marine Safety) Act 1994; or
3. Transport Operations (Road Use Management) Act 1995; or

Storage and handling area means any area designed for the storage and/or handling of a particular prescribed hazardous chemical or group of prescribed hazardous chemicals in a quantity that exceeds a placard quantity and includes any separation distances, barriers and spill containment systems required to adequately isolate the area.

Note: Multiple storage and handling areas located within a development’s boundaries may be considered individual storage and handling areas where, after taking account of the chemical(s) within the area, each area is adequately isolated and provided with a self-contained spill compound. For example, where a storage and handling area for flammable liquids in packages and a storage and handling area for corrosive substances in tanks are located within the same facility, each area may be considered a separate storage and handling area provided it is appropriately isolated from the other and provided with a self-contained spill compound. However, if an area contained packages and/or tanks of flammable liquids, toxic liquids and corrosive solids all within the same spill compound; such an area is to be considered a single storage and handling area.

Storm tide inundation area see glossary in the State Planning Policy.
Note: Storm tide inundation area means the area of land determined to be inundated during a defined storm tide event that is:
1. identified by a local government in its planning scheme as a storm tide inundation area, on the basis of a localised study prepared by a suitably qualified person; or
2. if the local government has not identified storm tide inundation areas in its planning scheme in accordance with paragraph 1 above; identified on the SPP interactive mapping system as a storm tide inundation area.

Tank means any container (e.g. tank, vessel or drum) designed to contain a prescribed hazardous chemical that has a water capacity exceeding 500 litres, however, does not include an intermediate bulk container (IBC) as defined by the ADG Code.

Vulnerable land use means any of the following as defined in the Planning Regulation 2017:
1. childcare centre
2. community care centre
3. educational establishment
4. health care service
5. hospital
6. retirement facility.

Wind action means the influences of site wind speeds, design wind speeds, design wind pressures and distributed forces as described in the Australian and New Zealand Standard AS/NZS1170.2: Structural design actions: Part 2, Wind actions.

21.6 Abbreviations

ADG Code – Australian code for the transport of dangerous goods by road and rail as published by the National Transport Commission

AEGL – Acute Exposure Guidelines Level

ERPG – Emergency Response Planning Guidelines

GHS – Globally Harmonised Classification System as referenced in the Work Health and Safety Regulation 2011
State code 22: Environmentally relevant activities

22.1 Purpose statement

The purpose of the code is to ensure that environmentaly relevant activities (ERAs):
1. are located and designed to avoid or mitigate environmental harm on environmental values of the natural environment, adjacent sensitive land uses and sensitive receptors
2. avoid impacts on matters of state environmental significance, and where avoidance is not reasonably possible, minimise and mitigate impacts, and provide an offset for significant residual impacts where appropriate.

Note: Guidance on achieving compliance with the performance outcomes in the code, as well as on the broader assessment process for ERAs, is provided in the Guideline – SDAP State Code 22: ERAs, Department of Environment and Heritage Protection, 2017. Guidance for determining if the ERA will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.

22.2 Performance outcomes and acceptable outcomes

Development that is a material change of use for an ERA should demonstrate compliance with the relevant provisions of table 22.2.2. For further details of the specific performance outcomes to be addressed, please refer to table 22.2.1.

</table>

### Acceptable outcomes

| AO4.1 | Development meets the management intent, water quality guidelines and objectives of the Environmental Protection (Water) Policy 2009. |
| No acceptable outcome is prescribed. |
| No acceptable outcome is prescribed. |
| No acceptable outcome is prescribed. |

### All development – matters of state environmental significance

| Category C areas and category R areas of vegetation |
| PO8 | Development: 1. avoids impacts on category C areas of vegetation and category R areas of vegetation; or 2. minimises and mitigates impacts on category C areas and category R areas of vegetation after demonstrating avoidance is not reasonably possible. |

Statutory note: For Brisbane core port land, an offset may only be applied to development on land identified as E1 Conservation/Buffer, E2 Open Space or Buffer/Investigation in the Brisbane Port LUP precinct plan.

Note: Guidance for determining if the development will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014. Where the significant residual impact is considered an acceptable impact on the matter of state environmental significance and an offset is considered appropriate, the offset should be delivered in accordance with the Environmental Offsets Act 2014.

Intensive animal industry – poultry farming (ERA 4(2))
### Performance outcomes

**PO9 Poultry farming** development (where farming more than 200,000 birds) is suitably located and designed to avoid or mitigate environmental harm on adjacent sensitive land uses caused by odour.

### Acceptable outcomes

**AO9.1** For poultry farming involving 300,000 birds or less, development meets the separation distances as determined using the S-factor methodology to:
1. a sensitive land use in a rural zone; and
2. boundary of a non-rural zone.

OR

**AO9.2** Development meets the separation distances as determined by odour modelling using the following criteria:
1. 2.5 odour units, 99.5 percent, 1 hour average for a sensitive land use in a rural zone; or
2. 1.0 odour units, 99.5 percent, 1 hour average for the boundary of a non-rural zone.

Statutory note: Guidance for determining if the development will cause environmental harm caused by odour is provided in the Development of Meat Chicken Farms in Queensland, Department of Agriculture and Fisheries, 2016 and the Guideline – Odour Impact Assessment from Developments, Department of Environment and Heritage Protection, 2013.

---

## 22.4 Glossary of terms

**Category C areas** means areas of high value regrowth vegetation classed as ‘endangered’ or ‘of concern’ under the **Vegetation Management Act 1999** that are shown on the regulated vegetation management map as category C areas.

**Category R areas** means regrowth watercourse and drainage feature areas under the **Vegetation Management Act 1999** that are shown on the regulated vegetation management map as category R areas.

**Environment** includes:
1. ecosystems and their constituent parts, including people and communities
2. all natural and physical resources
3. the qualities and characteristics of locations, places and areas, however large or small, that contribute to their biological diversity and integrity, intrinsic or attributed scientific value or interest, amenity, harmony and sense of community
4. the social, economic, aesthetic and cultural conditions that affect, or are affected by, things mentioned in paragraphs 1 to 3.

**Environmental harm** see the *Environmental Protection Act 1994.*

Note: Environmental harm is defined as any adverse effect, or potential adverse effect (whether temporary or permanent and of whatever magnitude, duration or frequency) on an environmental value, and includes environmental nuisance.

**Environmentally hazardous material** means hazardous contaminants as well as any bulk material which can detrimentally impact on the environmental values if released into the environment.

Note: Common examples of environmentally hazardous materials are compost and mulch, tailings and effluent from intensive animal industries.

**Environmentally relevant activity (ERA)** means a concurrence ERA listed in schedule 2 of the Environmental Protection Regulation 2008 with a capital ‘C’ in column 3 (excluding mobile or temporary ERAs and ERAs devolved to local authorities by section 101 of the Environmental Protection Regulation 2008).

**Environmental value** see the *Environment Protection Act 1994.*

Note: Environmental values are:
1. a quality or physical characteristic of the environment that is conducive to ecological health or public amenity or safety; or
2. another quality of the environment identified and declared to be an environmental value under an environmental protection policy or regulation. Relevant environmental protection policies (EPP) are EPP (Noise), EPP (Air) and EPP (Water).

**Hazardous contaminant** see the *Environmental Protection Act 1994.*

Note: Hazardous contaminant means a contaminant, other than an item of explosive ordnance that, if improperly treated, stored, disposed of or otherwise managed, is likely to cause serious or material environmental harm because of:
1. its quantity, concentration, acute or chronic toxic effects, carcinogenicity, teratogenicity, mutagenicity, corrosiveness, explosiveness, radioactivity or flammability; or
2. its physical, chemical or infectious characteristics.

**Intensive animal industry** see schedule 24 of the Planning Regulation 2017.

Note: Intensive animal industry means:
1. the use of premises for:
   a. the intensive production of animals or animal products, in an enclosure, that requires food and water to be provided mechanically or by hand; or
   b. storing and packing feed and produce, if the use is ancillary to the use in subparagraph a; but
2. does not include the cultivation of aquatic animals.

Examples include feedlot, piggery, poultry and egg production.

**Matters of state environmental significance** see schedule 2 of the Environmental Offsets Regulation 2014.

Note: Matters of state environmental significance are prescribed environmental matters under the Environmental Offsets Regulation 2014 that require an offset when a prescribed activity will have a significant residual impact on the matter. A matter of state environmental significance is any of the following matters:
1. regional ecosystems under the *Vegetation Management Act 1999* that:
   a. are endangered regional ecosystems
   b. are of concern regional ecosystems
   c. intersect with a wetland shown on the vegetation management wetlands map
   d. contain areas of essential habitat shown on the essential habitat map for an animal that is endangered wildlife or vulnerable wildlife
   e. are located within the defined distances stated in the Environmental Offsets Policy, Department of Environment and Heritage Protection, 2014 from the defining banks of a relevant watercourse or drainage feature as shown on the vegetation management watercourse and drainage feature map; or
   f. are areas of land determined to be required for ecosystem functioning ('connectivity areas')
2. wetlands in a wetland protection area or wetlands of high ecological significance shown on the map of referable wetlands under the Environmental Protection Regulation 2008
3. wetlands and watercourses in high ecological value waters as defined in schedule 2 of the Environmental Protection (Water) Policy 2009
4. designated precincts in strategic environmental areas under the Regional Planning Interests Regulation 2014
5. threatened wildlife under the *Nature Conservation Act 1992* and special least concern animals under the Nature Conservation (Wildlife) Regulation 2006
6. protected areas under the *Nature Conservation Act 1992*, excluding coordinated conservation areas
7. highly protected zones of state marine parks under the *Marine Parks Act 2004*
8. declared fish habitat areas under the *Fisheries Act 1994*
9. waterways that provide for fish passage under the *Fisheries Act 1994* if the construction, installation or modification of waterway barrier works carried will limit the passage of fish along the waterway
10. marine plants under the *Fisheries Act 1994*; or
11. legally secured *offset* areas.

**Offset** means environmental offset under the *Environmental Offsets Act 2014*. Note: Environmental *offset* means an activity undertaken to counterbalance a significant residual impact of a prescribed activity on a *prescribed environmental matter*, delivered in accordance with the Environmental offsets framework, Department of Environment and Heritage Protection, 2016. The *prescribed environmental matters* assessed under the State Development Assessment Provisions are matters of state environmental significance.

**Odour unit (ou)** means that concentration of odorant(s) at standard conditions that elicits a physiological response from a panel (detection threshold) equivalent to that elicited by one Reference Odour Mass, evaporated in one cubic metre of neutral gas at standard conditions.

**Poultry farming** see schedule 2 of the Environmental Protection Regulation 2008. Note: *Poultry farming* consists of farming a total of more than 1000 birds for:
1. producing eggs or fertile eggs
2. rearing hatchlings, starter pullets or layers; or
3. rearing birds for meat.

**Prescribed environmental matters** see the *Environmental Offsets Act 2014*. Note: A *prescribed environmental matter* is any species, ecosystem or other similar matter protected under Queensland legislation for which an *offset* may be provided. A *prescribed environmental matter* may be a matter of national, state or local environmental significance, however, assessment criteria in the State Development Assessment Provisions only relate to matters of state environmental significance. Each of the *prescribed environmental matters* are listed under the Environmental Offsets Regulation 2014.

**Reference odour mass** means the acceptable reference value for the odour unit, equal to a defined mass of a certified reference material. One reference odour mass is equivalent to 132 µg n-butanol which evaporated in 1 cubic metre of neutral gas at standard conditions produces a concentration of 40 ppb (µmol/mol).

**Sensitive land uses** see schedule 24 of the Planning Regulation 2017. Note: *Sensitive land uses* means:
1. caretaker’s accommodation; or
2. a childcare centre; or
3. a community residence; or
4. a detention facility; or
5. a dual occupancy; or
6. a dwelling house; or
7. a dwelling unit; or
8. an educational establishment; or
9. a health care service; or
10. a hospital; or
11. a hotel, to the extent the hotel provides accommodation for tourists or travellers; or
12. a multiple dwelling; or
13. non-resident workforce accommodation; or
14. a relocatable home park; or
15. a residential care facility; or
16. a resort complex; or
17. a retirement facility; or
18. rooming accommodation; or
19. rural workers’ accommodation; or
20. short-term accommodation; or
21. a tourist park.

**Sensitive receptor** means an area or place where noise is measured as defined by schedule 1 of the Environmental Protection Policy (Noise) 2008.

**Serious environmental harm** see the *Environmental Protection Act 1994*. Note: *Serious environmental harm* is environmental harm (other than environmental nuisance):
1. that is irreversible, of a high impact or widespread
2. caused to an area of high conservation value or special significance
3. that causes actual or potential loss or damage to property of an amount of, or amounts totalling, more than the threshold amount; or
4. that results in costs of more than the threshold amount being incurred in taking appropriate action to:
a. prevent or minimise the harm
b. rehabilitate or restore the environment to its condition before the harm.

**Significant residual impact** see the *Environmental Offsets Act 2014*.
Note: **Significant residual impact** is an impact, whether direct or indirect, of a prescribed activity on all or part of a prescribed environmental matter that:
1. remains, or will or is likely to remain, (whether temporarily or permanently) despite on-site mitigation measures for the prescribed activity
2. is, or will or is likely to be, significant.
Guidance for determining if a prescribed activity will have a significant residual impact on a matter of state environmental significance is provided in the Significant Residual Impact Guideline, Department of State Development, Infrastructure and Planning, 2014.

**Wetland** means an area shown as a wetland on the map of referable wetlands as defined by the Environmental Protection Regulation 2008.

**Waste** see the *Environmental Protection Act 1994*.
Note: **Waste** includes anything, other than a resource approved under chapter 8 of the *Waste Reduction and Recycling Act 2011*, that is:
1. left over, or an unwanted by-product, from an industrial, commercial, domestic or other activity; or
2. surplus to the industrial, commercial, domestic or other activity generating the waste.
State code 23: Wind farm development

23.1 Purpose statement

The purpose of the code is to protect individuals, communities and the environment from adverse impacts as a result of the construction, operation and decommissioning of wind farm development.

Wind farms should be appropriately located, sited, designed and operated to ensure:

1. the safety, operational integrity and efficiency of air services and aircraft operations
2. risks to human health, wellbeing and quality of life are minimised by ensuring acceptable levels of amenity and acoustic emissions at sensitive land uses
3. development avoids, or minimises and mitigates, adverse impacts on the natural environment (fauna and flora) and associated ecological processes
4. development does not unreasonably impact on the character, scenic amenity and landscape values of the locality
5. the safe and efficient operation of local transport networks and road infrastructure.

Note: Guidance on how to demonstrate compliance with the performance outcomes and acceptable solutions of this state code are available in the State Development Assessment Provisions Guideline – State code 23: Wind farm development.

23.2 Performance outcomes and acceptable outcomes

Development that is a material change of use for a wind farm should demonstrate compliance with the relevant provisions of table 23.1.1.

Table 23.2.1: Material change of use

<table>

### Flora and fauna

| P05 Development ensures that impacts on flora, fauna and associated ecological processes are avoided, or minimised and mitigated, through effective siting, design and operation of the development. | No acceptable outcome is prescribed. |

### Traffic and access

| P06 Development provides suitable vehicular access, manoeuvring areas and parking for the ongoing operation and maintenance activities associated with the wind farm. | No acceptable outcome is prescribed. |

### Stormwater management

| P07 Development avoids, or minimises and mitigates, adverse impacts on water quality objectives to achieve no worsening to receiving waters during the operation of the wind farm. | No acceptable outcome is prescribed. |

### Watercourses and drainage features

| P08 Development avoids or minimises the clearing of vegetation within any watercourse or drainage feature to protect: 1. bank stability by protecting against bank erosion 2. water quality objectives by filtering sediments, nutrients and other pollutants 3. aquatic habitat 4. terrestrial habitat. | No acceptable outcome is prescribed. |

### Character, scenic amenity and landscape values

| P09 Development avoids, or minimises and mitigates, adverse impacts on the character, scenic amenity and landscape values of the locality and region through effective siting and design. | No acceptable outcome is prescribed. |

### Separation distances

| P010 Wind turbines are adequately separated from existing or approved sensitive land uses on non-host lots. | AO10.1 Wind turbines are setback at least 1500 metres from existing or approved sensitive land uses on non-host lots. OR AO10.2 Where wind turbines are proposed within 1500 metres of existing or approved sensitive land uses on non-host lots, written agreements (deeds of release) from all affected non-host lot owners are provided accepting the reduced setback. |

### Acoustic amenity – host lots

| P011 The predicted acoustic level at all noise affected existing or approved sensitive land uses does not exceed the criteria stated in table 23.3.1. | No acceptable outcome is prescribed. |

### Acoustic amenity – non-host lots

|                      |                      |
Performance outcomes | Acceptable outcomes
---|---
**PO12** The predicted acoustic level at all noise affected existing or approved *sensitive land uses*:  
1. does not exceed the criteria stated in table 23.3.2; or  
2. where the acoustic levels stated in table 23.3.2 cannot be achieved at noise affected existing or approved *sensitive land uses*:  
   a. individual written agreements (*deeds of release*) from non-host lot owners are provided  
   b. the predicted acoustic level at all noise affected existing or approved *sensitive land uses* does not exceed the criteria stated in table 23.3.1. | No acceptable outcome is prescribed.

**Construction management**

**PO13** Construction activities associated with the development avoid, or minimise and mitigate, adverse impacts on *environmental values, water quality objectives*, amenity, local transport networks and road infrastructure. | No acceptable outcome is prescribed.

2. the background noise (LA90) by more than 5dB(A) whichever is the greater, for wind speed from cut-in to rated power of the wind turbine and each integer wind speed in between referenced to hub height. |

### 23.4 Reference documents

Department of Infrastructure, Local Government and Planning 2017, *Wind farm state code planning guidelines*
23.5 Glossary of terms

**Air services** means the premises used for any of the following:
1. the arrival and departure of aircraft
2. the housing, servicing, refuelling, maintenance and repair of aircraft
3. the assembly and dispersal of passengers or goods on or from an aircraft
4. any ancillary activities directly serving the needs of passengers and visitors to the use
5. associated training and education facilities
6. aviation facilities.

**Anemometers** means a device used for measuring wind speed.

**Certified aerodrome** means a certified aerodrome as specified under part 139 of the Civil Aviation Safety Regulations 1998 (Cth).

**Cut-in** means the wind speed at which a wind turbine starts power production.

**Decommissioning** means that the wind turbines, site office and any other above-ground infrastructure is removed from the site, and roads, parking areas and foundation pads are covered and revegetated to return the ground to its former state.

**Deed of release** means a written agreement between proponent and landowner accepting the following:
1. a reduced setback between wind turbines and the landowner’s existing or approved sensitive land use(s); and/or
2. an increased acoustic level at the landowner’s existing or approved noise affected sensitive land use(s).

Note: See section 45 of the Property Law Act 1974 for the formal requirements for deeds executed by individuals.

**Drainage feature** means a natural landscape feature, including a gully, drain, drainage depression or other erosion feature that:
1. is formed by the concentration of, or operates to confine or concentrate, overland flow water during and immediately after rainfall events
2. flows for only a short duration after a rainfall event, regardless of the frequency of flow events
3. commonly, does not have enough continuing flow to create a riverine environment.

**Electromagnetic interference** means disturbance or degradation of telecommunications signals currently in operation over the land use area. Includes signals transmitted via microwave, very high frequency and ultra-high frequency systems.

**Environmental value** see the Environmental Protection Act 1994.

Note: Environmental value is:
1. a quality or physical characteristic of the environment that is conducive to ecological health or public amenity or safety; or
2. another quality of the environment identified and declared to be an environmental value under an environmental protection policy or regulation.

**Ground level** means the level of the natural ground, or, where the level of the natural ground has been changed, the level as lawfully changed.

**Guy wire** means a tensioned cable designed to add stability to a free-standing structure, such as wind turbines and wind monitoring towers. One end of the guy wire is attached to the structure, and the other is anchored to the ground at some distance from the mast or tower base.

**Height** of a wind turbine means the maximum height reached by the tip of the turbine blades at their highest point above ground level.

**Host lot** means a parcel of land (lot(s)) that accommodates any part of a wind farm development.
Hub height of a wind turbine means the height of the hub measured from ground level (i.e. the height of the wind turbine without blades).

Landscape values means areas protected under a regional plan and/or local government planning scheme, such as biodiversity networks, natural economic resource areas (including rural production), scenic amenity areas and landscape heritage areas.

Low flying areas means a designated area where an aircraft can fly over:
1. any city, town or populous area at an elevation lower than 1 000 feet; or
2. any other area at an elevation lower than 500 feet.

Low reflectivity means a surface treatment that minimises glint.

Mast means the tower on which the wind turbine sits.

Military aerodrome means an aerodrome under the control of any part of the Defence Force.

Nacelle means the housing that sits on top of the tower and contains the main shaft and generator of the wind turbine.

Non-host lot see schedule 24 of the Planning Regulation 2017. 
Note: Non-host lot means a lot no part of which is used for wind farm or part of a wind farm.

Obstacle limitation surfaces (OLS) means a series of surfaces that set the height limits of objects around an aerodrome, and is designed to provide protection for visual flying (when the pilot is flying by sight).

Procedures for air navigation services – aircraft operations (PANS-OPS) means a set of invisible surfaces above the ground around an airport. The PANS-OPS surface is generally above the OLS and is designed to safeguard an aircraft from collision with obstacles when the aircraft’s flight may be guided solely by instruments, in conditions of poor visibility.

Restricted airspace means the airspace where aircraft movements are reduced to those with certain specified permissions. The Civil Aviation Safety Authority’s Office of Airspace Regulation is responsible for restricted airspace.

Registered aerodrome means a registered aerodrome as specified under part 139 of the Civil Aviation Safety Regulations 1998 (Cth).

Rotor blades means the blades and hub of the wind turbine together.

Scenic amenity means a measure of the relative contribution of each place in the landscape to the collective appreciation of open space as viewed from places that are important to the public.

Sensitive land use see schedule 24 of the Planning Regulation 2017. 
Note: Sensitive land use means any of the following as defined in the Planning Regulation 2017:
1. caretakers accommodation
2. child care centre
3. community care centre
4. community residence
5. detention facility
6. dual occupancy
7. dwelling house
8. dwelling unit
9. educational establishment
10. health care services
11. hospital
12. hotel
13. multiple dwelling
14. non-resident workforce accommodation
15. relocatable home park
16. residential care facility
17. resort complex
18. retirement facility
19. rooming accommodation
20. rural workers’ accommodation
21. short-term accommodation
22. tourist park.

Shadow flicker means a shadow that is cast under certain combinations of geographical position and time of day, when the sun passes behind the blades of a wind turbine and as the blades rotate, the shadow flicks on and off. The duration of this effect, which varies according to the time of the year, can be calculated from the machine geometry and the latitude of the site.

Watercourse see the schedule 4 of the Water Act 2000.
Note: A watercourse:
1. is a river, creek or other stream, including a stream in the form of an anabranch or a tributary, in which water flows permanently or intermittently, regardless of the frequency of flow events:
   a. in a natural channel, whether artificially modified or not; or
   b. in an artificial channel that has changed the course of the stream
2. a watercourse includes any of the following located in it:
   a. in-stream islands
   b. benches
   c. bars
3. however, a watercourse does not include a drainage feature
4. further:
   a. unless there is a contrary intention, a reference to a watercourse in the Water Act 2000, other than in section 5 or in the definitions in schedule 4 to the extent they support the operation of section 5, is a reference to anywhere that is: I. upstream of the downstream limit of the watercourse II. between the lateral limits of the watercourse
   b. a reference to the Water Act 2000 to, or to a circumstance that involves, land adjoining a watercourse, is a reference to, or a circumstance that involves, and effectively adjoining a watercourse.

Water quality objectives means the numerical concentration limits, mass or volume limits per unit of time or narrative statements of indicators established for waters to enhance or protect the environmental values for those waters set out in:
1. schedule 1 of the Environmental Protection (Water) Policy 2009, for water mentioned in the policy; or

Wind farm see schedule 24 of the Planning Regulation 2017.
Note: Wind farm:
1. means the use of premises for generating electricity by wind force, other than electricity that is to be used mainly on the premises for a domestic or rural use; and
2. includes the use of premises for any of the following, if the use relates or is ancillary to the use stated in paragraph 1:
   a. a wind turbine, wind monitoring tower or anemometer;
   b. a building or structure including for example, temporary worker’s accommodation and site offices;
   c. a storage area or maintenance facility including for example, lay down areas;
   d. infrastructure or works, including, for example, site access, foundations, electrical works substations or landscaping.

Development involving wind turbines that is not a material change of use for a wind farm may otherwise be assessable development under a planning instrument.

Wind monitoring tower means a mast that incorporates wind speed and direction measuring and recording equipment.

Wind turbine see schedule 24 of the Planning Regulation 2017.
Note: Wind turbine means a machine or generator that uses wind force to generate electricity, and includes the blades of the machine or generator.

23.6 Abbreviations

CASA – Civil Aviation Safety Authority
dB(A) – decibels measured on the ‘A’ frequency weighting network

**Free-field** – a region in space where sound may propagate free from any form of obstruction, usually greater than 5 metres from any significant vertical reflecting surface

$L_{Aeq}$ – the equivalent continuous (time-averaged) A-weighted sound level

$L_{A90}$ – the A-weighted noise level equalled or exceeded for 90 percent of the measurement period. This is commonly referred to as the background noise level

LED – Light Emitting Diode
24.1 Purpose statement

The purpose of the code is to ensure that significant projects result in high quality urban design outcomes for a locality or region; creating a physical environment that increases liveability, creates a sense of place, supports positive health and wellbeing, and improves social and economic interactions.

Note: Please refer to the Office of the Queensland Government Architect webpage.

24.2 Urban design principles

24.2.1 Context

Urban design is both a process and an outcome of creating places in which people live, engage with each other and the physical environment around them. Built form and its relationship with public, open and active spaces plays a key role in facilitating liveable communities that support Queensland’s social and economic prosperity.

High-quality urban design and effective place making is an essential element of improving community health and well-being, facilitating social cohesion, and creating resilient, sustainable and affordable communities. This is particularly important for significant projects within a metropolitan context.

Well-designed communities create places and spaces that are vibrant, prosperous, diverse, inclusive, sustainable, accessible, connected, healthy and safe. These features increase liveability, create a sense of place, support positive health and wellbeing, and improve social and economic interactions.

Well implemented urban design outcomes also enhance the quality of life for residents and visitors, resulting in attractive places to live, work and play.

24.2.2 Principles

Significant projects have a critical role to play in contributing to the well-being and liveability of the communities through high quality urban design. Accordingly, significant projects should incorporate the following principles that underpin best practice urban design:

Development should:
1. be responsive to local climatic conditions and patterns
2. be inspired by local places and incorporate locally significant character and cultures
3. consider, incorporate and enhance the natural landscape
4. work with and respond to natural systems and processes (i.e. hydrology and ecology)
5. create functional, well defined, legible and connected streets and spaces
6. deliver diverse and well integrated development density and land use mix, sympathetic to local settings and values
7. consider and embed opportunities for adaptation and change
8. be innovative, creative and forward-thinking.

24.3 Achieving the principles

In addressing the eight urban design principles, applicants should prepare a statement including a description of the overarching project vision and summary of how the urban design principles are reflected in the project. The statement should demonstrate that a robust urban design process has informed the proposal and that high-quality
outcomes will be achieved. Should any of the urban design principles not be reflected in the project, the statement should include appropriate justification for this omission.

The statement will be assessed by the Office of the Queensland Government Architect and by SARA, providing a basis for design advice to the assessment manager.

Appendix 2: FastTrack5 qualifying criteria

Introduction

The FastTrack5 framework is a streamlined SARA referral and assessment process that allows aspects of development subject to selected triggers to be assessed and decided quickly by SARA, and to be subject to a reduced fee. Appendix 2 includes the qualifying criteria for each of those triggers eligible for assessment under the SARA FastTrack5 framework (summarised below).

For each eligible trigger, the qualifying criteria checklists are provided to enable applicants to self-determine whether or not a triggered aspect of development qualifies for FastTrack5 assessment. Having confirmed that the relevant aspect of the development meets the SARA FastTrack5 qualifying criteria, SARA can quickly assess and provide a referral response or decisions for a FastTrack5 eligible aspect of the development within five days of acceptance that the aspect of development meets the qualifying criteria. Applications that qualify for SARA FastTrack5 assessment will not be subject to an information request and standard conditions will generally be applied.

FastTrack5 qualifying criteria checklist 1

State transport corridor (material change of use, operational works, building works)
(SDAP version 2.5 dated 1 July 2019)

This form must be used when seeking a FastTrack5 assessment pathway for the following triggers:

1. schedule 10, part 9, division 4, subdivision 2, table 4 (material change of use of premises near a state transport corridor or that is a future state transport corridor)
2. schedule 10, part 9, division 4, subdivision 2, table 5 (operational work on premises near a state transport corridor)
3. schedule 9, part 3, division 1, table 3 (building work under the Building Act that is near a state transport corridor)
4. schedule 10, part 13, division 1, subdivision 2, table 2 (operational work on premises near a state transport corridor that is on Brisbane core port land)
5. schedule 10, part 13, division 1, subdivision 2, table 4 (material change of use on premises near a state transport corridor that is on Brisbane core port land).

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:

1. have completed any other forms relevant to your application
2. upload a completed copy of this form when referring your application using MyDAS2
3. provide all supporting information required on the form at the time of lodgement – this information will assist SARA in undertaking its FastTrack5 assessment.

All terms used in this form have the meaning given in the Act or the regulation.

</table>

## Vehicular access

### 5

- **a. Does the proposed development:**
  - i. propose a 'new or changed access' between the subject site and a state transport corridor; or
  - ii. have an existing access between the subject site and a state transport corridor.

  **No:** Proceed to question 6. A site/layout plan must be provided and demonstrate the subject site does not have an existing, new or changed access to a state-controlled road. **Yes:** Proceed to question 5b.

  **AND**

- **b. Does the proposed development include an existing access or propose a ‘new or changed access’ to a:**
  - i. busway corridor
  - ii. light rail corridor
  - iii. railway corridor.

  **No:** Proceed to question 5c. A site/layout plan must be provided and demonstrate that the subject site does not include an existing access or a proposed ‘new or changed access’ to a:
  - i. busway corridor
  - ii. light rail corridor
  - iii. railway corridor.

  **Yes:** Application cannot qualify for the FastTrack5 assessment pathway and must follow the standard SARA assessment. Please refer to the relevant SDAP state codes.

  **AND**

- **c. Has a permitted road access location approval, under section 62 of the Transport Infrastructure Act 1994, been granted by the Department of Transport and Main Roads (DTMR) for the proposed or existing access to the state-controlled road in relation to the proposed development?**

  **Yes:** Proceed to question 6. A copy of the section 62 approval granted by DTMR must be provided. The development which is the subject of the application must be of an equivalent use and intensity for which the section 62 approval was issued, and the section 62 approval must have been granted no more than 5 years prior to the lodgement of the application. **No:** Proceed to question 5c.
Qualifying criteria | Response | Supporting information provided
--- | --- | ---
6 Does the proposed development include a ‘new or changed’ access onto a local government road within 100 metres of an intersection with a state-controlled road? | **No:** Application cannot qualify for the FastTrack5 assessment pathway and must follow the standard SARA assessment. Please refer to the relevant SDAP state codes. | |
7 Does the proposed development include a ‘new or changed’ access onto a local government road within 100 metres of a railway crossing? | **No:** Proceed to question 7.  
An excerpt from the **DA mapping system** must be provided demonstrating that any access onto a local government road is not located within 100 metres of an intersection with a state-controlled road. The development which is the subject of the application must also be of an equivalent use and intensity to the existing development.  
Note: The **DA mapping system** is available on the department’s website. | |
Yes: Application cannot qualify for the FastTrack5 assessment pathway and must follow the standard SARA assessment. Please refer to the relevant SDAP state codes. | |

## Glossary of terms

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The **DA mapping system** is available on the department’s website.

**New or changed access** see schedule 24 of the Planning Regulation.

Note: **new or changed access**, between premises and a road or State transport corridor, means—

(a) the use of a new location as a relevant vehicular access between the premises and the road or corridor; or  
(b) the construction of a new relevant vehicular access between the premises and the road or corridor; or  
(c) the extension of an existing relevant vehicular access between the premises and the road or corridor; or  
Example for paragraph (c)—widening a driveway to allow access by a wide-turning vehicle  
(d) an increase in the number of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor; or  
(e) a change in the type of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor.
**Planned upgrade** means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified:

1. in a publicly available government document; or
2. in written advice to affected land owners.

Note: Government documents are Commonwealth, state or local government documents that include a statement of intent for, or a commitment to, a planning outcome or infrastructure provision.

See the [DA mapping system](#).
FastTrack5 qualifying criteria checklist 2

State transport corridor (reconfiguring a lot)

(SDAP version 2.5 dated 1 July 2019)

This form must be used when seeking a FastTrack5 assessment pathway for the following triggers:

1. schedule 10, part 9, division 4, subdivision 2, table 1 (reconfiguring a lot near a state transport corridor)
2. schedule 10, part 9, division 4, subdivision 2, table 3 (reconfiguring a lot that is near a state-controlled road intersection).

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:

1. have completed any other forms relevant to your application
2. upload a completed copy of this form when referring your application using MyDAS2
3. provide all supporting information required on the form at the time of lodgement – this information will assist SARA in undertaking its FastTrack5 assessment.

Where not defined, all terms have the meaning given in the Act or the regulation.

### Glossary of terms

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The **DA mapping system** is available on the department’s website.

**New or changed access** see the Planning Regulation 2017, schedule 26.

Note: New or changed access between premises and a road or State transport corridor, means-

- the use of a new location as a relevant vehicular access between the premises and the road or corridor; or
- the construction of a new relevant vehicular access between the premises and the road or corridor; or
- an extension of an existing relevant vehicular access between the premises and the road or corridor; or
- an increase in the number of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor; or
- a change in the type of vehicles regularly using an existing relevant vehicular access between the premises and the road or corridor.

**Overland flow path** means open space floodway channels, road reserves, pavement expanses and other flow paths that convey flows typically in excess of the capacity of the minor drainage system (Road Drainage Manual, July 2015).

**Planned upgrade** means an extension, upgrade, or duplication of state transport infrastructure or transport networks for which affected land has been identified:

1. in a publicly available government document; or
2. in written advice to affected land owners.

Note: Government documents are Commonwealth, state or local government documents that include a statement of intent for, or a commitment to, a planning outcome or infrastructure provision.
See the DA mapping system.

**Stormwater point of discharge** means the location at which stormwater leaves the subject site.
FastTrack5 qualifying criteria checklist 3
State-controlled transport tunnel (reconfiguring a lot, material change of use, operational works)
(SDAP version 2.5 dated 1 July 2019)

This form must be used when seeking a FastTrack5 assessment pathway for the following triggers:
1. schedule 10, part 9, division 4, subdivision 3, table 1 (reconfiguring a lot near a state-controlled transport tunnel)
2. schedule 10, part 9, division 4, subdivision 3, table 2 (material change of use near a state-controlled transport tunnel or in a future state-controlled transport tunnel)
3. schedule 10, part 9, division 4, subdivision 3, table 3 (operational work near a state-controlled transport tunnel or in a future state-controlled transport tunnel).

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:
1. have completed any other forms relevant to your application
2. upload a completed copy of this form when referring your application using MyDAS2
3. provide all supporting information required on the form at the time of lodgement – this information will assist SARA in undertaking its FastTrack5 assessment.

Where not defined, all terms have the meaning given in the Act or the regulation.

FastTrack5 qualifying criteria checklist 4

Tidal works – impacts on maritime safety (operational works)

(SDAP version 2.5 dated 1 July 2019)

This form must be used when seeking a FastTrack5 assessment pathway for trigger:

1. schedule 10, part 17, division 3, table 2 (operational work in tidal waters)

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:

1. have completed any other forms relevant to your application
2. upload a completed copy of this form when referring your application using MyDAS2
3. provide all supporting information required on the form at the time of lodgement – this information will assist SARA in undertaking its FastTrack5 assessment.

Where not defined, all terms have the meaning given in the Act or the regulation.

</table>
Glossary of terms

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.  
Note: The DA mapping system is available on the department’s website.

**High risk maritime development zone** means areas indicated in the DA mapping system as high risk maritime development zone. These are areas in the vicinity of ports, state boat harbours, marinas and navigationally difficult areas such as waterways which experience significant shoaling and waters between and around populated islands. High risk maritime development zone includes:
1. marinas with six or more boats
2. state boat harbours
3. port limits and/or pilotage areas
4. sensitive marine environments including areas of constant sand movement
5. from the coast to the extent of Queensland waters (three nautical miles).

**Navigation corridor** means areas indicated in the DA mapping system as navigation corridor. These are the sections of a navigable tidal waterway allocated for the movement of vessels.

**Private single vessel pontoon** is:
1. constructed to provide private access to private land from tidal water for non-commercial purposes, and
2. designed for a single on-water vessel to be attached to the pontoon while it remains on the water (this includes a jetty with up to four associated ancillary mooring such as a dry berth or a personal watercraft pod).

**Private single vessel jetty** is:
1. constructed to provide private access to private land from tidal water for non-commercial purposes, and
2. designed for a single on-water vessel to be attached to the jetty while it remains on the water (this includes a jetty with up to four associated ancillary mooring such as a dry berth or a personal watercraft pod).

**Private single vessel boat ramp** is a boat ramp constructed to provide private access to private land from tidal water for non-commercial purposes.

**Revetment wall** means a protective covering on an embankment of earth designed to maintain the slope or to protect it from erosion.

**Vessel** means a ship defined under section 10 of the *Transport Operations (Marine Safety) Act 1994*. 
FastTrack5 qualifying criteria checklist 5

Tidal works – coastal protection (operational work)

(SDAP version 2.5 dated 1 July 2019)

This form must be used when seeking a FastTrack5 assessment pathway for the following trigger:

1. schedule 10, part 17, division 3, table 1 (operational works in tidal waters)

For this checklist, either table 1 or table 2 must be completed, as relevant.

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:

1. have completed any other forms relevant to your application
2. upload a completed copy of this form when referring your application using MyDAS2
3. provide all supporting information required on the form at the time of lodgement – this information will assist SARA in undertaking its FastTrack5 assessment.

Where not defined, all terms used in this form have the meaning given in the Act or the regulation.

</tr>
</tbody>
</table>

Note: Plans showing water allocation areas can be obtained from the Gold Coast Waterway Authority.

### 5 Has the design of the tidal works been certified by a RPEQ as complying with the relevant standards?

**Yes:** Application is eligible for FastTrack5 assessment. Plans certified by an RPEQ must be provided.

**No:** Application cannot qualify for the FastTrack5 assessment pathway and must follow the standard SARA assessment. Please refer to the relevant SDAP state codes.

---

## Glossary of terms

**DA mapping system** means the mapping system containing the Geographic Information System mapping layers kept, prepared or sourced by the state that relate to development assessment and matters of interest to the state in assessing development applications.

Note: The DA mapping system is available on the department’s website.

**Developed marina or state boat harbour area** means areas indicated in the DA mapping system as developed marinas or state boat harbours. These are existing facilities that have been developed for the purpose of the safe mooring of vessels.

**Developed tidal waterway area** means areas indicated in the DA mapping system as a developed tidal waterway area. These are natural tidal waterways that have a high number of private marine access structures.

Note: A developed tidal waterway area is distinct from a water allocation area. However, an area mapped as a developed tidal waterway area may include a water allocation area.

**Extended side boundaries** of a lot adjacent or connected to prescribed tidal work, means the projection of the side boundary of the lot over tidal water:

1. in a continuing straight line; or
2. if extending the side boundary into tidal water in a continuing straight line would reduce the width of access to a navigable waterway from any adjoining lot to less than three metres, or cause a significant adverse effect to navigational safety, at an angle that ensures:
   a. the width is not reduced to less than 3 metres; and
   b. no significant adverse effect is caused to navigational safety.

**Marine access purpose** means a structure in tidal water used to facilitate vessel access for people between land and a navigable waterway. This includes jetties, pontoons and boat ramps but excludes decks and boardwalks.

**Navigable waterway** means waters with sufficient depth and width to allow safe passage by all vessel sizes and types that frequently use the area. This includes areas seaward of a quayline or navigation corridor determined by a managing authority.
Navigation corridor means areas indicated in the DA mapping system as navigation corridor. These are the sections of a navigable tidal waterway allocated for the movement of vessels.

Private marine development means a work for a non-commercial purpose attached to private land and extending over abutting tidal water.

Quayline means a boundary set by a managing authority for the waterway that defines how far tidal works, such as pontoons or jetties, may extend into a waterway.

Tidal boundary means the legal property boundary adjoining the tidal area, as defined in the Survey and Mapping Infrastructure Act 2003.

Water allocation area means the area of a waterway defined or endorsed by a managing authority for the waterway where a waterfront property owner may apply for approval to locate and construct a marine access structure.

Note: A managing authority for a water allocation area may include Gold Coast Waterways Authority or Department of Transport and Main Roads. A water allocation area is distinct from a developed tidal waterway area. However, an area mapped as a developed tidal waterway area may include a water allocation area.
FastTrack5 qualifying criteria checklist 6

Clearing native vegetation to manage thickened vegetation (operational works)

(SDAP version 2.5 dated 1 July 2019)

This form must be used when seeking a FastTrack5 assessment pathway for the following trigger:

1. schedule 10, part 3, division 3, table 1 (operational work for managing thickened vegetation as defined under the Vegetation Management Act 1999).

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Where an application has more than one SARA trigger, but not all triggers or aspects of development are eligible for FastTrack5 assessment, the application will be subject to the standard statutory assessment timeframes. However, any aspects of development eligible for FastTrack5 assessment will benefit from the reduced FastTrack5 application fee.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:

1. have completed any other forms relevant to your application
2. upload a completed copy of this form when referring your application using MyDAS2
3. provide all supporting information required on the form at the time of lodgement – this information will assist SARA in undertaking its FastTrack5 assessment.

Where not defined, all terms used in this form have the meaning given in the State Development Assessment Provisions (SDAP) State Code 16.

</thead>
</table>
| 2 Is the proposed clearing area subject to a notice requiring compliance? | **No:** Proceed to question 3.  
The proposed clearing area must not be subject to a restoration notice, stop work notice, Land Act notice, trespass notice under the Land Act 1994 for the clearing of vegetation, enforcement notice or other compliance notice containing conditions about the restoration of vegetation.  
A copy of the relevant purpose determination letter from the Department of Natural Resources, Mines and Energy must be provided confirming the proposed clearing area is not subject to a notice requiring compliance.  
**Yes:** Application cannot qualify for the FastTrack5 assessment pathway and must follow the standard SARA assessment. Please refer to the relevant SDAP state codes. | ![ ] |
| 3 Is the proposed clearing area a particular regulated area? | **No:** Proceed to question 4.  
The proposed clearing area must not be an exchange area, unlawfully cleared area, declared area (voluntary) or an area on a PMAV shown as a category A area were the chief executive of the Vegetation Management Act 1999 reasonably believes that a vegetation clearing offence is or has been committed.  
A copy of the relevant purpose determination letter from the Department of Natural Resources, Mines and Energy must be provided confirming the proposed clearing area is not a particular regulated area.  
**Yes:** Application cannot qualify for the FastTrack5 assessment pathway and must follow the standard SARA assessment. Please refer to the relevant SDAP state codes. | ![ ] |
| 4 Is the proposed clearing area a legally secured offset area? | **No:** Proceed to question 5.  
The proposed clearing area must not be a legally secured offset area under the Environmental Offsets Act 2014.  
The applicant must demonstrate that the proposed clearing area is not an area that is: | ![ ] |
